

STATE OF THE FUTURE AT THE MILLENNIUM

By Jerome C. Glenn and Theodore J. Gordon

- The Millennium Project was selected among the *100 Best Practices* by UN Habitat in 1998.
- The international journal *Technological Forecasting & Social Change* dedicated an entire issue to the *State of the Future* for the third year.
- The *1998 State of the Future* was among the 1998 Top Ten Best Sellers of the World Future Society.
- The *1999 State of the Future* was rated by the *Futures Survey* as one of the best four books on World Futures/Global Economy.

The *1999 State of the Future* report is by far the most comprehensive look at the world's future that has yet been attempted.... Altogether, a huge task very well done!

Harlan Cleveland
President, World Academy of Art and Science

"The *State of the Future* distills both foresight and genuine wisdom for humanity's common future - from a global, multi-cultural collegium of advanced thinkers assembled by the Millennium Project. A major social innovation."

Hazel Henderson
Author of *Building a Win Win World*

"Scouting the future frontier into which we so slowly moved wasn't particularly challenging yesteryear. Hugely different now; more so tomorrow, as this book reveals. It is an eye opener: sober, challenging, exciting, appropriately scary. It's something you should read if you expect to go along, especially if you would like to affect the route."

Doug Engelbart
Inventor of the computer mouse, and software pioneer of hypertext,
network computing, groupware, windows computing, video-conferencing,
and Director of the Bootstrap Institute

One observer said of the Millennium Project: "*Right now there is no alternate path to fundamentally establishing global common ground.... Only fluency across the boundaries (of science and humanities) provides a clear view of the world as it really is.*"

1999 State Of The Future Challenges We Face At The Millennium:

1999 State of the Future Jerome C. Glenn, Theodore J. Gordon, 1999 **Assessing the Biological Weapons and Bioterrorism Threat** Milton Leitenberg, 2005 It is nearly 15 years since biological weapons BW have become a significant national security preoccupation The events of September 11 2001 although not in any way related to BW combined with the distribution of professionally prepared anthrax spores through the U S postal system in the weeks afterwards magnified previous concerns by orders of magnitude *Assessing the Biological Weapons and Bioterrorism Threat* , *Behavior Space* Alexander Manu, 2016-04-15 Behavior Space proposes that corporations do not design products or services anymore they design behavior spaces Facebook is not a product not a technology but a behavior space Innovation is the creation of a new behaviour space The product or service is simply the catalyst that enables a new behavior space to emerge The size of the behaviour space footprint represents the potential value a product or service offers the greater the value potential the greater the monetization potential Alexander Manu illustrates how these new concepts are transforming design and product development so that the process changes from a static and product centred approach to one that is entirely centred on the user and their behaviours that emerge as they interact with what they have bought He provides a new language to describe the way in which the physical intellectual and emotional features of products and services achieve a relationship between the user and the brand And he explains the concept of Play Value which underpins the attraction for customers and depends on compelling experiences that are challenging rewarding and absorbing that never frustrate and that encourage repeated use Designers and brand managers seeking to understand and exploit commercially the fundamental changes in consumers that are driven by technology experience and social interaction will find Behavior Space a wonderful place to start **American Book Publishing Record** R.R. Bowker Company, 1978 **Além da globalização** Hazel Henderson, 2003 **Energy to 2050** Maria Rosa Viridis, 2003 Analysing the interaction between energy and climate change mitigation issues requires the adoption of a long term perspective looking up to fifty years ahead The future cannot be predicted particularly over longer periods However strategic planning and political decisions demand that we explore options for the future and these are best developed through scenarios conjectures as to what might happen in the future based on our past and present experience of the world and on plausible speculation about how these trends may further evolve This volume looks at different types of scenarios evaluating how they can be used to analyse specific aspects of the interaction between energy and environment over the longer term It examines exploratory scenarios based on different expectations of technical and or policy developments over the next 50 years and normative scenarios based on a set of desirable features or norms that the future world should possess These long term scenarios complement the IEA s World Energy Outlook which presents a mid term business as usual scenario with some variants **Renewable Energy** Bent Sorensen, 2018-12-14 This four volume set edited by a leading expert in the field brings together in one collection a series of papers that have been fundamental to the

development of renewable energy as a defined discipline Some of the papers were first published many years ago but they remain classics in their fields and retain their relevance to the understanding of current issues The papers have been selected with the assistance of an eminent international editorial board The set includes a general introduction and each volume is introduced by a new overview essay placing the selected papers in context The range of subject matter is considerable including coverage of all the main renewable technologies the fundamental principles by which they function and the issues around their deployment such as planning integration and socio economic assessment Overall the set provides students teachers and researchers confronted with thousands of journal articles book chapters and grey literature stretching back decades with a ready made selection of and commentary on the most important key writings in renewable energy It will be an essential reference for libraries concerned with energy technology and the environment **The Futurist** ,2001

Humanitarian Engineering Carl Mitcham, David Munoz, 2022-05-31 Humanitarian Engineering reviews the development of engineering as a distinct profession and of the humanitarian movement as a special socio political practice Having noted that the two developments were situated in the same geographical and historical space that is in Europe and North America beginning in the 1700s the book argues for a mutual influence and synthesis that has previously been lacking In this spirit the first of two central chapters describes humanitarian engineering as the artful drawing on science to direct the resources of nature with active compassion to meet the basic needs of all especially the powerless poor or otherwise marginalized A second central chapter then considers strategies for education in humanitarian engineering so conceived Two final chapters consider challenges and implications Table of Contents Engineering Humanitarianism Humanitarian Engineering Humanitarian Engineering Education Challenges Conclusion Humanizing Technology
