Algebraic L Theory And Topological Manifolds:

   Algebraic L-theory and Topological Manifolds Andrew Ranicki,1992-12-10 Assuming no previous acquaintance with surgery theory and justifying all the algebraic concepts used by their relevance to topology Dr Ranicki explains the applications of quadratic forms to the classification of topological manifolds in a unified algebraic framework   , <u>Index Theory, Coarse Geometry, and Topology of Manifolds</u> John Roe,1996 Lecture notes from the conference held Aug 1995 in Boulder Colo   *Novikov Conjectures, Index Theorems, and Rigidity: Volume 1* Steven C. Ferry,Andrew Ranicki,Jonathan M. Rosenberg,London Mathematical Society,1995-11-23 The Novikov Conjecture is the single most important unsolved problem in the topology of high dimensional non simply connected manifolds These volumes are the outgrowth of a conference held at the MathematischesForschungsinstitut Oberwolfach Germany in September 1993 on the subject of Novikov conjectures index theorems and rigidity   **Novikov Conjectures, Index Theorems and Rigidity** Steven C. Ferry,Andrew Ranicki,Jonathan Micah Rosenberg,London Mathematical Society,1995 Volume 2 contains fundamental long research papers by G Carlsson on Bounded K theory and the assembly map in algebraic K theory and by S Ferry and E Pedersen on Epsilon surgery theory shorter research and survey papers on various topics related to the Novikov Conjecture by Bekka Cherix Valette Eichhorn Ferry Higson Roe Hurder Pedersen Pedersen Roe Weinberger Thomas Troitsky and Weiss Williams   **The Abel Prize 2008-2012** Helge Holden,Ragni Piene,2014-01-21 Covering the years 2008 2012 this book profiles the life and work of recent winners of the Abel Prize John G Thompson and Jacques Tits 2008 Mikhail Gromov 2009 John T Tate Jr 2010 John W Milnor 2011 Endre Szemer di 2012 The profiles feature autobiographical information as well as a description of each mathematician s work In addition each profile contains a complete bibliography a curriculum vitae as well as photos old and new As an added feature interviews with the Laureates are presented on an accompanying web site http extras springer com The book also presents a history of the Abel Prize written by the historian Kim Helsvig and includes a facsimile of a letter from Niels Henrik Abel which is transcribed translated into English and placed into historical perspective by Christian Skau This book follows on The Abel Prize 2003 2007 The First Five Years Springer 2010 which profiles the work of the first Abel Prize winners   **Lower K- and L-theory** Andrew Ranicki,1992-05-21 This is the first unified treatment in book form of the lower K groups of Bass and the lower L groups of the author   **Functional Analysis on the Eve of the 21st Century** Simon Gindikin,James Lepowsky,Robert Wilson,2012-12-06 A four day conference Functional Analysis on the Eve of the Twenty First Century was held at Rutgers University New Brunswick New Jersey from October 24 to 27 1993 in honor of the eightieth birthday of Professor Israel Moiseyevich Gelfand He was born in Krasnye Okna near Odessa on September 2 1913 Israel Gelfand has played a crucial role in the development of functional analysis during the last half century His work and his philosophy have in fact helped to shape our understanding of the term functional analysis itself as has the celebrated journal Functional Analysis and Its Applications which he edited for many years Functional analysis appeared at the

beginning of the century in the classic papers of Hilbert on integral operators Its crucial aspect was the geometric interpretation of families of functions as infinite dimensional spaces and of op erators particularly differential and integral operators as infinite dimensional analogues of matrices directly leading to the geometrization of spectral theory This view of functional analysis as infinite dimensional geometry organically included many facets of nineteenth century classical analysis such as power series Fourier series and integrals and other integral transforms   Affine Hecke Algebras and Orthogonal Polynomials I. G. Macdonald,2003-03-20 First account of a theory created by Macdonald of a class of orthogonal polynomial which is related to mathematical physics   Solitons Tetsuji Miwa,Michio Jimbo,E. Date,2000 The notion of solitons arose with the study of partial differential equations at the end of the 19th century In more recent times their study has involved ideas from other areas of mathematics such as algebraic gometry topology and in particular infinite dimensional Lie algebras and it this approach that is the main theme of this book This book will be of great interest to all whose research interests involves the mathematics of solitons
