Deregulation In The European Union:

Deregulation in the European Union Ute Collier, 1998 This volume has its roots in a workshop on Deregulation and the Environment organised by the Working Group on Environmental Studies WGES of the European University Institute in Florence in May 1996 P x **The Liberalization of Postal Services in the European Union** Damien Geradin, 2002-06-03 Among the critical matters discussed are the following terminal dues for international mail remail provisions the UPU and WTO constraints on the European postal market EU Commission decisions and ECJ case law interpreting the postal directive the effects of EC Treaty Articles 81 and 82 and the Merger Control Regulation abuse of market power especially by incumbent public postal operators the essential facilities doctrine and funding of universal service obligations In addition there are specific country reports from five EU Member States France Germany Italy Portugal and the United Kingdom and Norway bearing witness to the diversity of means adopted to implement the postal directive Business persons and their counsel regulatory officials practitioners and academics interested in the creation of an EU wide postal market as well as in the ongoing reliability and improvement of postal service should find this text valuable The European Union and National Industrial Policy Hussein Kassim, Anand Menon, 2002-09-11 Although the implications of EU membership have been the subject of intense political debate and academic enquiry throughout the member states the actual impact of EU action on those states remains under researched The lack of empirical investigation has meant that it has not been possible to arrive at any informed judgement about how the EU has affected traditional policy making in the member states or to evaluate competing claims The European Union and National Industrial Policy investigates the extent to which action at the EU level in a range of industrial financial and service sectors has affected the substance of national policy and the behaviour of and relationships between national actors It looks at the policies pursued by the four larger member states in these areas discussing the initiatives launched by the EU and assessing the Union's impact on national policy compared with other internal and external factors The European Union and National Industrial Policy offers a unique investigation of the relationship between the Union and member states that is empirically based and theoretically reflective In an attempt to overcome the boundaries that have traditionally separated international relations political science public policy and other social sciences it uses insights from a number of perspectives to assess the impact of the EU on the ability of member states to choose and implement their goals International Deregulation and Privatization Christian Campbell, 2021-10-01 Issues vital to private investors from competition law to tax aspects are surveyed here by accountants and lawyers from throughout the EU The text shows the extent to which deregulation or liberalization of industrial sectors in the member states of the European Union EU has impacted beyond the economies and financial markets of Europe As more sectors of the European economy open to private participants the effect on the aviation rail insurance telecommunications and utilities sectors as this insightful text shows will continue to intensify dramatically Published under the Transnational Publishers imprint The
