Art And Politics:

From Art to Politics Murray Edelman, 1995 Murray Edelman holds a unique and distinguished position in American political science. For decades one of the few serious scholars to question dominant rational choice interpretations of politics, Edelman looked instead to the powerful influence of signs, spectacles, and symbols of culture on political behavior and political institutions. His first now classic book, *The Symbolic Uses of Politics*, created paths of inquiry in political science, communication studies, and sociology that are still being explored today. In this book, Edelman continues his quest to understand the influence of perception on the political process by turning to the role of art. He argues that political ideas, language, and actions cannot help but be based upon the images and narratives we take from literature, paintings, film, television, and other genres. Edelman believes art provides us with models, scenarios, narratives, and images we draw upon in order to make sense of political events, and he explores the different ways art can shape political perceptions and actions to both promote and inhibit diversity and democracy. Elegantly written, he brilliantly contends that art helps create the images from which opinion molders and citizens construct the social realities of politics. Choice. It is perhaps the freshness with which he puts his case that is what makes *From Art to Politics* as well as his other works so challenging and invigorating.

Philip Abbott, *Review of Politics* **How to Do Politics with Art** Violaine Roussel, Anurima Banerji, 2016-11-01 A major issue in the relation of art to the rest of society is the question of how art penetrates politics. From the perspective of most art scholars, this is a question of aesthetics: whether politics necessarily pollutes and debases the quality of the arts. From the perspective of social science, it has been primarily a question of meaning: how political messages are conveyed through artistic media. Recent work has begun to broaden the study of the arts and politics beyond semiosis and content focus. Several strands of scholarship are converging around the general issue of the social relationships within which art takes political form: that is, how art and artists do politics. This perspective of doing moves analysis beyond addressing the meaning of culture to focus on the ways that art is embedded in and intervenes in social relationships, activities, and institutions. This volume brings together an interdisciplinary group of scholars from France and the United States to investigate these directions and themes by exploring the question of how to do politics with art from a comparative standpoint, putting sociological approaches in conversation with other disciplinary prisms. It will be of interest to scholars of social movements and politicization, the sociology of art, art history, and aesthetics.

Art and Politics in China, 1949-1984 Maria Galikowski, 1998 This book examines the complex relationship between art and politics in the People's Republic of China between 1949 and 1984. It focuses in particular on three important facets of this relationship: namely, the organizational structure of China's art establishment, the ideological framework for directing creative activity, and the political movement as a key method for periodically ensuring that artists follow the current official line.
