# Do The Right Thing Readings In Applied Ethics And Social Philosophy

**Dean Hardy**

## **Do The Right Thing Readings In Applied Ethics And Social Philosophy:**

Legitimizing Human Rights Angus J.L. Menuge, 2016-04-22 When does the exercise of an interest constitute a human right The contributors to Menuge's edited collection offer a range of secular and religious responses to this fundamental question of the legitimacy of human rights claims The first section evaluates the plausibility of natural and transcendent foundations for human rights A further section explores the nature of religious freedom and the vexed question of its proper limits as it arises in the US European and global contexts The final section explores the pragmatic justification of human rights how do we motivate the recognition and enforcement of human rights in the real world This topical book should be of interest to a range of academics from disciplines spanning law philosophy religion and politics **To Everyone an Answer** Francis J. Beckwith, William Lane Craig, J. P. Moreland, 2009-08-20 In a society that believes anything goes the Christian worldview faces aggressive opposition Francis J Beckwith William Lane Craig and J P Moreland assembled the essays in this book covering all major aspects of apologetics to help you make a more coherent defense for the Christian faith **Persons, Moral Worth, and Embryos** Stephen Napier, 2011-06-21 Bioethicists have achieved consensus on two ideas pertaining to beginning of life issues 1 persons are those beings capable of higher order cognition or self consciousness and 2 it is impermissible to kill only persons As a consequence a consensus is reached regarding the permissibility of both destroying human embryos for research purposes and abortion The present collection aims to interact critically with this consensus Authors address various aspects of this orthodoxy Issues discussed include theories of personhood and in particular the role of thought experiments used in support of such theories the notion of an intrinsic potential and the moral relevance of having one new formulations of the virtue argument against abortion rights four dimensionalism and abortion the notion of moral status and who or what has it scientific accounts of what a human being is as well as addressing empirical evidence of fetal consciousness and analysis of the public policy implications given the epistemic status of pro choice arguments Given the issues discussed and that the arguments in critical focus are fairly new the collection provides a novel comprehensive and rigorous analysis of contemporary pro choice arguments *Relativism* Francis J. Beckwith, Gregory Kousser, 1998-10-01 An extremely well researched intellectual approach to the problem of relativism and its effect on education public policy and our everyday lives Youthworker **The Idea of God** Kenneth A. Dobbs, 2020-11-20 What holds society together How does civilization survive from collapsing in on itself In this work Kenneth A Dobbs describes how religion is the cause of civilization's rise and prosperity Beginning with psychological theories on human nature Dobbs establishes that humanity needs the religious values of truth beauty and goodness to flourish He then proves this psychological theory by analyzing religion's role in the historical developments of civilization in Mesopotamia Egypt Jerusalem Greece Rome and Christendom He also responds to rebuttals and objections against the thesis that religion is still necessary for modern civilization The Idea of God explores the historical political and philosophical implications of both the implementation and rejection of religion

within human civilization Dobbs articulates religion's necessary role in civilization while also provocatively predicting Western civilization's fate for rejecting religion societal collapse The book follows a long intellectual tradition of historians and philosophers who have argued a similar thesis including Polybius St Augustine Arnold Toynbee Russel Kirk Richard M Weaver and Christopher Dawson Dobbs reintroduces these classical ideas to the modern world **Welcome to College**

**2nd ed** Jonathan Morrow,2017-03-28 The single best volume I have ever read for preparing students for how to follow Jesus and flourish as his disciple in college J P Moreland Is there a more frightening question for a graduating high school senior than What will you do with your life In college whether they realize it or not students will answer that question every day with each decision All of the new friends and new experiences of higher education will shape their future It's critical that students know how to handle college before they're in the thick of it Jonathan Morrow tackles the tough questions that arise during these formative years including How do you grow spiritually How do you manage your time to both study well and have fun Is all truth relative Are there good reasons to be a Christian As a Christian how should you view issues like dating and sex Each chapter of this new edition has been updated and the author has included a new chapter on Christianity homosexuality and the Bible Grounded in both his own extensive experience and biblical truth Morrow's book is full of quick easy to read chapters and excellent advice **Taking Persons Seriously** Mihretu P. Guta,Scott B. Rae,2024-06-06 This

volume attempts to show why ontology matters for a proper grasp of issues in bioethics Contemporary discussions on bioethics often focus on seeking solutions for a wide range of issues that revolve around persons The issues in question are multi layered involving such diverse aspects as the metaphysical ontological personal medical moral legal cultural social political religious and environmental In navigating through such a complex web of issues it has been said that the central problems philosophers and bioethicists face are ethical in nature In this regard biomedical sciences and technological breakthroughs take a leading role in terms of shaping the sorts of questions that give rise to ethical problems For example is it ethical to keep terminally ill patients alive on dialysis machines or artificial ventilators Is it ethical to take someone's vital organs upon death and transplant them into another person's body without any prior consent from the deceased person Reproductive techniques also raise complicated ethical issues involving in vitro fertilization contraceptives prenatal testing abortions and genetic enhancements Moreover biomedical issues raise ethical problems regarding research on human subjects stem cell research and enhancement biotechnology The beginning and end of life issues bring up their own complicated ethical conundrums involving among other things terminating life support and euthanasia This book approaches such complex bioethical questions by engaging in ground level debates about the ontology of persons This is a nonnegotiable first step in taking steps forward in seeking a plausible solution's for the complex ethical problems in bioethics Politics for Christians Francis J. Beckwith,2012-05-20 Politics is concerned with citizenship and the administration of justice how communities are formed and governed The role of Christians in the political process is hotly contested but as citizens Francis

Beckwith argues Christians have a rich heritage of sophisticated thought as well as a genuine responsibility to contribute to the shaping of public policy. In particular, Beckwith addresses the contention that Christians or indeed religious citizens of any faith should set aside their beliefs before they enter the public square. What role should religious citizens take in a liberal democracy? What is the proper separation of church and state? What place should be made for natural rights and the moral law within a secular state? This cogent introduction to political thought surveys political science, politics, and government while making the case for how statecraft may genuinely contribute to soulcraft. Politics for Christians is part of The Christian Worldview Integration Series.

**Stand Your Ground** Dean Hardy, 2007-04-01 My freshman year of college was a battle writes Katie, a college student and a strong Christian. The transition from high school to college is one of the most pivotal times in a young person's life. After departing from under the protective wings of their parents, young adults often have trouble holding firm to the Christian faith. *Stand Your Ground* is an introduction to apologetics for young adults in high school or college. The book includes thirteen chapters that confront the overwhelming intellectual attacks Christian college students face on university campuses. Dean Hardy takes readers on a spiritual and intellectual journey addressing such issues as the nature of truth and reality, the investigation of other worldviews, the evidence for Christianity, critics' arguments against Christianity, and the relationship between apologetics and evangelism.

*The Rationality of Theism* Paul Copan, Paul Moser, 2004-07-31 *The Rationality of Theism* is a controversial collection of brand new papers by thirteen outstanding philosophers and scholars. Its aim is to offer comprehensive theistic replies to the traditional arguments against the existence of God, offering a positive case for theism as well as rebuttals of recent influential criticisms of theism.

Ethix Sean McDowell, 2006-10-15 With a unique blend of streetwise and scientific Christian teaching, the son of bestselling author Josh McDowell aims to help high school and college students make Bible-informed ethical decisions on issues including abortion, homosexuality, marriage, and divorce, and the morality of war.

Defending Life Francis J. Beckwith, 2007-08-13 *Defending Life* is arguably the most comprehensive defense of the pro-life position on abortion, morally, legally, and politically that has ever been published in an academic monograph. It offers a detailed and critical analysis of *Roe v. Wade* and *Planned Parenthood v. Casey*, as well as arguments by those who defend a Rawlsian case for abortion choice, such as J. J. Thomson. The author defends the substance view of persons as the view with the most explanatory power. The substance view entails that the unborn is a subject of moral rights from conception. While defending this view, the author responds to the arguments of thinkers such as Boonin, Dworkin, Stretton, Ford, and Brody. He also critiques Thomson's famous violinist argument and its revisions by Boonin and McDonagh. *Defending Life* includes chapters critiquing arguments found in popular politics and the controversy over cloning and stem cell research.

**Ethics and Politics** Amy Gutmann, Dennis Frank Thompson, 2006 Learn to recognize and assess the strengths and weaknesses of moral arguments in the making of public policy with *ETHICS AND POLITICS: CASES AND COMMENTS*. You'll find coverage of the ethics of process, the morally questionable means, violence,

deception and corruption that are most commonly used by public officials as well as the ethics of policy the valuable but often competing ends that public officials strive to achieve Conflicting values scarce resources and stakes as high as life and death combine with the duties of public office to make choices among policy goals controversial and morally difficult Each ethical issue is paired with case studies in contemporary American politics For example the controversy over the treatment of detainees at Guantanamo Bay or issues during the campaign and election of 2004

**Do the Right Thing** Francis J. Beckwith, 2002 Offering an outstanding balance of rigor and accessibility DO THE RIGHT THING 2E provides accessible impartial introductions to an excellent collection of readings in contemporary social issues Provocative study questions urge students to get to the heart of the debates Newly designed for this edition DO THE RIGHT THING is organized into three sections Part 1 introduces the student to the leading ethical theories while Parts 2 and 3 present the current issues including landmark court cases as well as differing viewpoints by not only leading philosophers but also economists legal scholars and scientists *American Book Publishing Record*, 2007

**The New Mormon Challenge** Zondervan, 2010-12-21 Current facts about Mormonism Over 11 million members Over 60 000 full time missionaries more than any other single missionary sending organization in the world More than 310 000 converts annually As many as eighty percent of converts come from Protestant backgrounds In Mormon circles the saying is We baptize a Baptist church every week Within fifteen years the numbers of missionaries and converts will roughly double Within eighty years with adherents exceeding 267 million Mormonism could become the first world religion to arise since Islam You may know the statistics What you probably don't know are the advances the Church of Jesus Christ of Latter day Saints LDS is making in apologetics and academic respectability With superb training Mormon scholars outclass many of their opponents Arguments against Mormon claims are increasingly refuted as outdated misinformed or poorly argued The New Mormon Challenge is a response to the burgeoning challenge of scholarly Mormon apologetics Written by a team of respected Christian scholars it is free of caricature sensationalism and diatribe The respectful tone and responsible rigorous yet readable scholarship set this book in a class of its own It offers freshly researched and well documented rebuttals of Mormon truth claims Most of the chapter topics have never been addressed and the criticisms and arguments are almost entirely new But The New Mormon Challenge does not merely challenge Mormon beliefs it offers the LDS Church and her members ways to move forward The New Mormon Challenge will help you understand the intellectual appeal of Mormonism and it will reveal many of the fundamental weaknesses of the Mormon worldview Whether you are sharing the gospel with Mormons or are investigating Mormonism for yourself this book will help you accurately understand Mormonism and see the superiority of the historic Christian faith Outstanding scholarship and sound methodology make this an ideal textbook The biblical historical scientific philosophical and theological discussions are fascinating and will appeal to Christians and Mormons alike Exemplifying Christian scholarship at its best The New Mormon Challenge pioneers a new genre of literature on Mormonism The Editors Francis J

Beckwith Carl Mosser and Paul Owen are respected authorities on the Church of Jesus Christ of Latter day Saints and the authors of various books and significant articles on Mormonism With contributors including such respected scholars as Craig L Blomberg William Lane Craig J P Moreland and others The New Mormon Challenge is as Richard Mouw states in his foreword an important event for both Protestant evangelicals and Mormons that models to the evangelical community what it is like to engage in respectful and meaningful exploration of a viewpoint with which we disagree on key points

*Why Human Rights?* Eric Blumenson, 2024-08-01 *Why Human Rights* addresses universal human rights as moral mandates rights to justice that all persons have by virtue of their humanity alone These are not the legal rights of statutes and treaties but moral rights of the kind Gandhi King and Mandela invoked to oppose unjust laws All such rights presuppose three claims 1 that some duties of justice apply universally 2 that all human beings have equal moral significance and 3 that states must protect or serve certain individual interests regardless of the societal impact of doing so Can these three premises be justified Is the human equality claim for example rationally supportable or is it no less faith based than hierarchical doctrines like caste This book explores the case for these foundational claims along with other philosophical controversies pertaining to human rights Because these issues lie at the heart of moral and political philosophy readers will also obtain a broad appreciation of these disciplines and their leading theorists including Mill Kant Rawls Sandel Nozick Rorty and many others Written in concise jargon free language this book presents a high relief map of the philosophical issues surrounding human rights

Law, Darwinism, and Public Education Francis J. Beckwith, 2002-12-24 In 1987 in *Edwards v Aguillard* the United States Supreme Court declared as unconstitutional a Louisiana statute requiring the state s public schools to teach creationism if evolution is taught and to teach evolution if creationism is taught It was a serious blow to creationism in public schools but a new movement since then has kept the debate alive That new movement is Intelligent Design Should Intelligent Design be taught in schools In *Law Darwinism Public Education* Francis J Beckwith asks whether teaching ID in public schools would be constitutional in light of the Supreme Court s decision in *Edwards v Aguillard* At that time the Court ruled that teaching creationism violates the Establishment Clause of the First Amendment of the U S Constitution Beckwith examines the Intelligent Design theory and the *Edwards* case to find out whether teaching ID would suffer the same fate if brought before the court

**Bioethics** Nancy Ann Silbergeld Jecker, Albert R. Jonsen, Robert A. Pearlman, 1997 This book is one of the only texts to cover the history methodology and practice of bioethics Compiling articles from well established bioethical thinkers Jecker et al have created an edited volume unique in its scope of topics addressed Bioethics will find use for both graduate students and professional students in law medicine nursing or other health related fields who will face bioethical issues in future careers

*Moral Philosophy: A Reader* Louis P. Pojman, Peter Tramel, 2009-09-01 This collection of classic and contemporary readings in ethics presents sharp competing views on a wide range of fundamentally important topics moral relativism and objectivism ethical egoism value theory utilitarianism deontological ethics virtue ethics ethics and

religion and applied ethics The Fourth Edition dramatically increases the volume's utility by expanding and updating the selections and introductions while retaining the structure that has made previous editions so successful
