New Masculinities in Contemporary German Literature Frauke Matthes, 2023-05-13 The complex nexus between masculinity and national identity has long troubled but also fascinated the German cultural imagination This has become apparent again since the fall of the Iron Curtain and the turn of the millennium when transnational developments have noticeably shaped Germany's self perception as a nation This book examines the social and political impact of transnationalism with reference to current discourses of masculinity in novels by five contemporary male German language authors Specifically it analyses how conceptions of the masculine interact with those of nationality ethnicity and otherness in the selected texts and assesses the new masculinities that result from those interactions Exploring how local discourses of masculinity become part of transnational contexts in contemporary writing the book moves a consideration of masculinities from a native into a transnational sphere Everyday Life as Alternative Space in Exile Writing Andrea Hammel, 2008 This

book is the first comparative study of the novels written by five German speaking women Anna Gmeyner Selma Kahn Hilde Spiel Martina Wied and Hermynia Zur Mühlen who had to flee National Socialist Central Europe Gmeyner Spiel Wied and Zur Mühlen found refuge in Britain and thus added together with male colleagues such as Stefan Zweig and Robert Neumann an important but rarely investigated new dimension to the British literary landscape The aim of this study is to reassess the

women refugee writers narrative strategies and integrate their work within feminist literary studies The author investigates the ve writers narrativisation of everyday life used to subvert the dominant discourse and their portrayal of the intersection between class racial and gender oppression She also shows their innovative ways of picturing the gendered tension between the experiences of exile and exile as a modernist metaphor as well as their search for ways to refute the Nationalist Socialist rewriting of history The book situates the novels within the theoretical discussions surrounding exile studies social history and women s writing Decadence and Orientalism in England and Germany, 1880-1920 Katharina

Herold-Zanker,2024-04-05 Decadence and Orientalism in England and Germany 1880 1920 examines the Orientalist portrayal of Middle Eastern cultures in Decadent Literatures in England and Germany at the turn of the century This book argues that the role of Orientalism in literary Decadence uniquely exposes its paradoxical engagement with other cultures In bringing together two fin de si cle European literatures this comparative study makes a case for the transnational if not imperial nature of Decadence The East emerges as an indispensable mediator between various versions of European Decadence The book examines the role of the East with specific reference to selected English and German authors starting from Oscar Wilde s Victorian vision of Egypt and Arthur Symons s and Violet Fane s image of Constantinople it moves to Paul Scheerbart s and Else Lasker Sch ler s Decadent Babylon and Assyria and concludes by turning to Stefan George s exclusion of the East from his poetic practice The geographical reach of the East focuses on regions of the Eastern Mediterranean and Northern Africa The cultural translation of specifically the Middle East into different European national contexts gains new sometimes oppositional meanings avoiding a one sided representation of both the East and the two national literatures that absorbed it In arguing for a Decadent cosmopolitanism as a model of heterogeneous inclusivity that reaches beyond the binaries established by Edward Said s Orientalism the present book brings twenty first century theories of cosmopolitanism into dialogue with art history and literature to uncover striking synergies and interdependences between the different manifestations of Decadence in England and Germany **The Inequality of Pay** Henry Phelps Brown,1977 This book

examines late nineteenth and early twentieth century literature written in England and Germany exploring the relationship between Orientalism Decadence and cosmopolitanism arguing that representations of the East played a critical role in the literary landscape of Decadence over this period **Der blaue Reiter präsentiert Eurer Hoheit sein blaues Pferd** Franz Marc,Else Lasker-Schüler,Peter-Klaus Schuster,Staatsgalerie Moderner Kunst,1987 An international overview of the state of our contemporary knowledge in sociocultural psychology as a discipline located at the crossroads between the natural and social sciences and the humanities Since the 1980s the field of psychology has encountered the growth of a new discipline cultural psychology that has built new connections between psychology sociology anthropology history and semiotics The handbook integrates contributions of sociocultural specialists from fifteen countries all tied together by the unifying focus on the role of sign systems in human relations with the environment It emphasizes theoretical and methodological discussions

on the cultural nature of human psychological phenomena moving on to show how meaning is a natural feature of action and how it eventually produces conventional symbols for communication Such symbols shape individual experiences and create the conditions for consciousness and the self to emerge turn social norms into ethics and set history into motion

Rome and Byzantium in the Visigothic Kingdom Damián Fernández, Molly Lester, Jamie Wood, 2025-10-01 This volume interrogates the assumption that Visigothic practices and institutions were mere imitations of the Byzantine empire Contributors rethink these practices not as uncritical and derivative adoptions of Byzantine customs but as dynamic processes in dialogue with not only the Byzantine empire but also with the contemporary Iberian context as well as the Roman past The goal of the volume is to approach Visigothic customs not as an uncritical adoption and imitatio of contemporary Roman models an acculturation model but as unique interpretations of a common pool of symbols practices and institutions that formed the legacy of Rome The contributors argue that it is necessary to reconsider the idea of imitatio imperii as a process that involved specific actors taking strategic decisions in historically contingent circumstances
