Armchair Of The Garden:

The Armchair Book of the Garden D. G. Hessayon,1986

Armchair Book of Gardens Jane Billingham,2011-04-01

The Armchair Book of Gardens is a collection of individual essays focused on understanding gardens in a different light perspective The book concentrates on the emotional social spiritual and political aspects of the garden Generative Grammar in Europe F. Kiefer,N. Ruwet,2012-12-06 The present volume is intended to give an overall picture of research in progress in the field of generative grammar in various parts of Europe The term generative grammar must however be understood here rather broadly What seemed to be an easily definable technical term several years ago is becoming more and more vague and imprecise Research in generative grammar is carried on according to rather diversified methodological principles and being a generative grammarian is often more a matter of confession than any adherence to the common line of methodology which can be traced back to the conception of grammatical description initiated by Noam Chomsky The direct or indirect influence of this conception is however clearly recognizable in most of the papers of this volume The most difficult thing was naturally enough to select appropriate papers in the realm of semantics Apart from the special trend in generative grammar referred to as generative semantics though here too we might ponder on what generative really means the term generative is hardly employed in semantics The search for semantic primes the application of the methods of mathematical logic the inquiry into the intricate relationships between syntax and semantics and the utilization of syntactic information in semantics are perhaps the most characteristic traits of contemporary semantics All of this of course is at no variance with the principles of generative grammar on the contrary most of it has been made possible through the achievements of generative grammar **The Seventy-Five Folios and Other Unpublished Manuscripts** Marcel

Proust,2023-04-25 The Seventy Five Folios and Other Unpublished Manuscripts contain early versions of six episodes later included in Marcel Proust's In Search of Lost Time Discovered in 2018 and presented here for the first time in English the folios reveal the autobiographical extent of Proust's work and the sacred moment when his genius blossomed Ethiopian Jewish Immigrants in Israel Tanya Schwarz,2016-03-23 This is an ethnographic study of Ethiopian Jews or Beta Israel a few years after their migration from rural Ethiopia to urban Israel For the Beta Israel the most significant issue is not as is commonly assumed adaptation to modern society but rather belonging in their new homeland and the loss of control they are experiencing over their lives and those of their children Ethiopian Jewish immigrants resist those aspects of the dominant society which they dislike they reject normative Jewish practices and uphold Beta Israel religious and cultural ones ideologically counteract disparaging Israeli attitudes develop strong ethnic bonds and engage in overt forms of resistance The difficulties of the present are also overcome by creating a perfect past and an ideal future in what the author calls the homeland postponed all Jews will be united in a colour blind world of material plenty and purity **The Englishman's**

Chair John Gloag,2022-10-24 Originally published in 1964 The Englishman's Chair is a history of English chairs written as a

continuous story from the 15th to the 20th Century and because of the revealing powers inherent in chair making and design it is also an unconventional footnote to English social history The changes in taste and fashion the increase of skill the introduction of new materials and the long battle between dignity and comfort are discussed as is the impact that modern industrial designers have had on chair design *Armchair Gardening* Thomas Hubbard McHatton,2010-05-01 Published in 1947 *Armchair Gardening* is a meditation on the sensual and spiritual aspects of gardening Thomas Hubbard McHatton believes gardening is an art a method of expression analogous to sculpture or dance He carefully dissects the delicate components of a garden explaining how one can pinpoint the intricate and harmonious tastes sounds and odors flowing freely among the plants McHatton includes a chronicle of America's interest in gardening starting with its genesis expanding to explain its role in universal gardening and concluding with a written pilgrimage through some of America's most famous gardens **The Italian Garden** John Dixon Hunt,1996-11-28 Italian gardens vary widely according to their historical date and geographic location This collection approaches Italian gardens of all periods from the middle ages to modern times and it ranges widely throughout the peninsula from Genoa to Sicily the Veneto to Liguria and Ferrara to Florence The authors are a distinguished group of Italian American English and German scholars with different backgrounds in art history literature architecture planning and cultural history The explorations of the subject from these different perspectives illuminate not only their own disciplines but are concerned to make many fresh connections between garden art and the politics of nationalism between the art of gardens and urban infrastructure between cultural movements like freemasonry and site planning between design and planting materials The book offers therefore a narrative of the garden by selecting ten high points of its history which are introduced with a consideration by the volume editor of the fresh challenges to contemporary Italian garden history **The Wake** F.E. Explanation in Ethics and Mathematics Uri D. Leibowitz, Neil Sinclair, 2016 How far should our realism extend For many years philosophers of mathematics and philosophers of ethics have worked independently to address the question of how best to understand the entities apparently referred to by mathematical and ethical talk But the similarities between their endeavours are not often emphasised This book provides that emphasis In particular it focuses on two types of argumentative strategies that have been deployed in both areas The first debunking arguments aims to put pressure on realism by emphasising the seeming redundancy of mathematical or moral entities when it comes to explaining our judgements In the moral realm this challenge has been made by Gilbert Harman and Sharon Street in the mathematical realm it is known as the Benacerraf Field problem The second strategy indispensability arguments aims to provide support for realism by emphasising the seeming intellectual indispensability of mathematical or moral entities for example when constructing good explanatory theories This strategy is associated with Quine and Putnam in mathematics and with Nicholas Sturgeon and David Enoch in ethics *Explanation in Ethics and Mathematics* addresses these issues through an explicitly comparative methodology which we call the companions in illumination approach By considering how argumentative strategies in the philosophy of mathematics might apply to the philosophy of ethics and vice versa the papers collected here break new ground in both areas For good measure two further companions for illumination are also broached the philosophy of chance and the philosophy of religion Collectively these comparisons light up new questions arguments and problems of interest to scholars interested in realism in any area
