Derrida And Différance:

Derrida and Différance David Wood, Robert Bernasconi, 1988 A Society of the Friends of Difference would have to include Heraclitus Nietzsche Saussure Freud Adorno Heidegger Levinas Deleuze and Lyotard among its most prominent members It is tempting to think of these figures as constituting a distinct philosophical tradition one which would emphasize dissonance separation disparity plurality distinction change over against those who would continue the search for unity identity presence permanence foundations structures and essences *Writing and Difference* Jacques Derrida, 2011-01-27 First published in 1967 *Writing and Difference* a collection of Jacques Derrida's essays written between 1959 and 1966 has become a landmark of contemporary French thought In it we find Derrida at work on his systematic deconstruction of Western metaphysics The book's first half which includes the celebrated essay on Descartes and Foucault shows the development of Derrida's method of deconstruction In these essays Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought one of his main targets being the way in which structuralism unwittingly repeats metaphysical concepts in its use of linguistic models The second half of the book contains some of Derrida's most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language finally showing metaphysics to be constituted by this exclusion These essays on Artaud Freud Bataille Hegel and Lévi Strauss have served as introductions to Derrida's notions of writing and difference the untranslatable formulation of a nonmetaphysical concept that does not exclude writing for almost a generation of students of literature philosophy and psychoanalysis *Writing and Difference* reveals the unacknowledged program that makes thought itself possible In analyzing the contradictions inherent in this program Derrida goes on to develop new ways of thinking reading and writing new ways based on the most complete and rigorous understanding of the old ways Scholars and students from all disciplines will find *Writing and Difference* an excellent introduction to perhaps the most challenging of contemporary French thinkers challenging because Derrida questions thought as we know it *Derrida and Différance* David Wood, Robert Bernasconi, 1988 **Adorno's Nonidentical and Derrida's Différance - For a Resurrection of Negative Dialectics** Stefan Zenklusen, 2020-11-06 The virulent anti Hegelianism of French poststructuralism and its difficult confrontation with Jürgen Habermas has long obscured the closeness of Jacques Derrida's difference to Theodor W Adorno's Nonidentical Taking the overarching theme of identity and difference as a guide we can peel apart what unites and separates these two thinkers In so doing certain de-realizing effects of Derrida's entrapment in signs reveal themselves By contrast Adorno's social and cultural diagnosis when extrapolated to a post Fordian context is astonishingly fruitful Attempts to trivialize negative dialectics as a model of intellectual self understanding from a past age or as an esthetic reserve of ways of life are untenable *Derrida & Différance* David Wood, Robert Bernasconi, 1985 *Deleuze and Derrida* Vernon W. Cisney, 2018-11-27 Examines independent documentary film production in India within a political context *Derrida and the Economy of Différance* Irene E. Harvey, 1986 **Key**

Issues In Critical And Cultural Theory McGowan, Kate, 2007-04-01 The book explores the often complex paradigms of critical thinking and discusses the possibilities of engaging and critiquing the cultural values that relate to our present

Subjective Agency and Poststructuralism Cillian Ó Fathaigh, Gavin Rae, 2024-12-02 Poststructuralism has long been acknowledged to offer a radical critique of the foundational subject as a precursor to affirming a constituted subject Its detractors have however held that the resultant position cannot offer a coherent account of agency strong version or alternatively that while it may be able to account for non subjective agency it is unable to develop a coherent explanation for subjective agency weak version Somewhat strangely this issue has been largely ignored by commentators predisposed to poststructuralist thought In contrast this volume focuses on the works of Judith Butler Cornelius Castoriadis Gilles Deleuze Jacques Derrida Michel Foucault Luce Irigaray Jacques Lacan and Catherine Malabou to show that the question of the subject is a key one for many poststructuralist thinkers that they are aware of the problematic status of agency that arises from their decentering of the foundational subject and that they offer heterogeneous responses to it Subjective Agency and Poststructuralism will therefore be an invaluable resource for researchers and advanced students interested in philosophy political theory psychoanalysis critical theory history of ideas feminist theory and cultural studies **Margins of**

Philosophy Jacques Derrida, 1982 In this densely imbricated volume Derrida pursues his devoted relentless dismantling of the philosophical tradition the tradition of Plato Kant Hegel Nietzsche Husserl Heidegger each dealt with in one or more of the essays There are essays too on linguistics Saussure Benveniste Austin and on the nature of metaphor White Mythology the latter with important implications for literary theory Derrida is fully in control of a dazzling stylistic register in this book a source of true illumination for those prepared to follow his arduous path Bass is a superb translator and annotator His notes on the multilingual allusions and puns are a great service Alexander Gelley Library Journal **Process and Difference**

Professor of Constructive Theology Catherine Keller, Catherine Keller, Anne Daniell, 2002-05-09 Leading scholars explore the relationship between deconstructive theory and process thought *European Theories in Former Yugoslavia* Zarko Cvejić, Andrija Filipović, Miško Šuvaković, 2015-09-18 *European Theories in Former Yugoslavia* shows that there is no such thing as a direct transfer or influence of theories from the centre to the margins but only complex practices of borrowing translating and reinterpreting conditioned by specific contexts in this case those of former Yugoslavia and its contemporary cultural sphere Here reception is no longer simply about receiving fresh knowledge from the centre but also about communicating feedback into broader contexts shaped by multicultural and global connections and exchange The book poses broader questions about contemporary theory today what are theories today How do specialised theories of culture gender media and art history relate to current philosophical turns in new materialism neo Marxism and biopolitics These questions posed from the perspective of a European periphery in this case former Yugoslavia gesture toward the dialectically tense relationship between the centre and the margins that is between original theories and their transformed perspectives The

range of authors brought together here offers a cross section of post Yugoslav theory comprising both young scholars in the early stages of their academic careers and more senior established thinkers educated both in the region and abroad and coming from a variety of academic backgrounds including art theory gender theory cultural studies and theory sociology anthropology theatre studies musicology political theory and literary theory among others The schools of thought they address elaborate on critique and apply in their texts are similarly varied from French post structuralist theory and philosophy via German critical and postmodern theory to a number of other topics and authors in contemporary European theory and philosophy The book will be of interest to students and scholars of art and media theory philosophy sociology and cultural studies and their reception interpretation application and elaboration in the region of former Yugoslavia Plato, Derrida, and Writing Jasper P. Neel, 1988-04-04 Winner Mina P Shaughnessy Prize Achieving the remarkable feat of linking composition theory deconstruction and classical rhetoric this book has been admirably summarized by the theorist G Douglas Atkins who writes This lively and engaging informed and informative book constitutes an important contribution Though its field is most obviously composition composition theory and pedagogy part of its importance derives from the way it transcends disciplinary boundaries to bear on writing in general I know of no book that so fully and well discusses and evaluates the implications of deconstruction for composition and pedagogy That it goes beyond deconstruction rather than merely applying it increases its importance and signals a clear contribution to the understanding of writing Jasper Neel analyzes the emerging field of composition studies within the epistemological and ontological debate over writing precipitated by Plato who would have us abandon writing entirely and continued by Derrida who argues that all human beings are written This book offers a three part exploration of that debate In the first part a deconstructive reading of Plato's Phaedrus Neel shows the elaborate sleight of hand that Plato must employ as he uses writing to engage in a semblance of spoken dialogue The second part describes Derrida's theory of writing and presents his famous argument that the history of truth of the truth of truth has always been the debasement of writing and its repression outside full speech A lexicon of nine Derridean terms the key to his theory of writing is also included At the end of this section Neel turns deconstruction against itself demonstrating that Derridean analysis collapses of its own weight The concluding section of the book juxtaposes the implications of Platonic and Derridean views of writing warning that Derrida's approach may lock writing inside philosophy The conclusion suggests that writing may be liberated from philosophical judgment by turning to Derrida's predecessors the sophists particularly Protagoras and Gorgias Drawing on Protagoras's idea of strong discourse Neel shows that sophistry is the foundation of democracy Strong discourse is public discourse which though based on probability and not truth remains persuasive over a long period of time to a great number of people This publicly tested discourse exists only among competitors never alone but its ability to remain persuasive even when surrounded by other discourses enables the ideas of democracy to emerge and then keeps democracy alive Carl Schmitt Between Technological Rationality and Theology

Hugo Herrera,2020-06-01 Carl Schmitt one of the most influential legal and political thinkers of the twentieth century is known chiefly for his work on international law sovereignty and his doctrine of political exception This book argues that greater prominence should be given to his early work in legal studies Schmitt himself repeatedly identified as a jurist and Hugo E Herrera demonstrates how for Schmitt law plays a key role as an intermediary between ideal conceptual theory and the complexity of practical concrete situations Law is concerned precisely with balancing the extremes of theory and reality and in this respect Schmitt associates it with philosophical thinking broadly as being able to understand and explain the tensions in human experience Reviewing and analyzing prevailing interpretations of Schmitt by Jacques Derrida Heinrich Meier and others Herrera argues that the importance of Schmitt's legal framework is both significant and overlooked

Derrida and Indian Philosophy Harold G. Coward,1990-01-01 This book establishes a constructive and mutually stimulating dialogue between Jacques Derrida and Eastern thought Surprising parallels are found with some traditional Indian philosophies of language especially with the Hindu philosopher Bhartrhari and with the Chinese Taoists Conversely the views of SAankara and Nagarjuna on language definitely differ from those of Derrida Derrida and Indian Philosophy builds a bridge by which traditional Eastern views on language can engage the latest in modern Western thought It also shows that our understanding of Derrida can be enhanced when his thought is approached from an Eastern perspective on language

A Critical and Cultural Theory Reader Antony Easthope,Kate McGowan,2004-01-01 When first published in 1992 The Critical and Cultural Theory Reader served the growing need for essays and extracts for the study of culture Now the second and expanded edition of this highly successful reader reflects the growing diversity of the field and includes thirteen new essays

Deconstruction as Analytic Philosophy Samuel C. Wheeler,2000 These twelve essays treat the thought of deconstructive philosophers from the perspective of analytic philosophy and relate the works of such thinkers as Davidson Quine and Wittgenstein to the writings of Derrida and de Man

Intersections Tilottama Rajan,David L. Clark,1995-01-01 This is a study of the relationship between postmodernism and post enlightenment German thought reading the contemporary theoretical scene through its nineteenth century counterpart and examining the intersections
