the history of ideas in modern times was the complete demolition during the late seventeenth and eighteenth centuries in the wake of the Scientific Revolution of traditional structures of authority scientific thought and belief by the new philosophy and the philosophes culminating in Voltaire Diderot and Rousseau In this revolutionary process which effectively overthrew all justification for monarchy aristocracy and ecclesiastical power as well as man's dominance over woman theological dominance of education and slavery substituting the modern principles of equality democracy and universality the Radical Enlightenment played a crucially important part Despite the present day interest in the revolutions of the late eighteenth century the origins and rise of the Radical Enlightenment have been astonishingly little studied doubtless largely because of its very wide international sweep and the obvious difficulty of fitting in into the restrictive conventions of national history which until recently tended to dominate all historiography The greatest obstacle to the Radical Enlightenment finding its proper place in modern historical writing is simply that it was not French British German Italian Jewish or Dutch but all of these at the same time In this novel interpretation of the Radical Enlightenment down to La Mettrie and Diderot two of its key exponents particular stress is placed on the pivotal role of Spinoza and the widespread underground international philosophical movement known before 1750 as Spinozism Vollständiges Biblisches Wörterbuch, oder Real- und Verbal-Concordanz, darin alle in der ganzen Heil.
