certain chemicals kill how they interact with the body the cases that may have inspired Christie and the feasibility of obtaining administering and detecting these poisons both at the time the novel was written and today A is for Arsenic is a celebration of the use of science by the undisputed Queen of Crime **The Elements of Murder** John Emsley, 2005-04-28 This book is about elements that kill Mercury arsenic antimony lead and thallium can be lethal as many a poisoner knew too well Emsley explores the gruesome history of these elements and those who have succumbed to them in a fascinating narrative that weaves together stories of true crime enduring historical mysteries tragic accidents and the science behind it all The colourful cast includes ancient alchemists kings leaders a pope several great musicians and a motley crew of murderers Among the intriguing accounts is that of the 17th century poet Sir Thomas Overbury who survived four attempts to poison him with mercury but died when given the poison in enema form under whose direction remains uncertain Here too is detailed the celebrated case of Florence Maybrick convicted of poisoning her violent husband James with arsenic but widely believed at the time to be innocent The question of her guilt is still disputed Threaded through the book alongside the history is the growing understanding of chemistry and the effects of different chemical substances on the human body Thousands suffered the ill effects of poisonous vapours from mercury lead and arsenic before the dangers were realized Hatters went mad because of mercury poisoning and hundreds of young girls working in factories manufacturing wallpaper in the 19th century were poisoned by the arsenic based green pigments used for the leaves of the popular floral designs Even in the middle of the 20th century accidental mercury poisoning caused many deaths in Minamata Bay while leaded petrol poisoned the whole planet and arsenic still continues to poison millions in Asia Through vividly told stories of innocent blunders industrial accidents poisoners of various hues cold cunning desperate and deaths that remain a mystery Emsley here uncovers the dark side of the Periodic Table The Arsenic Century James C. Whorton, 2010-01-28 Arsenic is rightly infamous as the poison of choice for Victorian murderers Yet the great majority of fatalities from arsenic in the nineteenth century came not from intentional poisoning but from accident Kept in many homes for the purpose of poisoning rats the white powder was easily mistaken for sugar or flour and often incorporated into the family dinner It was also widely present in green dyes used to tint everything from candles and candies to curtains wallpaper and clothing it was arsenic in old lace that was the danger Whether at home amidst arsenical curtains and wallpapers at work manufacturing these products or at play swirling about the papered curtained ballroom in arsenical gowns and gloves no one was beyond the poison's reach Drawing on the medical legal and popular literature of the time The Arsenic Century paints a vivid picture of its wide ranging and insidious presence in Victorian daily life weaving together the history of its emergence as a nearly inescapable household hazard with the sordid story of its frequent employment as a tool of murder and suicide And ultimately as the final chapter suggests arsenic in Victorian Britain was very much the pilot episode for a series of environmental poisoning dramas that grew ever more common during the twentieth century and still has no end in sight
