Art Against the Enlightenment Stephen Albaugh, 1990-01-01

Nietzsche's Enlightenment Paul Franco, 2011-08-26

While much attention has been lavished on Friedrich Nietzsche's earlier and later works those of his so called middle period have been generally neglected perhaps because of their aphoristic style or perhaps because they are perceived to be inconsistent with the rest of his thought With Nietzsche's Enlightenment Paul Franco gives this crucial section of Nietzsche's oeuvre its due offering a thoughtful analysis of the three works that make up the philosopher's middle period *Human All too Human* *Daybreak* and *The Gay Science* It is Nietzsche himself who suggests that these works are connected saying that their common goal is to erect a new image and ideal of the free spirit Franco argues that in their more favorable attitude toward reason science and the Enlightenment these works mark a sharp departure from Nietzsche's earlier more romantic writings and differ in important ways from his later more prophetic writings beginning with *Thus Spoke Zarathustra* The Nietzsche these works reveal is radically different from the popular image of him and even from the Nietzsche depicted in much of the secondary literature they reveal a rational Nietzsche one who preaches moderation instead of passionate excess and Dionysian frenzy Franco concludes with a wide ranging examination of Nietzsche's later works tracking not only how his outlook changes from the middle period to the later but also how his commitment to reason and intellectual honesty in his middle works continues to inform his final writings

Adorno's Positive Dialectic Yvonne Sherratt, 2002-10-10

Discourse on Sciences and Arts Jean-Jacques

Rousseau, 2024-05-09 In the mid eighteenth century a little known writer from Geneva seized the spotlight with a bold claim that upended the Enlightenment's sunny faith in progress Jean Jacques Rousseau's first major work the *Discourse on the Sciences and Arts* opens with the startling argument that civilization's refinements in knowledge and culture have not elevated human virtue at all but instead have subtly undermined it This modern critical reader's translation from the original French manuscripts includes supplementary materials that bring Rousseau's world and impact to life This professional translation delivers scholarly depth with amplifying materials This Reader's Edition includes an illuminating afterword tracing Rousseau's intellectual relationship with Diderot Voltaire and his reception by Nietzsche revealing the fascinating dialogue between the period's most influential minds A comprehensive timeline connects the major events of Rousseau's life with world events an glossary of Enlightenment terminology frames Rousseau's debates in the intellectual milieu of his day

and a detailed index provides an authoritative guide to his complete writings In 1750 Rousseau composed this essay titled in French *Discours sur les sciences et les arts* in response to a challenge posed by the Academy of Dijon which had asked whether the revival of arts and sciences improved public morals His eloquent answer arguing that modern progress corrupts rather than purifies won the academy's prize and vaulted Rousseau to sudden fame across France sparking lively debate Appearing at the height of the Enlightenment the work's counterintuitive verdict shocked a society enamored with reason and refinement marking a radical entrance for a new philosophical voice First published in 1750 after it won a prize from the Academy of Dijon the *Discourse on the Sciences and Arts* announced Rousseau's arrival as a bold new voice in French letters In this concise yet sweeping essay written in elegant 18th century prose he contends that the proud advancement of learning and refinement has ushered in decadence and hypocrisy instead of true virtue Often referred to simply as the *First Discourse* this work introduced a theme that would run through all of Rousseau's later writings the idea that humanity's natural innocence is spoiled by the artificial polish of society The essay's paradoxical critique of Enlightenment culture drew both admiration and indignation in salons across Europe Voltaire famously mocked Rousseau for praising savagery even as he wrote in refined French Yet the bold stance and lucid style of the *Discourse on the Sciences and Arts* won Rousseau instant recognition and its core question whether progress actually makes people better echoed through the debates of the era presaging the deeper explorations he would undertake in later works

Proceedings of the 2025 4th International Conference on Social Sciences and Humanities and Arts (SSHA 2025) Sun Jing, Sun Hefei, Liu Shuli, Ren Xianpin, Cunezt Birkok, 2025-07-22 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today's increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the

development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc *The Total Work of Art in European Modernism* David Roberts,2011-12-15 In this groundbreaking book David Roberts sets out to demonstrate the centrality of the total work of art to European modernism since the French Revolution The total work of art is usually understood as the intention to reunite the arts into the one integrated whole but it is also tied from the beginning to the desire to recover and renew the public function of art The synthesis of the arts in the service of social and cultural regeneration was a particularly German dream which made Wagner and Nietzsche the other center of aesthetic modernism alongside Baudelaire and Mallarm The history and theory of the total work of art pose a whole series of questions not only to aesthetic modernism and its utopias but also to the whole epoch from the French Revolution to the totalitarian revolutions of the twentieth century The total work of art indicates the need to revisit key assumptions of modernism such as the foregrounding of the autonomy and separation of the arts at the expense of the countertendencies to the reunion of the arts and cuts across the neat equation of avant garde with progress and deconstructs the familiar left right divide between revolution and reaction the modern and the antimodern Situated at the interface between art religion and politics the total work of art invites us to rethink the relationship between art and religion and art and politics in European modernism In a major departure from the existing literature David Roberts argues for twin lineages of the total work a French revolutionary and a German aesthetic which interrelate across the whole epoch of European modernism culminating in the aesthetic and political radicalism of the avant garde movements in response to the crisis of autonomous art and the accelerating political crisis of European societies from the 1890s forward **Dialectic of Romanticism** Peter Murphy,David Roberts,2005-10-01 Dialectic of Romanticism presents a radical new assessment of the aesthetic and philosophical history and future of modernity An exploration of the internal critique of modernism treats romanticism later historicism and post modernism as central to the development of European modernism alongside enlightenment and like the enlightenment subject to its own dead ends and fatalities An external critique of modernism recovers concepts of civilization and civic aesthetics which are trans historical simultaneously modern and classically inspired and provides a counter both to romantic historicism and enlightened models of progress Finally a retrospective critique of modernism analyses what happens to modernism s romantic archaic and technological futurist visions when they are translated from Europe to America Dialectic of Romanticism argues that out of the European dialectic of romanticism and enlightenment a new dialectic of modernity is emerging in the New World one which points beyond modernism and postmodernism **The Dialectics of Aesthetic Agency** Ayon Maharaj,2013-02-28 This study examines how key figures in the German aesthetic tradition Kant Schelling Friedrich Schlegel Hegel and Adorno attempted to think through the powers and limits of art in post Enlightenment modernity Ayon Maharaj argues that the aesthetic

speculations of these thinkers provide the conceptual resources for a timely dialectical defense of aesthetic agency art's capacity to make available uniquely valuable modes of experience that escape the purview of Enlightenment scientific rationality Blending careful philosophical analysis with an intellectual historian's attention to the broader cultural resonance of philosophical arguments Maharaj has two interrelated aims He provides challenging new interpretations of the aesthetic philosophies of Kant Schelling Schlegel Hegel and Adorno by focusing on aspects of their thought that have been neglected or misunderstood in Anglo American and German scholarship He demonstrates that their subtle investigations into the nature and scope of aesthetic agency have far reaching implications for contemporary discourse on the arts The *Dialectics of Aesthetic Agency* is an important and original contribution to scholarship on the German aesthetic tradition and to the broader field of aesthetics

The Destiny of Modern Societies Milan Zafirovski, 2009-07-15 This book is a sociological analysis of the relationship between modern society in particular America and Calvinism in the Weberian tradition While the book continues this tradition it further expands elaborates on and goes beyond earlier sociological analyses The book examines the impact of Calvinism on modern society as a whole thus extending elaborating on and going beyond the previous analyses of the influence of the Calvinist religion only on the capitalist economy It analyzes how Calvinism has determined most contemporary social institutions including political civic cultural and economic in its respective societies particularly through its derivative Puritanism America For that purpose the book applies the idea of the destiny of societies or nations to American society in particular It argues demonstrates and illustrates the Calvinist societal predestination through the Puritan determination of American society

The Enchantment of Modern Life Jane Bennett, 2016-11-22 It is a commonplace that the modern world cannot be experienced as enchanted that the very concept of enchantment belongs to past ages of superstition Jane Bennett challenges that view She seeks to rehabilitate enchantment showing not only how it is still possible to experience genuine wonder but how such experience is crucial to motivating ethical behavior A creative blend of political theory philosophy and literary studies this book is a powerful and innovative contribution to an emerging interdisciplinary conversation about the deep connections between ethics aesthetics and politics As Bennett describes it enchantment is a sense of openness to the unusual the captivating and the disturbing in everyday life She guides us through a wide and often surprising range of sources of enchantment showing that we can still find enchantment in nature for example but also in such unexpected places as modern technology advertising and even bureaucracy She then explains how everyday moments of enchantment can be cultivated to build an ethics of generosity stimulating the emotional energy and honing the perceptual refinement necessary to follow moral codes Throughout Bennett draws on thinkers and writers as diverse as Kant Schiller Thoreau Kafka Marx Weber Adorno and Deleuze With its range and daring *The Enchantment of Modern Life* is a provocative challenge to the centuries old narrative of disenchantment one that presents a new alter tale that discloses our profound attachment to the human and nonhuman world

Jewish Cryptotheologies of Late Modernity Agata

Bielik-Robson,2014-08-13 This book aims to interpret Jewish Philosophy in terms of the Marrano phenomenon as a conscious clinamen of philosophical forms used in order to convey a secret message which cannot find an open articulation The Marrano phenomenon is employed here in the domain of modern philosophical thought where an analogous tendency can be seen the clash of an open idiom and a secret meaning which transforms both the medium and the message Focussing on key figures of late modern twentieth century Jewish thought Hermann Cohen Gershom Scholem Walter Benjamin Franz Rosenzweig Theodor Adorno Ernst Bloch Jacob Taubes Emmanuel Levinas and Jacques Derrida this book demonstrates how their respective manners of conceptualization swerve from the philosophical mainstream along the Marrano secret curve Analysing their unique contribution to the unfinished project of modernity including issues of the future of the Enlightenment modern nihilism and post secular negotiation with religious heritage this book will be essential reading for students and researchers with an interest in Jewish Studies and Philosophy MasterClass in Religious Education Liam

Gearon,2013-03-28 A comprehensive guide to religious education ensuring a solid foundation for supporting effective learning and teaching The Time of Turāth Harald Viersen,2024-12-02 Recent Arab intellectual debates are often described as revolving around Arab Islamic cultural heritage tur th and the role that it ought to play in modern society This debate is standardly characterized as a confrontation between traditionalists and modernists the former idolizing an authentic heritage the latter blaming traditionalism for Arab society s inability to modernize This study argues that this standard narrative has become overly dominant making it impossible for different perspectives to be either voiced or heard It calls for a critical review of how we think about contemporary Arab thought through an analysis of the progressive linear temporal structure underlying the authenticity modernity dichotomy Looking in detail at three Arab intellectuals of the last fifty years Zak Naj b Ma m d Adonis and Abd al Ra m n h the study shows how this temporal structure underlies their thinking but also how their efforts to break away from it build on a critique of its temporal basis This analysis in turn enables an overhaul of the authenticity modernity paradigm which not only leads to a richer critical engagement with contemporary Arab thought but also brings out its moral dimensions Mimesis and Reason Gregg Daniel Miller,2011-09-23 Complicating the standard interpretation of Habermas as a proceduralist Mimesis and Reason uncovers the role that mimesis or imitation plays as a genuinely political force in communicative action Through a penetrating examination of Habermas s use of themes and concepts from Plato George Herbert Mead and Walter Benjamin Gregg Daniel Miller reconstructs Habermas s theory to reveal a new postmetaphysical articulation of reason that lays the groundwork for new directions in political theory

Creativity and the Global Knowledge Economy Michael A. Peters,Simon Marginson,Peter Murphy,2009 This is a major work by three international scholars at the cutting edge of new research that investigates the emerging set of complex relationships between creativity design research higher education and knowledge capitalism It highlights the role of the creative and expressive arts of performance of aesthetics in general and the significant role of design as an underlying

infrastructure for the creative economy This book tracks the most recent mutation of these serial shifts from postindustrial economy to the information economy to the digital economy to the knowledge economy to the creative economy to summarize the underlying and essential trends in knowledge capitalism and to investigate post market notions of open source public space The book hypothesizes that creative economy might constitute an enlargement of its predecessors that not only democratizes creativity and relativizes intellectual property law but also emphasizes the social conditions of creative work It documents how these profound shifts have brought to the forefront forms of knowledge production based on the commons and driven by ideas not profitability per se and have given rise to the notion of not just knowledge management but the design of creative institutions embodying new patterns of work

Romancing Fascism Kathleen Kerr-Koch, 2013-04-11

Romancing Fascism argues that intellectual responsibility can only be safeguarded if criticism is mobilised both as a poetic and as a critically enlightened endeavour In this analysis of allegory as a function of modernity what is made clear is the difficulty if not impossibility of definitively determining the genealogical antecedents of intellectual trends particularly those considered pernicious to clear thinking Thus Kerr Koch takes a wide ranging approach to the analysis of allegory as it is treated by three controversial writers whose works flank the nineteenth and twentieth centuries the middle and late periods of what we call modernity Walter Benjamin Paul de Man and Percy Bysshe Shelley These three writers have been chosen because they have been at some point recuperated for a theory of postmodernism a term that for some theorists represents liberal free play and for others represents a lack of rigour and a pernicious corruption of thought

Delirious Kelly Baum, Lucy Bradnock, Tina Rivers Ryan, 2017-09-12 Can postwar art be understood as an exercise in calculated insanity Taking this provocative question as its basis this book explores the art and history of delirium from 1950 to 1980 an era shaped by the brutality of World War II and the rapid expansion of industrial capitalism Skepticism of science and technology along with fear of its capability to promote mass destruction developed into a distrust of rationalism which profoundly influenced the art of the times *Delirious* features work by more than sixty artists from Europe Latin America and the United States including Dara Birnbaum Le n Ferrari Gego Bruce Nauman Howardena Pindell Peter Saul and Nancy Spero Experimenting with irrational subject matter and techniques these artists forged new strategies that directly responded to such unbalanced times Disturbing and challenging the works in this book in multiple media and often counterintuitively incorporating highly ordered and systematic structures upend traditional notions of aesthetic harmony Three wide ranging essays and a richly illustrated plates section investigate the degree to which delirious times demand delirious art inviting readers to think crazy
