The Art, Craft, and Science of Evaluation Capacity Building Donald W. Compton, Michael L. Baizerman, Stacey Hueftle-Stockdill, 2002-04-23 Evaluation Capacity Building ECB is now being given attention but as yet there is only a small literature about this necessary and seemingly rare process ECB is the often invisible work carried out within or between organizations to sustain the evaluation unit and evaluation studies It is the ongoing everyday work necessary to ensure quality evaluation practice It is the vision the political and administrative effort and management craft which continues to make possible over time the organizational conditions in which professional evaluation work is completed and used requested carried out and used ad infinitum This issue is given over to the conceptualization and illumination of the evaluation capacity building process Four case studies written by contributors show the complexity of the ECB process and its variation in different organizational structures and environments Included are a federal agency The Center for Disease Control and Prevention a nationwide voluntary health organization The American Cancer Society an international development agency The World Bank and a local school district The Anoka Hennepin School District Minnesota The editors introduce and define ECB compare it to evaluation practice and draw out ECB themes from the case studies These sections are used to suggest a practical framework for understanding the core ECB checklist and to provide a conceptual model for theory building and the collection of ECB case studies

Interactive Evaluation Practice Jean A.

King, Laurie Stevahn, 2012-04-12 You're about to start your first evaluation project. Where do you begin? Or you're a practicing evaluator faced with a challenging situation. How do you proceed? How do you handle the interactive components and processes inherent in evaluation practice? Use *Interactive Evaluation Practice* to bridge the gap between the theory of evaluation and its practice. Taking an applied approach, this book provides readers with specific interactive skills needed in different evaluation settings and contexts. The authors illustrate multiple options for developing skills and choosing strategies systematically, highlighting the evaluator's three roles as decision maker, actor, and reflective practitioner. Case studies and interactive examples stimulate thinking about how to apply interactive skills across a variety of evaluation situations. From beginning to end, this book is an indispensable resource for those responsible for the evaluation process. In essence, here's a chance to learn from masters about acquiring mastery. What could be more useful? Michael Quinn Patton, Author of *Utilization-Focused Evaluation*. The reader will learn how to view the EAG as a structure of expertise, its use for political legitimacy, and as a response to a variety of constituencies. Guidelines on how to recruit, select, orient, train, monitor, assess, and evaluate EAG members are also included.
