What Do Philosophers of Education Do? Claudia Ruitenberg, 2010-05-18

This volume of essays demonstrates and comments on philosophical methods in educational research. Offers a clear picture of what philosophers do when they study education. Brings together a series of essays from an international cast of contributors from Canada, UK, Finland, and Cyprus. Examines a range of new and established philosophical methods which can be used in educational research. Demonstrates how philosophy of education can be understood methodologically. Draws from both Continental and Analytical traditions. Fills a gap in the research methods literature in education and the social sciences.

Education and the Political Tomasz Szukdlarek, 2013-11-19 The essays in this collection address the relation between education and politics in new ways. Rather than understanding education simply as the object of political decision making or as preparation for politics, the authors of this volume see education as implicated in social conflicts and in the political processes that produce and change social structures. Education then is a practice that reconfigures the relations between subjectivities and the political. The collection focuses on several critical cases and theoretical debates where the relation between education and politics demands new articulations. It explores the potential of theoretical languages proposed by Rancière, Laclau, Derrida, Mouffe, Bakhtin, and other thinkers whose work has not yet been fully recognized in its pedagogical meaning.

International Handbook of Philosophy of Education Paul Smeyers, 2018-06-09 This handbook presents a comprehensive introduction to the core areas of philosophy of education combined with an up to date selection of the central themes. It includes 95 newly commissioned articles that focus on and advance key arguments; each essay incorporates essential background material serving to clarify the history and logic of the relevant topic; examining the status quo of the discipline with respect to the topic and discussing the possible futures of the field. The book provides a state of the art overview of philosophy of education covering a range of topics. Voices from the present and the past deals with 36 major figures that philosophers of education rely on. Schools of thought addresses 14 stances including Eastern, Indigenous, and African philosophies of education as well as religiously inspired philosophies of education such as Jewish and Islamic. Revisiting enduring educational debates scrutinizes 25 issues heavily debated in the past and the present, for example, care and justice, democracy, and the curriculum. New areas and developments addresses 17 emerging issues that have garnered considerable attention, like neuroscience, videogames, and radicalization. The collection is relevant for lecturers teaching undergraduate and graduate courses in philosophy of education as well as for colleagues in teacher training. Moreover, it helps junior researchers in philosophy of education to situate the problems they are addressing within the wider field of philosophy of education and offers a valuable update for experienced scholars dealing with issues in the sub-discipline. Combined with different conceptions of the purpose of philosophy, it discusses various aspects using diverse perspectives to do so.

J. Biesta,2015-11-17 This is a book about what many teachers know but are increasingly being prevented from talking about that real education always involves a risk The risk is there because as W B Yeats has put it education is not about filling a bucket but about lighting a fire It is there because students are not to be seen as objects to be moulded and disciplined but as subjects of action and responsibility The Beautiful Risk of Education is organised around a critical discussion of seven key educational concepts creativity communication teaching learning emancipation democracy and virtuosity By opposing the risk aversion that characterises many contemporary educational policies and practices Gert J J Biesta makes a strong argument for giving risk a central place in our educational endeavours and brings risk taking to the forefront of a critical pedagogical practice
