**Executive Briefing** Lawrence O'Gorman, Rangachar Kasturi, 1997 This new executive briefing describes the technical methods and systems used for document processing of text and graphical images These methods evolved from the fields of digital signal processing digital image processing and pattern recognition The briefing gives executives and managers vital information on document processing approaches and details how these methods apply in different situations If you are an executive manager or other decision maker whose business requires acquaintance or understanding of document processing this book will prove to be a valuable asset The briefing identifies major problem areas describes multiple methods that you can apply to each problem and discusses their advantages and disadvantages It includes both technology descriptions as well as references to technical papers that detail the techniques

**Handbook Of Character Recognition And Document Image Analysis** Horst Bunke, Patrick S P Wang, 1997-05-02 Optical character recognition and document image analysis have become very important areas with a fast growing number of researchers in the field This comprehensive handbook with contributions by eminent experts presents both the theoretical and practical aspects at an introductory level wherever possible

**Structured Document Image Analysis** Henry S. Baird, Horst Bunke, Kazuhiko Yamamoto, 2012-12-06 Document image analysis is the automatic computer interpretation of images of printed and handwritten documents including text drawings maps music scores etc Research in this field supports a rapidly growing international industry This is the first book to offer a broad selection of state of the art research papers including authoritative critical surveys of the literature and parallel studies of the architecture of complete high performance printed document reading systems A unique feature is the extended section on music notation an ideal vehicle for international sharing of basic research Also the collection includes important new work on line drawings handwriting character and symbol recognition and basic methodological issues The IAPR 1990 Workshop on Syntactic and Structural Pattern Recognition is summarized including the reports of its expert working groups whose debates provide a fascinating perspective on the field The book is an excellent text for a first year graduate seminar in document image analysis and is likely to remain a standard reference in the field for years

**Document Image Analysis** Horst Bunke, Patrick S P Wang, Henry S Baird, 1994-12-20 Interest in the automatic processing and analysis of document images has been rapidly increasing during the past few years This book addresses the different subfields of document image analysis including preprocessing and segmentation form processing handwriting recognition line drawing and map processing and contextual processing

**Document Image Analysis** Akmal Jahan MAC, Roshan G. Ragel, 2024-12-15 While Optical Character Recognition OCR techniques have made significant strides they often fall short when dealing with non text elements in documents This gap highlighted the need for comprehensive solutions that recognize text and accurately detect and reconstruct tables and other graphical components Our collaborative research efforts extensive experiments and continuous learning have culminated in developing the algorithms presented in this book a

testament to the power of teamwork in overcoming challenges The book is structured to provide a thorough understanding of the problem domain existing techniques and our proposed solutions We begin with an introduction to the challenges of digitizing printed documents highlighting the limitations of current OCR methods and the need for advanced table detection and recognition algorithms Subsequent chapters delve into detailed surveys of existing techniques followed by a comprehensive presentation of our algorithms We also explore the application of our enhanced algorithm in various scenarios showcasing its robustness and effectiveness

**Document Image Analysis** K.C. Santosh,2018-09-18 The book focuses on one of the key issues in document image processing graphical symbol recognition which is a sub field of the larger research domain of pattern recognition It covers several approaches statistical structural and syntactic and discusses their merits and demerits considering the context Through comprehensive experiments it also explores whether these approaches can be combined The book presents research problems state of the art methods that convey basic steps as well as prominent techniques evaluation metrics and protocols and research standpoints directions that are associated with it However it is not limited to straightforward isolated graphics visual patterns recognition it also addresses complex and composite graphical symbols recognition which is motivated by real world industrial problems
