Schools and Public Health

Michael Gard, Carolyn Pluim, 2014-06-18 Schools and Public Health is a meditation on the past present and future of the relationship between public health and American public schools Gard and Pluim begin by developing a historical account of the way schools have been used in the public health policy arena in America They then look in detail at more contemporary examples of school based public health policies and initiatives in order to come to a judgment about whether and to what extent it makes sense to use schools in this way With this as the foundation the book then offers answers to the question of

why schools have so readily been drawn into public health policy formulations First seeing schools as a kind of miracle factory is a long standing habit of mind that discourages careful consideration of alternative public health strategies Second schools have been implicated in public health policy in strategic ways by actors often with unstated political cultural ideological and financial motivations Finally the authors call for a more sophisticated approach to public health policy in schools and suggest some criteria for judging the potential efficacy of school based interventions In short the potential effectiveness of proposed interventions needs to be assessed not only against existing historical evidence but also against the competing roles society expects schools to play and the working life realities for those charged with implementing public health policies in schools **The Oil and Gas Journal** ,1931-10 *Proceedings of the Royal Geographical Society and Monthly Record of Geography* Royal Geographical Society (Great Britain),1880 *The Journal of the Acoustical Society of America* Acoustical Society of America,2002 Re-Imagining Labour Law for Development Diamond Ashiagbor,2019-07-25
