The Future of Post-human Space-time Peter Baofu,2006 Contrary to the conventional wisdom held by many in much of human history in this book Peter Baofu here proposes what he calls the perspectival theory of space time According to this theory there are multiple perspectives of space and time in society culture the mind and nature all of which are subject to the regression progression principle in existential dialectics These perspectives exist in society culture the mind and nature with good reasons being subject to the symmetry asymmetry principle in existential dialectics and with some being more successful and hegemonic dominant than others Furthermore and more importantly in the long haul space and time as humans have known them will end and will eventually be altered by post humans in different forms be they here in this universe or in multiverses subject to the change constancy principle in existential dialectics **The Elusive Synthesis:**

Aesthetics and Science A.I. Tauber,2012-12-06 The tension between art and science may be traced back to the Greeks What became natural philosophy and later science has traditionally been posed as a fundamental alternative to poetry and art It is a theme that has commanded central attention in Western thought as it captures the ancient conflict of Apollo and Dionysus over what deserves to order our thought and serve as the aspiration of our cultural efforts The modern schism between art and science was again clearly articulated in the Romantic period and seemingly grew to a crescendo fifty years ago as a result of the debate concerning atomic power The discussion has not abated in the physical sciences and in fact has dramatically expanded most prominently into the domains of ecology and medicine Issues concerning the role of science in modern society although heavily political must be regarded at heart as deeply embedded in our cultural values Although each generation addresses them anew the philosophical problems which lay at the foundation of these fundamental concerns always appear fresh and difficult This anthology of original essays considers how science might have a greater commonality with art than was perhaps realized in a more positivist era The contributors are concerned with how the aesthetic participates in science both as a factor in constructing theory and influencing practice The collection is thus no less than a spectrum of how Beauty and Science might be regarded through the same prism **Jungian Arts-Based Research and**

"The Nuclear Enchantment of New Mexico" Susan Rowland,Joel Weishaus,2020-07-26 Jungian Arts Based Research and

The Nuclear Enchantment of New Mexico provides clear accessible and in depth guidance both for arts based researchers using Jung s ideas and for Jungian scholars undertaking arts based research The book provides a central extended example which applies the techniques described to the full text of Joel Weishaus prose poem The Nuclear Enchantment of New Mexico published here for the first time Designed as a how to book Jungian Arts Based Research and The Nuclear Enchantment of New Mexico explores how Jung contributes to the new arts based paradigm in psychic functions such as intuition by providing an epistemology of symbols that includes the unconscious and research strategies such as active imagination Rowland examines Jung s The Red Book as an early example of Jungian arts based research and demonstrates how this practice challenges the convention of the detached researcher by providing holistic knowing Arts based researchers will find here a psychic dimension that also manifests in transdisciplinarity while those familiar with Jung s work will find in arts based research ways to foster diversity for a decolonized academy This unique project will be essential reading for Jungian and post Jungian academics and scholars arts based researchers of all backgrounds and readers interested in transdisciplinarity

The Golden Avant-garde Raphael Sassower, Louis Cicotello, 2000 A philosopher and an artist place the phenomenon of avant garde in different perspectives They wonder how avant garde artists navigate the cultural financial and technological challenges in past and present They draw the conclusion that artists have become adept at manipulating the same forces that they seek to exaggerate and articulate in their work

Arts Maria Burguete, Lui Lam, 2011 This book treats arts as part of science from the unified perspective of Science Matters It contains 17 chapters with 18 contributors who are prominent humanists professional artists or scientists It consists of three parts Part I Philosophy and History of Arts Part II Arts in Action Part III Understanding Arts The book is aimed at both research scholars and lay people and is unique in two important aspects It is probably the first and only book that academic professionals and practicing artists contribute to the same book as equals on the common theme of creating and understanding arts Artists here include Cristina Leiria whose huge Kun Iam Goddess of Mercy sculpture is an important landmark in Macau and the famous movie director Hark Tsui who is publishing his first ever article on movie making Perhaps more importantly a new understanding of the origin and nature of art is offered for the first time which is more convincing than all the other hypotheses put forth in the last two thousand years

The Secret Dowry of Eve Glynda-Lee Hoffmann, 2003-04-28 A groundbreaking study of the connection between spirituality psychology and neurophysiology that is coded into the book of Genesis Reveals why Eve was allowed to eat the apple of knowledge forbidden to Adam Uses mythological imagery to reveal the working processes of awareness in the human brain Combines ancient Qabalic techniques and modern scientific brain research to show how Genesis is an operating manual for creating wholeness in the psyche Adam exists within all our psyches as does Eve While Adam represents the masculine component of consciousness pure intellect Eve represents the functions of the brain s frontal lobes the feminine intuitive integrator of the four level human brain If we wish to be whole we must develop and integrate the feminine with the

masculine Using her lifelong study of the Qabalah and the secret meanings of the Hebrew alphabet Glynda Lee Hoffmann shows how the Garden of Eden story is actually an instruction manual that explains transcendence as a biological imperative Hoffmann reveals why it was permissible for Eve to eat the apple of knowledge that was forbidden to Adam Eve's desire for integration clarity and transcendence for wisdom is a goal Adam is biologically incapable of pursuing without her Though written as mythology Genesis contains remarkable scientific and psychological correlations that can help an individual integrate the masculine and feminine sides of the psyche and thereby translate potential into actuality **Fractal**

Architecture James Harris, 2012-06-16 Throughout history nature has served as an inspiration for architecture and designers have tried to incorporate the harmonies and patterns of nature into architectural form Alberti Charles Renee Macintosh Frank Lloyd Wright and Le Corbusier are just a few of the well known figures who have taken this approach and written on this theme With the development of fractal geometry the study of intricate and interesting self similar mathematical patterns in the last part of the twentieth century the quest to replicate nature's creative code took a stunning new turn Using computers it is now possible to model and create the organic self similar forms of nature in a way never previously realized In *Fractal Architecture* architect James Harris presents a definitive lavishly illustrated guide that explains both the how and why of incorporating fractal geometry into architectural design *Spontaneous Painting* Susan Bello Ph.
