Arsenic In Drinking Water:

Arsenic in Drinking Water National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Subcommittee on Arsenic in Drinking Water, 1999-07-14 The U S Environmental Protection Agency EPA has been considering a more stringent regulation of arsenic in water A significant reduction in the maximum contaminant level MCL could increase compliance costs for water utilities This book discusses the adequacy of the current EPA MCL for protecting human health in the context of stated EPA policy and provides an unbiased scientific basis for deriving the arsenic standard for drinking water and surface water Arsenic in Drinking Water evaluates epidemiological data on the carcinogenic and noncarcinogenic health effects of arsenic exposure of Taiwanese populations and compares those effects with the effects of arsenic exposure demonstrated in other countries including the United States The book also reviews data on toxicokinetics metabolism and mechanism and mode of action of arsenic to ascertain how these data could assist in assessing human health risks from arsenic exposures This volume recommends specific changes to improve the toxicity analyses and risk characterization The implications of the changes for EPA s current MCL for arsenic are also described Arsenic in Drinking Water Canada. Health Canada, 1999 **Arsenic and Drinking Water** , 2021 **Arsenic in Drinking Water and Food** Sudhakar Srivastava, 2020 Arsenic contamination poses a major environmental problem especially in Southeast Asian countries like Bangladesh and India Threatening the health of millions of people due to arsenics toxicity and carcinogenicity the major routes of arsenic exposure for humans are either through drinking water or crops Rice is the crop most affected by arsenic owing to its cultivation in major arsenic contaminated areas biogeochemical factors in the soil during rice growth and specific features of rice that enable it take up more arsenic than other crop plants This book addresses the problem of arsenic by pursuing a holistic approach It presents the status quo in different parts of the world North and South America Europe Asia etc and provides essential information on food related arsenic exposure risks for humans and possible preventive and curative measures for tackling arsenic poisoning It covers the arsenic contamination status of rice rice based products other vegetables fishes mushrooms and other foods with a special focus on rice arsenic interactions The mechanisms of arsenic uptake translocation and distribution in plants and grains are also explained In closing the book reviews a variety of prospective agronomic and biotechnological solutions to the problem of arsenic accumulation in rice grains The book is intended for a broad audience including researchers scientists and readers with diverse backgrounds including agriculture environmental science food science environmental management and human health It can also be used as an important reference guide for undergraduate and graduate students university faculties and environmentalists **Arsenic in Drinking Water and Food** Sudhakar Srivastava, 2019-08-08 Arsenic contamination poses a major environmental problem especially in Southeast Asian countries like Bangladesh and India Threatening the health of millions of people due to arsenic s toxicity and carcinogenicity the major routes of arsenic exposure for humans are either through drinking water or crops

Rice is the crop most affected by arsenic owing to its cultivation in major arsenic contaminated areas biogeochemical factors in the soil during rice growth and specific features of rice that enable it take up more arsenic than other crop plants This book addresses the problem of arsenic by pursuing a holistic approach It presents the status quo in different parts of the world North and South America Europe Asia etc and provides essential information on food related arsenic exposure risks for humans and possible preventive and curative measures for tackling arsenic poisoning It covers the arsenic contamination status of rice rice based products other vegetables fishes mushrooms and other foods with a special focus on rice arsenic interactions The mechanisms of arsenic uptake translocation and distribution in plants and grains are also explained In closing the book reviews a variety of prospective agronomic and biotechnological solutions to the problem of arsenic accumulation in rice grains The book is intended for a broad audience including researchers scientists and readers with diverse backgrounds including agriculture environmental science food science environmental management and human health It can also be used as an important reference guide for undergraduate and graduate students university faculties and environmentalists

Arsenic in Drinking Water National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicology, Subcommittee to Update the 1999 Arsenic in Drinking Water Report, 2001-11-26 Having safe drinking water is important to all Americans The Environmental Protection Agency's decision in the summer of 2001 to delay implementing a new more stringent standard for the maximum

allowable level for arsenic in drinking water generated a great deal of criticism and controversy Ultimately at issue were newer data on arsenic beyond those that had been examined in a 1999 National Research Council report EPA asked the National Research Council for an evaluation of the new data available The committee's analyses and conclusions are presented in *Arsenic in Drinking Water* 2001 Update New epidemiological studies are critically evaluated as are new experimental data that provide information on how and at what level arsenic in drinking water can lead to cancer The report's findings are consistent with those of the 1999 report that found high risks of cancer at the previous federal standard of 50 parts per billion In fact the new report concludes that men and women who consume water containing 3 parts per billion of arsenic daily have about a 1 in 1 000 increased risk of developing bladder or lung cancer during their lifetime **Arsenic**
