Elementary Mathematics Curriculum Materials Janine T. Remillard,Ok-Kyeong Kim,2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors *Resources in Education* ,2001-04 **Catalog of Copyright Entries. processes over the long term The contributors also provide a comparative view in terms of contrasting selected phenomena across different educational cultures and education systems For instance they consider how differences in curriculum resources are available to teachers and how teachers make use of them to shape instruction Coverage also considers the extent to which teachers make use of additional material particularly those available through the global marketplace on the Internet This book builds on works from the Resources 2018 Conference Understanding teachers work through their interactions with resources for teaching held in Lyon France **Instructor**, 1979 Food Service Rebecca Thompson, 1991
