Algae Abstracts Guide To The Literature Volume 3:

Selected Water Resources Abstracts ,1991 Algae Abstracts Office of Water Resources Research Staff,2013-11-11

Algae Abstracts is the first in a series of bibliographies on water resources and pollution published by IFI Plenum Data Corporation in cooperation with the Water Resources Scientific Information Center WRSIC. It is produced wholly from the information base comprising material abstracted and indexed for *Selected Water Resources Abstracts*. The bibliography is divided into volumes according to the publication dates of the source documents. Volume 1 contains 569 abstracts covering publication dates up to and including 1969. Volume 2 contains 730 abstracts covering the years 1970 to 1972. The material included in this bibliography represents computer selections based on the presence of a form of the word alga somewhere in the referenced citation. Substantively, the material typifies WRSIC's centers of competence approach to information support of the Office of Water Resources Research OWRR of the Department of the Interior. Most of the references in this bibliography are the work of the center of competence on eutrophication at the University of Wisconsin. The indexes refer to the WRSIC accession number which follows each abstract. The Significant Descriptor Index is made up of a fraction of the total descriptors and identifiers by which each paper has been indexed. It represents weighted terms that best describe the information content; this status is indicated by the asterisks which precede them. The General Index includes all the remaining descriptors and identifiers by which each paper in this bibliography has been indexed.
