A History of Performing Pitch Bruce Haynes, 2002-11-06 This is the first complete survey of the historical pitch standards used by musicians during the last four centuries Written from a practical perspective and addressed to performers it is the first book to attach frequency values to pitch names and describe where when and why various historical pitch levels were used It surveys a period from the 16th century to the present and focuses on Italy France Germany the northern and southern Netherlands and the Habsburg Lands following the developments in the design and function of instruments and how they influenced and were influenced by pitch changes The History of Performing Pitch explores the relationships between pitches like Chorton Cammerton and Consort Pitch and what pitch frequencies they represented at various times and places It also examines what effect pitch differences had on musical notation and choice of key and discusses practical considerations musicians would have had to make when transposing especially with regards to the range of singers voices What distinguishes this book from previous pitch studies is that it has been written since the rise of the early music revival within the context of the growing understanding of how early instruments work This development has provided a new source of empirical information not previously available which allows this book to base its conclusions on a much larger and more relevant sample than has ever been possible before It refers to the original pitches of some 1 382 historical instruments including cornetts Renaissance flutes traversos recorders clarinets organs pitchpipes and automatic instruments from all over Europe and compares this information with music and written texts While this study avoids categorical answers where historical information is not yet sufficient to justify them it locates a number of historical pitch levels discovers several that were previously unnoticed and disproves several common myths about pitch

und Musik der Engel Ernst Koch, 2021-04-01 Luthertum und Musik das ist seit dem 16. Jahrhundert eine Grundsignatur von Kirche und Kultur. Im Gefolge der Reformation entwickelte sich eine reichhaltige und vielfältige lutherische Musikkultur. Heinrich Schütz und Johann Sebastian Bach haben sie in ihren Zeiten und bis in die Gegenwart besonders kräftig bestimmt. Die Aufsätze dieses Bandes handeln von den theologischen und frommigkeitsgeschichtlichen Kontexten ihrer Werke, sprechen ihren Entstehungsbedingungen nach und fragen nach dem Zusammenhang von Irdischem und Himmlischem. Eine Laudatio und eine Bibliographie der Schriften von Ernst Koch erschließen das reichhaltige Werk eines Kirchenhistorikers, dem es immer auch um den Zusammenhang von Musik und Theologie zu tun war und ist. *Music of Humans and Music of Angels: Contributions to Lutheran Music Culture in the History of Piety*. Lutheranism and music: this has been a basic signature of church and culture since the 16th century. In the wake of the Reformation, a rich and diverse Lutheran musical culture developed. Heinrich Schütz and Johann Sebastian Bach have had a particularly strong influence on it in their times and up to the present day. The essays in this volume deal with the theological and piety historical contexts of their works, trace the conditions under which they were written and ask about the connection between the earthly and the heavenly. A laudation and a bibliography of the writings of Ernst Koch open up the rich work of a church historian who has always been and still is concerned with the connection between music and theology. **Early Keyboard Studies Newsletter**, 1993
