

The Biblical Doctrine of Original Sin¹

The outstanding importance of Scripture in the development of the doctrine and dogma of original sin does not need to be stressed. The scriptural influence was not the only one, but it was an all-important one. In the present re-assessment of traditional theology, it may be helpful to determine precisely what influences went into the shaping of the dogma and, among these influences, what was the precise contribution of the Bible and of late Jewish theology. The present paper is an attempted outline of the historical and conceptual factors which worked on the theology of the early Church and which, along with later Greek influence and patristic speculation, eventually led to the definitive fixation of the doctrine. It is not to be supposed that the dogma of original sin – *as* dogma – is to be found in the Bible. Our study will not be dogmatic but historical and inductive.

A doctrine of primordial sin presupposes an awareness of sin in the day-to-day existence of the Hebrew people, and must have been, to some extent, determined by that awareness. It was such an awareness of sin, and of the human condition which promoted actual sin, that led the Jahwist to present an aetiology of sin and suffering in Gen. 2–3. But it has to be asked whether he had the same concept of sin that we have. The English word 'sin' is a deeply religious one, meaning that which offends or outrages God. It is this aspect which is to the fore, rather than that of breaking a law or code.² To break the law is a *crimen*, and a *crimen* is not necessarily a sin.

Now when we examine the terminology of the Old Testament we find that there is no single word which reproduces our notion of *sin*, with its deep religious connotation. Hebrew has several words, each with its own peculiar theological (rather than 'religious') nuance. They all presuppose a certain established norm from which the offender deviates, thereby in-

2. Occasionally one meets with an etymology linking *sin* (German, *Sünde*) with the verb *to sunder*, which, if it were correct, would be theologically very convenient. But it appears incorrect. *Sin* is derived from the same root as the verb *to be* (cf. Latin: *sunt*, *sint*, *sons-sontis*; German: *sind*) – whatever the semantic implication may be!

Studies on the Abuse & Decline of Reason F.A. Hayek, 2024-05-31 Studies on the Abuse and Decline of Reason is a series of fascinating essays on the study of social phenomena How to best and most accurately study social interactions has long been debated intensely and there are two main approaches the positivists who ignore intent and belief and draw on methods based in the sciences and the nonpositivists who argue that opinions and ideas drive action and are central to understanding social behavior F A Hayek s opposition to the positivists and their claims to scientific rigor and certainty in the study of human behavior is a running theme of this important book Hayek argues that the vast number of elements whose interactions create social structures and institutions make it unlikely that social science can predict precise outcomes Instead he contends we should strive to simply understand the principles by which phenomena are produced For Hayek this modesty of aspirations went hand in hand with his concern over widespread enthusiasm for economic planning As a result these essays are relevant to ongoing debates within the social sciences and to discussion about the role government can and should play in the economy
