Artistic Autoethnography on the Public Fetus Anna Gonzalez Suero, 2024-11-11 An Artistic Autoethnography on the Public Fetus explores artistic work with the iconic image of the fetus and the personal consequences of the image by analyzing the so-called public fetus within a feminist approach. This book develops a deeply interdisciplinary body of research engaging with feminist debates on reproductive technology and imagery, art theory, visual histories of anatomical imagery, cultural critiques of the myth of the artistic genius, Gestalt understandings of perception and memory, and anthropological theories of liminality. Through blurring the artistic with the scientific, it explores the potential of autoethnography to serve as a form of conscious raising through which to create new images and stories that counter the public fetus in support of reproductive autonomy and social justice. This book will be useful to feminist scholars who work with issues related to gender, reproduction, sexuality, and autoethnography. At the same time, the book will be of value to undergraduate and graduate students in gender studies as an example of how an autoethnographic process can make unrecognized experiences of gender known to a person. *Thinking Print* Deborah Wye, 1996 Essay by Deborah Wye Foreword by Glenn D Lowry Healing with Art and Soul Kathy Luethje, 2008-12-18 This fascinating collection of essays contains a variety of perspectives about the use of expressive arts for facilitating physical and emotional healing. Each author within brings a fresh approach and unique experiences to their writing. Within these pages you will find many ideas for the use of the arts and can learn how to engage the inner layers of the self that allow natural healing processes of the body and soul to flourish. When we fully engage an art modality we find ourselves in a place in our consciousness that could be called healingspace where we feel ourselves whole and remember ourselves as well. From psychic trauma to physical illness, dis-ease of many kinds may be addressed through the various techniques discussed here. The tools offered by some authors are population specific and age appropriate while several authors have given us the philosophical underpinnings for it all. While the authors within represent the grassroots voices of this new and rapidly expanding field, several of them have developed their own methods for using the arts and have thriving practices. Our approach is wholistic. Music, visual arts, movement, dance, and poetry are discussed as separate modalities and in combination with one another in a process or flow. The reader will engage in our experiences with these modalities as they have been lived. The complementary CD that accompanies this book will allow the listener to have a full

sound experience of toning If a rationale is needed for establishing arts programs in medical centers or other health facilities it can be found here The book offers tools for self development and for group facilitation Those wanting to expand their healing practice through the use of the arts will find the book to be a faithful guide Anyone wishing for a fuller understanding of how the arts may work to facilitate healing will find much food for thought within these pages **The Creative Family**
