Algorithm Synthesis A Comparative Study:

Algorithm Synthesis D. M. Steier, A. P. Anderson, 1989 Algorithm Synthesis: A Comparative Study David M. Steier, A. Penny Anderson, 2012-12-06 In early 1986 one of us D M S was constructing an artificial intelligence system to design algorithms and the other A P A was getting started in program transformations research We shared an office and exchanged a few papers on the systematic development of algorithms from specifications Gradually we realized that we were trying to solve some of the same problems And so despite radical differences between ourselves in research approaches we set out together to see what we could learn from these papers That s how this book started a couple of graduate students trying to cope with The Literature At first there was just a list of papers One of us D M S tried to cast the papers in a uniform framework by describing the problem spaces searched an approach used in artificial intelligence for understanding many tasks The generalized problem space descriptions though useful seemed to abstract too much so we decided to compare papers by different authors dealing with the same algorithm These comparisons proved crucial for then we began to see similar key design choices for each algorithm
