Do It For Less Parties:

Mandates, Parties, and Voters James H Fowler, Oleg Smirnov, 2009-09-02 Shows how the size of an election victory influences subsequent candidate behavior voter behavior and even the economy

Party Wars Barbara Sinclair, 2014-10-22 Party Wars is the first book to describe how the ideological gulf now separating the two major parties developed and how today's fierce partisan competition affects the political process and national policy Barbara Sinclair traces the current ideological divide to changes in the Republican party in the 1970s and 1980s including the rise of neoconservatism and the Religious Right Because of these historical developments Democratic and Republican voters today differ substantially in what they consider good public policy and so do the politicians they elect Polarization has produced institutional consequences in the House of Representatives and in the Senate witness the majority party's threat in 2004 2005 to use the nuclear option of abolishing the filibuster The president's strategies for dealing with Congress have also been affected raising the price of compromise with the opposing party and allowing a Republican president to govern largely from the ideological right Other players in the national policy community interest groups think tanks and the media have also joined one or the other partisan team Party Wars puts all the parts together to provide the first government wide survey of the impact of polarization on national politics Sinclair pinpoints weaknesses in the highly polarized system and offers several remedies

Where Do the Parties Stand? Stella Gianfreda, 2021-07-29 This book analyses the politicization of immigration and the European Union in Italy the UK and the European Parliament EP from 2015 to 2020 The book uses the case studies of Italy the UK and the EP to study party positioning specifically towards immigration and the European Union to understand to what extent mainstream left mainstream right and populist parties adopt different framing strategies to compete on the new cultural dimension created by globalization The book draws on saliency theory issue ownership theory and yield theory to investigate the multidimensional nature of political competition and the relevance of institutional settings in determining party framing strategies Bridging two fields that typically do not interact party politics and migration studies this book fills gaps in the academic literature and as such will be appropriate for students and researchers interested in party politics European politics immigration politics populism and text analysis

Domestic Contestation of the European Union Sara B. Hobolt, Toni Rodon, 2021-06-29 This book examines how Europe wide issues such as immigration cross national redistribution and further European integration have reshaped electoral democracy and party competition across Europe After decades of scholars and commentators bemoaning the limited politicization of the EU nationally European issues have come to dominate domestic electoral politics From the Eurozone crisis to the struggle of dealing with growing numbers of migrants and refugees entering Europe EU wide issues now occupy a salient part of the domestic political debate This book examines what drives public opinion towards some of the key Europe wide issues of the day and how these EU issues shapes electoral behaviour and party competition It brings together leading scholars from different fields to explore what shapes preferences towards

Europe wide policy issues how they influence electoral behaviour and party fortunes and what the implications are for the quality of European democracy Overall this book deepens our understanding of the state of European democracy domestically in an era in which national and Europe wide problems and policy solutions are inextricably linked The chapters in this book were originally published in the Journal of European Public Policy **Electronic Participation** Efthimios Tambouris, Ann Macintosh, Hans de Bruijn, 2011-08-19 This book constitutes the refereed proceedings of the Third International Conference on Electronic Participation ePart 2011 held in Delft The Netherlands in August September 2011 The 26 revised full papers were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on appreciation of social media visualizing arguments understanding eParticipation eParticipation initiatives and country studies participation and eServices and innovative technologies *Parliamentary Party Groups in European Democracies* Knut Heidar, Ruud Koole, 2003-08-29 The partisan groups in parliament form the link between mass suffrage parties and parliaments and are generally accepted today as necessary instruments of parliamentary business Parliamentary party groups are central actors in most European democracies This volume analyses the manifestations and operations of these actors across thirteen different countries and in the European parliament Congressional Parties, Institutional Ambition, and the Financing of Majority Control Eric S. Heberlig, Bruce A. Larson, 2012-03-21 Fundraising for the party has rapidly replaced more traditional criteria for advancement and other rewards in Congress **Explaining and Predicting Elections** Ian Budge, Dennis J. Farlie, 2025-08-01 First published in 1983 Explaining and Predicting Elections is the first cross national and comprehensive explanation of election results It considers why one election differs from another and attempts to account for party gains and losses in the elections which have taken place in twenty three democracies in the post war period Budge and Farlie base their study on a radically new view of party behaviour Parties not arguing or debating over the same issues but talking past each other Their book shows why it is in the parties interest to do this how parties might improve their appeal and how electors react in a broadly rational manner by supporting one party alternative rather than another The discussion also considers important topics for example whether electors are abandoning old partisan loyalties and becoming more volatile The usefulness of these ideas is measured and checked against new evidence from twenty three countries These ideas are then used to produce advance predictions of ten elections in different countries which are then checked against actual results The reader can use the methods to make his own predictions for elections which interest him In many ways this makes Explaining and Predicting Elections the most comprehensive and useful investigation of the election process yet produced It will interest the general reader political practitioner historians and election and area specialists

Marschall,2014-06-06 Voting Advice Applications VAAs have become a widespread online feature of electoral campaigns in
Europe attracting growing interest from social and political scientists But until now there has been no systematic and reliable
comparative assessment of these tools Previously published research on VAAs has resulted almost exclusively in national
case studies This lack of an integrated framework for analysis has made research on VAAs unable to serve the scientific goal
of systematic knowledge accumulation Against this background Matching Voters With Parties and Candidates aims first at a
comprehensive overview of the VAA phenomenon in a truly comparative perspective Featuring the biggest number of
European experts on the topic ever assembled the book answers a number of open questions and addresses debates in VAA
research It also aims to bridge the gap between VAA research and related fields of political science **The Commercial**
