Abensour, 2024-07-01 Despite his influence in utopian studies and democratic theory French philosopher Miguel Abensour 1939 2017 has yet to be fully discovered in the English speaking world as only a fraction of his work has been translated A Politics of Emancipation fills this void by translating a selection of his seminal essays into English for the first time The Reader provides a systematic overview of Abensour's work and the two inseparable projects that govern his approach to political theory on the one hand a radical critique of all forms of domination and on the other a desire to conceptualize the political as the realm of freedom and emancipation For Abensour both projects are to be undertaken together in order to avoid the double trap of an evacuation of conflict from politics and the reduction of politics to a form of domination In other words a politics of emancipation requires a ruthless critique of domination coupled with an analysis of politics as the domain within which human beings experience freedom and equality

After Kant Michael Sonenscher,2023-07-11 Tracing the origins of modern political thought through three sets of arguments over history morality and freedom In this wide ranging work Michael Sonenscher traces the origins of modern political thought and ideologies to a question raised by Immanuel Kant about what is involved in comparing individual human lives to the whole of human history How can we compare them or understand the results of the comparison Kant s question injected a new future oriented dimension into existing discussions of prevailing norms challenging their orientation toward the past This reversal made Kant s question a bridge between three successive sets of arguments between the supporters of the ancients and moderns the classics and romantics and the Romans and the Germans Sonenscher argues that the genealogy of modern political ideologies from liberalism to nationalism to communism can be connected to the resulting discussions of time history and values mainly in France but also in Germany Switzerland and Britain in the period straddling the French and Industrial revolutions What is the genuinely human content of human history Everything begins somewhere democracy with the Greeks or the idea of a res publica with the Romans but these local arrangements have become vectors of values that are apparently universal The intellectual upheaval that Sonenscher describes involved a struggle to close the gap highlighted by Kant between individual lives and human history After Kant is an examination of that struggle s enduring impact on the history and the historiography of political thought **Catalogue of Title Entries of Books and Other Articles Entered in the Office of the Register of Copyrights, Library of Congress, at Washington, D.C.** Library of Congress.
