Deregulating Telecommunications:

Deregulating Telecommunications Kevin G. Wilson, 2000 This volume critically examines the transition from monopoly to competition in the U S and Canadian telecommunications industries it looks at the history of the telephone industry its regulation and over a century of related public policy

Communications Deregulation and FCC Reform: Finishing the Job Jeffrey A. Eisenach, Randolph J. May, 2012-12-06 Communications markets have made much progress towards competition and deregulation in recent years However it is increasingly clear in the age of the Internet and the digital revolution that much more needs to be done and that new approaches both at the Federal Communications Commission and in Congress will be required to complete the task In this volume the Progress and Freedom Foundation presents nine papers by communications policy experts and government policymakers that show how to finish the job of deregulating communications markets and reforming the FCC The Telecommunications Act of 1996 was a landmark piece of legislation for an industry moving from a monopoly orientation towards competition but additional steps are needed to complete the process of implementing the pro competitive deregulatory vision of the act Bringing together a group of the caliber represented in this book makes possible the best recommendations about the exact nature of those necessary changes In this volume the most difficult and politically charged hot button issues involving local and long distance competition universal service spectrum allocation program content regulation and the public interest doctrine are confronted head on As importantly the authors recommend specific reform proposals to be considered by the Federal Communications Commission and Congress The ideas contained in the experts essays were presented and debated at a conference hosted by The Progress Freedom Foundation which was held in Washington DC on December 8 2000 The Progress Freedom Foundation studies the impact of the digital revolution and its implications for public policy It conducts research in fields such as electronic commerce telecommunications and the impact of the Internet on government society and economic growth It also studies issues such as the need to reform government regulation especially in technology intensive fields such as medical innovation energy and environmental regulation

Telecommunications Deregulation and the Information Economy James Shaw, 2001 A comprehensive economic examination of the global competitive restructuring that is now occurring as a result of the US Telecommunications Act 1996 The book guides the reader to the most effective methods of building and enhancing competitive advantage in new markets

Sorting Out Deregulation Jae Young Kim, Chae-yŏng Kim, 2002 Kim examines how the United States Germany and Japan encourage universal service and free speech on the Internet in deregulated marketplaces All three nations seek universal service through competitive marketplaces but they guarantee free expression differently hands off policies in the US top down approaches in Germany and bottom up approaches in Japan The local political social and legal atmosphere determines each nation s policies However all approaches betray unanticipated consequences that weaken their policies Public interest in the two areas cannot be realized without sacrificing the viability of

telecommunications deregulation and universal service and the maintenance of free speech require government action

Policy,1990 **Privatisation and Liberalisation in European Telecommunications** Willem Hulsink,2012-12-06 This book combines a detailed sector specific study of comparative telecommunications regimes set in the context of the EC with an extensive historical and empirical analysis of individual policy management and change as experienced by three diverse regulatory cultures namely Britain the Netherlands and France By adopting a comprehensive analytical framework based on far reaching literature the author explores a wide range of theories addressing key issues at the forefront of contemporary political and academic debate as Do nation states matter in the globalizing telecommunications industry Does the common challenge of techno global telecommunications restructuring elicit different national responses What is the significance of a single speed or multi speed Europe in implementing telecommunications governance regimes **The Liberalisation of the**

Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets Rachel Alemu,2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda s sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets Rural Telecommunications United States. Committee on Commerce, Science, and Transportation. Subcommittee on Communications,1981 *Telecommunications Competition and Deregulation Act of 1981* United States. Congress. Senate. Committee on Commerce, Science, and Transportation,1981 Shaping American Telecommunications Christopher Sterling,Phyllis W. Bernt,Martin B.H.

Weiss,2006-08-15 **Shaping American Telecommunications** examines the technical regulatory and economic forces that have shaped the development of American telecommunications services This volume is both an introduction to the basic technical economic and regulatory principles underlying telecommunications and a detailed account of major events that have marked development of the sector in the United States Beginning with the introduction of the telegraph and continuing through to current developments in wireless and online services authors Christopher H Sterling Phyllis W Bernt and Martin B H Weiss explain each stage of telecommunications development examining the interplay among technical innovation policy decisions and regulatory developments Offering an integrated treatment of the interplay among technology policy and economics as key factors defining the development of the telecommunications sector in the United States this volume also provides background material to facilitate understanding of each sector contexts for many so called new issues problems and trends demonstrating origins from years or decades in the past and careful annotation documentation and reference tables to enable further research on the topics discussed This unique multidisciplinary approach provides a balanced view of U S telecommunications history in context with relevant economic legal social and technical analyses As such it is essential reading for advanced students in telecommunications needing to understand how the telecommunications industry and service developed to its current form The volume will also serve as a supplemental text in courses on telecommunications regulation and it will be of value to professionals in the field seeking context and background for their daily work

International Telecommunications Deregulation Act of 1982 United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Communications,1982 **Deregulation and Interdependence in the Asia-Pacific Region** Takatoshi Ito,Anne O. Krueger,2007-12-01 Recently real and artificial barriers to international transactions have fallen sharply causing a rise in the overall volume of international trade East Asia has been particularly affected by the economic stresses and gains derived from deregulation Deregulation and Interdependence in the Asia Pacific Region explores the broadly similar experiences of certain economies in the region China Hong Kong Japan Korea in dealing with the potentially volatile process of deregulation and examines the East Asian response to a rapidly transforming economic environment Controlling Market Power in Telecommunications Damien Geradin,Michel Kerf,2003 Controlling market power is a crucial issue in liberalised telecommunications markets By comparatively analysing five countries this book explores how the regulatory framework should be designed **Competition and Deregulation in Telecommunications** Thomas James Duesterberg,Kenneth Gordon,1997 According to this book the anticipated benefits of the Telecommunications Act of 1996 are proving elusive as competition has been slow to rise and government agencies have been slow to implement the deregulation and market opening processes specified in the new law The authors argue that the pace of innovation and the telecom industry s demonstrated capacity to restructure itself efficiently show that the benefits of competition far outweigh the costs of trying to micromanage the industry through regulation **The Worldwide History of**
