Cataloged Serial Holdings National Defense University. Library, **Physicians Desk Reference** Medical Economics,1983-02 **Reference Sources, 1982** Terry Silver,1984-12 Tinnitus David Evered,Geralyn Lawrenson,2009-09-14 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world **Handbook of Psychiatric Diagnostic Procedures Vol. I** R.C.W. Hall,T.P. Beresford,2012-12-06 The Science of Psychiatry We live in exciting times Psychiatrists practicing their specialty are beset as never before with news of developments in the field The conduits of news to the practicing clinician are usually either stories written in the popular medical press such as news circulars and advertisements from commercial concerns or from de tailed scientific articles written for the scientific community In both forms the news has been coming thick and fast The problem encountered most often by practicing psychiatrists and clini cians responsible for hospital facilities is integrating this material into a coherent whole with sufficient technical detail to permit the appropriate development or use of the new tests and procedures in the clinical setting The two volumes comprising the Handbook of Psychiatric Diagnostic Pro cedures represent an attempt to provide a clinically useful review of the current accepted applicability of these tests and procedures to enable the clinician to properly implement and evaluate the procedures as well as the results obtained Bioactive Polymeric Systems Charles G. Gebelein,Charles E. Carraher,2012-12-06 The vast array of libraries in the world bear mute witness to the truth of the 3000 year old observation of King Solomon who stated of making many books there is no end and much study is a weariness of the flesh Yet books are an essential written record of our lives and the progress of science and humanity Here is another book to add to this huge collection but hopefully not just another collection of pages but rather a book with a specific purpose to aid in alleviating the weariness of the flesh that could arise from much studying of other journals and books in order to obtain the basic information contained herein This book is about polymeric materials and biological activity as the title notes Polymeric materials in the broad view taken here would include not only synthetic polymers e g polyethylene polyvinyl chloride polyesters polyamides etc but also the natural macromolecules e g proteins nucleic acids polysaccharides which compose natural tissues in humans animals and plants In the broad sense used here biological activity is any type of such action whether it be in medication pest control plant growth regu lation and so on In short this book attempts to consider briefly the use of any type of polymeric material system with essentially any kind of biological activity Drugs of Abuse , Polymeric Materials in Medication Charles G. Gebelein,Charles E. Carraher Jr.,2013-11-11 The art of using chemical agents for medication dates back into antiquity although most of the earliest examples used plants herbs and other natural materials The old Egyptian medical papyri which date from before 1400 B C

contain dozens of examples of such medicinal plants and animal extracts In the Old Testament of the Bible we can find references to using oil to soften the skin and sores Isaiah 1 6 the use of tree leaves for medicine Ezekiel 47 12 and various medical balms Jeremiah 8 22 Not all these recipes were effective in curing the ailments for which they were used and sometimes the treatment was worse than the disease Nevertheless the art of using chemical derived agents for medicines continued to develop and received great impetus during the present century with the rise of synthetic organic chemistry One of the most vexing problems has always been to achieve specificity with the medications While some medical agents do indeed possess a relatively high degree of specificity most agents are far more systemic than would be desired Much of the research efforts to correct this deficiency has centered on modifying the chemical agents themselves Unfortunately there are severe limitations in this approach since minor modifications often drastically affect the therapeutic activity and can even render the drug completely ineffective or worse

Pharmacology of the Skin II, 2012-12-06 The recent interest in the pharmacology of the skin and the treatment of its diseases has come about for two reasons The first is a realisation that many aspects of pharmacology can be studied as easily in human skin as in animal models where they may be more relevant to human physiology and disease Examples of this are the action of various vasoactive agents and the isolation of mediators of inflammation after UV irradiation and antigen induced dermatitis The second reason is the fortuitous realisation that a pharmacological approach to the treatment of skin disease need not always await the full elucidation of aetiology and mechanism For example whilst the argument continued unresolved as to whether the pilosebaceous infection which constitutes acne was due to a blocked duct or to a simple increase in sebum production 13 cis retinoic acid was found quite by chance totally to ablate the disease again whilst cyclosporin fresh from its triumphs in

organ transplantation has been found able to suppress the rash of psoriasis it has resuscitated the debate on aetiology We are therefore entering a new era in which the pharmacology and clinical pharmacology of skin are being studied as a fascinating new way of exploring questions of human physiology and pharmacology as well as for the development and study of new drugs use of which will improve disease control and at the same time help to define pathological mechanisms
