Wang,2018-02-01 Strategic leadership is broadly defined as utilizing particular approaches in the management of employees The main objective is productivity It provides the vision and direction for the long term growth and success of an organization It requires objectivity and potential to look at the broader picture It is leaders responsibility to incorporate aspects of both the analytical and human dimensions to effectively drive the organizations forward As an academic subject it is taught in both education and business Leaders and mangers have turned to strategic leadership to inspire and guide their visions and to formulate the directions so essential for the long term growth and success of an organization or a country Leaders need the skills and tools for strategy formulation and implementation in order to deal with change in our society Managing change and ambiguity requires strategic leaders who not only provide a sense of direction but who can also build ownership and alignment within their workgroups to implement change The goal of strategic leadership is to drive innovation and maximize team performance to enhance organizations long term growth and success in today s complex world of fastpaced dramatic change Research on strategic leadership has been going on for decades Textbooks on this subject are

readily available. If we look deeper we realize the vast majority of these books were written from a practitioner's perspective. In other words, these books were not based on empirical research. Naturally, these existing books have failed to better serve the needs of today's graduate students who should be equipped with empirical research on such an academic subject. This book will investigate emergent administrative techniques and business practices being used within educational establishments and corporate worlds. It will highlight empirical research and best practices within strategic leadership.

The roles of leader and manager tug us in opposite directions: managers seek stability and predictability and leaders usually opt for turbulence and change. With so many companies asking their best employees to be both leaders and managers, it's no wonder that so much of the business world is dysfunctional. This guidebook explains how leader-managers work and how to succeed in both roles. You can learn how to leverage competing requirements for leading and managing change, formulate effective operational and developmental strategies, make decisions that address complex challenges and opportunities, and help people through the anxiety and trauma of change. Whether you are a student seeking to understand the workplace, an employee rising up the ranks, or an active leader or manager, *Strategic Leadership and Strategic Management* provides you with tools and knowledge to help your organization succeed.

Artist Management in the Music Industries Yiyi Wang, 2024-11-19. *Artist Management in the Music Industries: A Sui Generis Form of Management* provides one of the first substantive academic examinations of the role of an artist manager. This book deconstructs the nature of Artist Management, unveiling the pivotal role of the artist manager in creating and sustaining a dynamic environment referred to as the Loop, where success is realised by navigating four variables: Risks, Relationships, Emotions, and Expectations (2Rs and 2Es) within and beyond the Loop. This book offers a new perspective on Artist Management as a sui generis discipline that does not fit easily inside standard conceptions of management. Featuring ethnography and interviews, this book sheds light on the real-world challenges and successes in the field. It is a must-read for researchers, students, and practitioners in the music business, music marketing, and artist management, offering invaluable insights into the practices that shape the cultural landscape.
