Der Blick Vom Turm Fabeln:

Der Blick vom Turm Günther Anders, 1968 **Der Blick vom Turm** Günther Anders, 1968 *Der Blick vom Turm* Günther Anders, 1968 **Der Blick vom Turm** Günther Anders, 1989 **Fabel** Erwin Leibfried, 2017-02-18 *The Ethics of Survival in Contemporary Literature and Culture* Rudolf Freiburg, Gerd Bayer, 2021-12-14 *The Ethics of Survival in Contemporary Literature and Culture* delves into the complex problems involved in all attempts to survive. The essays analyze survival in contemporary prose narratives, short stories, poems, dramas, and theoretical texts, but also in films and other modes of cultural practices. Addressing diverse topics such as memory and forgetting in Holocaust narratives, stories of refugees and asylum seekers, and representations of war, the ethical implications involved in survival in texts and media are brought into a transnational critical discussion. The volume will be of potential interest to a wide range of critics working on ethical issues, the body, and the politics of art and literature.

AI and Common Sense Martin W. Bauer, Bernard Schiele, 2024-06-28
Common sense is the endless frontier in the development of artificial intelligence, but what exactly is common sense, can we replicate it in algorithmic form, and if we can, should we? Bauer, Schiele, and their contributors, from a range of disciplines, analyse the nature of common sense and the consequent challenges of incorporating it into artificial intelligence models. They look at different ways we might understand common sense and which of these ways are simulated within computer algorithms. These include sensory integration, self-evident truths, rhetorical commonplaces, and mutuality and intentionality of actors within a moral community. How far are these possible features within and of machines? Approaching from a range of perspectives including Sociology, Political Science, Media and Culture, Psychology, and Computer Science, the contributors lay out key questions, practical challenges, and common sense concerns underlying the incorporation of common sense within machine learning algorithms for simulating intelligence: socialising robots, self-driving vehicles, personnel selection, reading automatic text analysis, and text production. A valuable resource for students and scholars of Science, Technology, Society Studies, Sociologists, Psychologists, Media and Culture Studies, human-computer interaction, with an interest in the post-human and programmers tackling the contextual questions of machine learning.

Four Philosophers and the Bomb Alberto Castelli, Giunia Gatta, Micaela Latini, Francesco Raschi, 2025-02-11
In this book, Alberto Castelli, Giunia Gatta, Micaela Latini, and Francesco Raschi examine how four prominent intellectuals of the 20th century—Bertrand Russell, Karl Jaspers, Raymond Aron, and Günther Anders—understood atomic warfare. With a chapter devoted to the philosophical ideas of each thinker and how they understood and interpreted war, the authors analyze the historic political context in which these ideas emerged and what they proposed to avoid a nuclear disaster. *Four Philosophers and the Bomb* will be of interest to students and researchers of peace studies, international relations, political philosophy, and moral philosophy.

The Carousel of Indignation and Outrage Arist von Schlippe, 2024-07-15
Conflicts have accompanied mankind since time immemorial, and for almost as long, people have been trying to limit and deal with them, whether as those affected by them or as professionals.

with more or less success For once a system of conflict has developed once negative expectation structures and with them negative self evident truths and inherent laws have developed it becomes increasingly difficult for those involved to escape them The complexity of our social world in which it is not easy for communication to find its way remains unseen A violated sense of justice misunderstandings and unfortunate attempts to correct them alternate One begins to attribute the causes of the conflict to the person It s you It s your fault and to attribute negative motives to the conflict partner You re only doing this because who in turn does the same just like a carousel that slowly gets going A number of well studied but little known psychological processes occur within us when we are in conflict Outrage at the other person grows usually unfortunately on both sides Slowly the carousel of outrage and indignation begins to spin faster and faster until The book places the various psychological mechanisms in the context of a systemic understanding of conflict and explains ways to slow down the carousel
