Art and imagination Roger Seruton, **The Profile of Imagining** Robert Hopkins, 2024-03-20 What is sensory imagining and what role does it play in our lives How does visualizing a castle running through a tune in one s head or imagining the taste of fish ice cream relate to perceiving such things or to remembering them What are the connections between imagining and agency and how does it relate to emotion and other affect The Profile of Imagining offers a theory that answers these and many other questions It argues that sensory imagining involves the redeployment of resources central to perception though in a radically different context and to very different effect The result is a view that explains central features of imagining s phenomenology and functional role including its capacity to capture what it would be like to perceive its objects while acknowledging the many and striking differences between imagining and sensing Hopkins shows how the view can be extended to imagining in other forms especially the imagining of affect and uses it to argue for some surprising conclusions that imagining something is not a way to engage with its aesthetic character and that imagining provokes real feeling much less often than is usually assumed

Possibilities of Perception Jennifer Church, 2013-07-25 Jennifer Church presents a new account of perception which shows how imagining alternative perspectives and possibilities plays a key role in creating and validating experiences of self evident objectivity She explores the nature of moral perception and aesthetic perception and argues that perception can be both literal and substantive

demonstrates the riches that art education entails While the key figures he engages with do not encompass the entire range of possible philosophical perspectives that could be brought to bear on the field of art education an impossible task in any case he engages each figure deeply The scholarly literature in each section is thoroughly explored to highlight the thesis that holds the entire project together the deeply textured quality of art education and the many benefits that we can derive thereof This should be a valuable book to art teachers no doubt but to educators and philosophers too

The Quarterly Journal of Music Teaching and Learning ,1992 [The Space that Separates: A Realist Theory of Art](#) Nick Wilson,2019-08-23 The Space that Separates A Realist Theory of Art radically challenges our assumptions about what art is what art does who is doing it and why it matters Rejecting the modernist and market driven misconception that art is only what artists do Wilson instead presents a realist case for living artfully Art is defined as the skilled practice of giving shareable form to our experiences of being in relation with the real that is to say the causally generative domain of the world that extends beyond our direct observation comprising relations structures mechanisms possibilities powers processes systems forces values ways of being In communicating such aesthetic experience we behold life s betweenness the space that separates so coming to know ourselves as connected Providing the first dedicated and comprehensive account of art and aesthetics from a critical realist perspective Aesthetic Critical Realism ACR Wilson argues for a profound paradigm shift in how we understand and care for

Riggs,2025 It is hard to underestimate the value and influence that open mindedness can have on our lives Indeed our success often depends crucially on our ability to interact with others and the quality of those interactions We are after all not the generic abstract isolated self sufficient agents assumed by a classically Cartesian theoretical framework It is in our best interest to realize this falsehood and act with our true selves to rectify that to live better Yet of course open mindedness and perspective can also be responsible for some of our most catastrophic epistemic failures Conspiracy theories group think echo chambers charismatic charlatans identity politics these are all phenomena by which individuals can be led astray precisely by being open to the influence of others Being epistemically successful as a human in our particular predicament requires being appropriately open to the influence of others This multi
