my life story as a Coptic Christian born and raised in Egypt in an environment of limited opportunities and scarce resources especially for Christian minorities Seeking the promise opportunity I came to the United States nearly 30 years ago as a young man As I flew westward on the plane it did not occur to me that I would become a prominent neurosurgeon with a practice in one of the great cities of America Nor did I anticipate that I would ever be in a position to fight for save lives and fight for patients lives protecting them from the specter of financial greed permeates the health care industry This book chronicles my journey in America from my early struggles to get past closed doors to my current practice serving the mission set before me with uncompromising zeal and devotion Eventually I became a prominent American neurosurgeon among the only 4000 active nationwide and the only one nationally and internationally to achieve five board certifications in five acknowledged medical disciplines My story takes the reader through my first hand experiences through the eight health care systems and Chicagos history of neuroscience over the last three decades providing an in depth view of the medical practices in the surrounding suburban communities My book also includes the lessons that I have learned my personal views and patient testimonials What I have faced and seen since my plane landed in this country in 1984 is almost inexpressible It is my sincere wish that others may find hope and inspiration from my story as well as an understanding of the challenges that the healthcare industry faces today along with my own passion for excellence in neuroscience as I confront them I owe my success to God to my cherished parents my teachers my mentors and most importantly my beloved patients

The development Situation in Malawi Great Britain: Parliament: House of Commons: International Development Committee, 2012-07-24 The Government should re instate its programme of General Budget Support for Malawi according to MPs on the International Development Committee The Department for International Development DFID suspended General Budget Support to Malawi the provision of funds directly to the Malawian exchequer in July 2011 preferring to provide its aid by other means This decision was taken in response to the policies of the then President of Malawi Bingu wa Mutharika His policies had created an economic and political crisis whilst his authoritarian tendencies were becoming ever more apparent the UK s High Commissioner had been expelled from Malawi for criticising Mutharika However following the death of President Mutharika in April this year his successor President Joyce Banda has begun to reverse many of his policies The currency has been devalued whilst the new Government has indicated its intention to repeal many of its predecessor s authoritarian measures Subject to the continued progress of reforms general budget support is likely to be the most efficient way of providing aid to Malawi

Nursing against the Odds Suzanne Gordon, 2012-05-15 In the United States and throughout the industrialized world just as the population of older and sicker patients is about to explode we have a major shortage of nurses Why are so many RNs dropping out of health care s largest profession How will the lack of skilled experienced caregivers affect patients These are some of the questions addressed by Suzanne Gordon s definitive account of the world s nursing crisis In *Nursing against the Odds* one of North America s leading health care journalists draws on in depth interviews research studies and extensive firsthand reporting to help readers better understand the myriad causes of and possible solutions to the current crisis Gordon examines how health care cost cutting and hospital restructuring undermine the working conditions necessary for quality care She shows how the historically troubled workplace relationships between RNs and physicians become even more dysfunctional in modern hospitals In Gordon s view the public image of nurses continues to suffer from negative media stereotyping in medical shows on television and from

shoddy press coverage of the important role RNs play in the delivery of health care Gordon also identifies the class and status divisions within the profession that hinder a much needed defense of bedside nursing She explains why some policy panaceas hiring more temporary workers importing RNs from less developed countries fail to address the forces that drive nurses out of their workplaces To promote better care Gordon calls for a broad agenda that includes safer staffing improved scheduling and other policy changes that would give nurses a greater voice at work She explores how doctors and nurses can collaborate more effectively and what medical and nursing education must do to foster such cooperation Finally Gordon outlines ways in which RNs can successfully take their case to the public while campaigning for health care system reform that actually funds necessary nursing care
