Duff R. Waring

Dependent Elderly Autonomy Justice And Quality Of Care:

The Dependent Elderly Luke Gormally, 1992-08-28 A distinguished team of contributors from the fields of medicine philosophy and law address some of the issues which arise over the provision of care for dependent elderly patients Some of the chapters are concerned with the challenge of achieving good quality medical care the chronic inadequacies of policy making in the UK context and the prospects for improvement in the medium term Other chapters look at some of the threats to dependent elderly patients posed by longer term social and ideological trends which find expression in proposals for age limits to health care advocacy of living wills and euthanasia arguments for withdrawing tube feeding from certain categories of patient and certain proposals for resource allocation This interdisciplinary volume will have a wide appeal to those involved in care of the dependent elderly to health policy analysts and health care economists and to bioethicists The

Dependent Elderly Luke Gormally, 2009-10-01 This thoughtful and compassionate account addresses some of the difficult ethical and medical issues raised in the provision of health care for the dependent elderly patient Care of the dependent elderly is subject to conflicting priorities arising from the demands of patients their relatives the fair allocation of medical and financial resources and the medical ethos to prolong life A distinguished team of contributors selected from the fields of medicine philosophy ethics and law discuss and critically evaluate these issues This volume will provide a focus for further debate and interest in this important subject **Legal and Healthcare Ethics for the Elderly** George P. Smith

II, 2022-04-18 Increasingly legislators at the state and federal levels of government are forced to evaluate and act upon the unique problems presented by an aging American public A domino effect has occurred evoking concern in educational circles to deal with the varied complex issues associated with the new gerontology This expanded focus brings in not only mental and public health delivery issues but reaches and impacts on the social sciences ethics law and medicine as well as public policy In response to these matters Legal and Healthcare Ethics for the Elderly provides a balanced analytical presentation of the complicated socio legal medico ethical and political perspectives which interact with gerontology as a field of study In a straightforward and unambiguous style it covers information on access and financing healthcare the ethics of rationing healthcare and the inevitable link to the quality of life guardianship issues in a nursing home setting informed consent living wills and durable powers of attorney elder abuse and death with dignity The economics of care giving is charted and directed by the sometimes harsh realities of the marketplace Thus the various philosophical and ethical dilemmas which confront the process of aging are examined here both from a micro and from a macro economic perspective This book exemplifies that it is vitally important to be educated now to be prepared for the future and thereby make informed decisions for both ourselves and our loved ones

Natural Law Ethics in Theory and Practice Joseph Boyle, 2020-08-07 Natural Law Ethics in Theory and Practice brings together a selection of essays of the late Joseph Boyle Boyle was with Germain Grisez and John Finnis a founder and developer of the New Classical Natural Law Theory arguably the most important development in Catholic moral

philosophy of the twentieth century While this theory is indebted to the work of St Thomas Aquinas it incorporates an understanding and assessment of that work that is different from that found in other statements of natural law Boyle made crucial contributions to a wide variety of aspects of this theory and the volume is divided into two parts Part One Articulating a Theory of Natural Law contains three sections in which Boyle defends the reality of free choice and the view that the basic reasons for action or first principles of natural law are incommensurable in goodness Boyle identifies the basic moral standard for choice and action and develops an account of human action that elucidates the important role played by intention and double effect in their moral evaluation The essays in Part Two Natural Law Theory and Contemporary Moral Problems demonstrate the strength and scope of Boyle s natural law account as he brings it to bear upon just war theory property and welfare rights and issues in bioethics The essays in bioethics address the difficult question of whether it is appropriate to tube feed patients in persistent vegetative state and include an unpublished essay Against Assisted Death which he delivered as the Anscombe Lecture at The Anscombe Bioethics Centre in Oxford about a year before he died This volume also includes a Foreword by Princeton s Robert P George an Introduction by the editors that highlights Boyle s contribution to the development of the new classical natural law theory and a bibliography of Boyle s publications

Encyclopedia of Applied Ethics ,2012-01-10 The Encyclopedia of Applied Ethics Second Edition Four Volume Set addresses both the physiological and the psychological aspects of human behavior Carefully crafted well written and thoroughly indexed the encyclopedia helps users whether they are students just beginning formal study of the broad field or specialists in a branch of psychology understand the field and how and why humans behave as we do The work is an all encompassing reference providing a comprehensive and definitive review of the field A broad and inclusive table of contents ensures detailed investigation of historical and theoretical material as well as in depth analysis of current issues Several disciplines may be involved in applied ethics one branch of applied ethics for example bioethics is commonly explicated in terms of ethical legal social and philosophical issues Editor in Chief Ruth Chadwick has put together a group of leading contributors ranging from philosophers to practitioners in the particular fields in question to academics from disciplines such as law and economics The 376 chapters are divided into 4 volumes each chapter falling into a subject category including Applied Ethics Bioethics Computers and Information Management Economics Business Environmental Ethics Ethics and Politics Legal Medical Ethics Philosophy Theories Social and Social Media Concise entries ten pages on average provide foundational knowledge of the field Each article will features suggested readings pointing readers to additional sources for more information a list of related websites a 5 10 word glossary and a definition paragraph and cross references to related articles in the encyclopedia Newly expanded editorial board and a host of international contributors from the US Australia Belgium Canada France Germany Ireland Israel Japan Sweden and the United Kingdom The 376 chapters are divided into 4 volumes each chapter falling into a subject category including Applied Ethics Bioethics Computers and Information

Management Economics Business Environmental Ethics Ethics and Politics Legal Medical Ethics Philosophy Theories Social and Social Media Catholic Bioethics for a New Millennium Anthony Fisher,2011-11-17 Can the Hippocratic and Judeo Christian traditions be synthesized with contemporary thought about practical reason virtue and community to provide real life answers to the dilemmas of healthcare today Bishop Anthony Fisher discusses conscience relationships and law in relation to the modern day controversies surrounding stem cell research abortion transplants artificial feeding and euthanasia using case studies to offer insight and illumination What emerges is a reason based bioethics for the twenty first century a bioethics that treats faith and reason with equal seriousness that shows the relevance of ancient wisdom to the complexities of modern healthcare scenarios and that offers new suggestions for social policy and regulation Philosophical argument is complemented by Catholic theology and analysis of social and biomedical trends to make this an auspicious example of a new generation of Catholic bioethical writing which has relevance for people of all faiths and none *Ageing in the Asia-Pacific Region* David R. Phillips,2002-11 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company Dementia and Social Inclusion Anthea Innes,Carole Archibald,Charlie Murphy,2004-08-05 Examining important issues in dementia research and care that are often neglected the contributors to this book provide fresh perspectives on current practice The authors put dementia care into a socio cultural framework highlighting the impact of social change on dementia care over the last two decades and challenging current stereotypes The Contribution of Natural Law Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and Euthanasia Craig Paterson,2010-05-13 **Valuing Freedoms** Sabina Alkire,2005 Part II proposes an alternative participatory method for systematically identifying valued changes in participants capability sets Three case studies of women s income generation activities in Pakistan goat rearing adult literacy and rose cultivation contrast economic cost benefit analysis of each activity with capable analysis BOOK JACKET The Contribution of Natural Law Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and Voluntary Euthanasia Craig Paterson,2001 **Injury in the Aging** Michael A. Horan,R. A. Little,1998-06-25 A pioneering volume which surveys our state of knowledge of injury in the aging from a comprehensive range of clinical and scientific perspectives **Human Rights and Common Good** John Finnis,2011-04-07 This central volume in the Collected Essays brings together John Finnis s wide ranging contribution to central issues in political philosophy The volume begins by examining the general theory of political community and social justice It includes the powerful and well known Maccabean Lecture on Bills of Rights a searching critique of Ronald Dworkin s moral political arguments and conclusions of the European Court of Human Rights approach to fundamental rights and of judicial review as a constitutional institution It is followed by an equally searching analysis of Kant s thought on the intersection of law right and ethics Other papers in the book s opening section include an early assessment of Rawls s A Theory of Justice a radical re interpretation of Aquinas on limited government and the significance of the private public distinction and a challenging paper on virtue and the

constitution The volume then focuses on central problems in modern political communities including the achievement of justice in work and distribution the practice of punishment war and justice the public control of euthanasia and abortion and the nature of marriage and the common good There are careful and vigorous critiques of Nietzsche on morality Hart on punishment Dworkin on the enforcement of morality and on euthanasia Rawls on justice and law Thomson on the woman s right to choose Habermas on abortion Nussbaum and Koppelman on same sex relations and Dummett and Weithman on open borders The volume s previously unpublished papers include a foundational consideration of labour unions a fresh statement of a new grounding for the morality of sex a surprising reading of C S Lewis s Abolition of Man on contraception and an introduction reviewing some of the remarkable changes in private and public morality over the past half century **The**

Rough Guide to Tunisia Daniel Jacobs, Peter Morris, 2001 A comprehensive guide to North Africa s most popular destination this text features coverage of the resorts Hammamet Sousse Port el Kantaoui and their beaches with details of excursions including trips to the Star Wars film set recommendations of places to eat and stay for all budgets accounts of all the sights advice on getting around the country and background on Tunisian history culture and society wildlife and the country s passion for football National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1993

Reason, Morality, and Law John Keown DCL, Robert P. George, 2013-03-21 John Finnis is a pioneer in the development of a new yet classically grounded theory of natural law His work offers a systematic philosophy of practical reasoning and moral choosing that addresses the great questions of the rational foundations of ethical judgments the identification of moral norms human agency and the freedom of the will personal identity the common good the role and functions of law the meaning of justice and the relationship of morality and politics to religion and the life of faith The core of Finnis theory articulated in his seminal work Natural Law and Natural Rights has profoundly influenced later work in the philosophy of law and moral and political philosophy while his contributions to the ethical debates surrounding nuclear deterrence abortion euthanasia sexual morality and religious freedom have powerfully demonstrated the practical implications of his natural law theory This volume which gathers eminent moral legal and political philosophers and theologians to engage with John Finnis work offers the first sustained critical study of Finnis contribution across the range of disciplines in which rational and morally upright choosing is a central concern It includes a substantial response from Finnis himself in which he comments on each of their 27 essays and defends and develops his ideas and arguments **Medical Benefit and the Human Lottery**

Duff R. Waring, 2008-01-18 Bioethicists moral philosophers and social policy analysts have long debated about how we should decide who shall be saved with scarce lifesaving resources when not all can be saved It is often claimed that it is fairer to save younger persons and that age is an ethically relevant consideration in such tragic decisions Medical benefit should be maximized and final selection should aim to minimize the contaminating influence of chance These claims are challenged by Duff R Waring in Medical Benefit and the Human Lottery one of the few books that attempts a sustained defence of random

patient selection This book combines ethics and political philosophy in its novel and strict egalitarian approach to patient selection for transplantable organs Waring addresses the question of whether we should choose between lives on the basis of fair chances or best outcomes He argues that final selection criteria should be based on fair chances that equalize opportunity as opposed to best outcomes His defence of hardy egalitarianism aims to show that random selection by lottery can affirm both a common humanity and the equal value of lives The notion of patient selection by lottery has not fared well in bioethics and has been regarded by some as a moral affront Waring argues that a human selection lottery may be neither as crude nor as ethically anomalous as some have supposed Indeed it can reflect a familiar conception of equality as a political and moral ideal This conception abstracts from many undeniable differences between patients and claims that scarce resources should be allocated on the principled assumption that each of their lives is equally worth saving The book is also notable for its critiques of some recent utilitarian notions of medical benefit which can have an age biased impact on elderly patients Waring then argues against the leading contemporary age based approaches to patient selection He explores the way random selection by lottery can affirm his egalitarian ethos in cases where eligible transplant candidates have each passed a threshold level of prospective medical benefit that has been set by democratic deliberation Taming chance with a human lottery is defended as the most lucid means of ensuring equal opportunity In so doing Waring argues that we give the principle of equal concern and respect a radical expression above a noncomparative threshold of medical benefit each candidate can have an equal claim to life

Persons, Moral Worth, and Embryos Stephen Napier, 2011-06-21 Bioethicists have achieved consensus on two ideas pertaining to beginning of life issues 1 persons are those beings capable of higher order cognition or self consciousness and 2 it is impermissible to kill only persons As a consequence a consensus is reached regarding the permissibility of both destroying human embryos for research purposes and abortion The present collection aims to interact critically with this consensus Authors address various aspects of this orthodoxy Issues discussed include theories of personhood and in particular the role of thought experiments used in support of such theories the notion of an intrinsic potential and the moral relevance of having one new formulations of the virtue argument against abortion rights four dimensionalism and abortion the notion of moral status and who or what has it scientific accounts of what a human being is as well as addressing empirical evidence of fetal consciousness and analysis of the public policy implications given the epistemic status of pro choice arguments Given the issues discussed and that the arguments in critical focus are fairly new the collection provides a novel comprehensive and rigorous analysis of contemporary pro choice arguments

Intention and Identity John Finnis, 2011-04-07 The essays in Intention and Identity explore themes in Finnis's work touched on only lightly if at all in Natural Law and Natural Rights developing profound accounts of personal identity and existence group identity and common good and intention and choice as action and self shaping In his many faceted study of what it is to be a human person and a human community Finnis not only engages with contemporary philosophers and

bioethicists such as Peter Singer Michael Lockwood and John Harris with thinkers from other traditions such as Karol Wojtyla John Paul II and with judges in the highest courts He also offers illuminating and deeply considered readings of Shakespeare and Aquinas and debates with Roger Scruton Joseph Raz Hans Kelsen John Rawls Glanville Williams Richard Posner Ronald Dworkin and others The role of intention in the criminal law and the law of civil wrongs is searchingly explored through case law as are judicial attempts to understand conditional and preparatory intentions Moral or bioethical issues discussed include in vitro fertilization cloning abortion euthanasia and brain death patriotism multi culturalism and immigration The papers show the power of a sometimes neglected aspect of the new classical theory of natural law The volume includes previously unpublished papers on whether brain life is relevant to the beginning of a person s life on its relevance to the end of one s life and a substantial introduction in which John Finnis reflects on the changes in his thinking on personal reality and on how intention is to be analysed and understood and its moral significance appreciated

Euthanasia Examined John Keown, 2011-03-29 Whether euthanasia or assisted suicide should be legalized is one of the most pressing and profound questions facing legislators health care professionals their patients and all members of society Regrettably the debate is too often characterized by rhetoric rather than reason This book aims to inform the debate by acquainting anyone interested in this vital question with some of the major ethical legal clinical and theological issues involved The essays it contains are authoritative in that they have been commissioned from some of the world s leading experts balanced in that they reflect divergent viewpoints including a vigorous debate between two eminent philosophers and readable in that they should be readily understood by the general reader

Delve into the emotional tapestry woven by in Experience **Dependent Elderly Autonomy Justice And Quality Of Care** .
