engineer it I think that his explanation of what's going on and his theory that he's utilizing is probably not on target In plain English Bob described real events but he used wrong theory when trying to explain the observations But now we have the right theory this book starts with it though you can skip it except for chapter 1 which is must read and it checks out with Bob Lazar's anecdotes Reading this book does not require advanced knowledge of physics A teenager with the help of a science teacher or with the help of the Internet can understand it Understanding reflection and refraction would be enough to start with This book can be read two ways Chapter by chapter but that might be boring to you Better try another way read chapter 1 to get a grasp on time dilation redshift and refraction Then jump to chapter 13 and continue reading there sometimes going back to earlier chapters when they are referenced Engineers check chapter 30 first like a fridge once impossible Bob Lazar's craft becomes possible Everybody else check chapter 39 first it gives a general impression on how physics solves Bob Lazar's story

**Time Matters: 6th edition** Alexandre Kassiantchouk, This book solves many long standing problems in physics and cosmology and provides you with a new more realistic perspective on our world Spacetime is regular Space filled with Time and not 4 dimensional surrogate Time is Quantum Fluctuations like Temperature is Brownian Motion Gravity is Time Pressure Milky Way and Bob Lazar's craft use the same propulsion There was no Big Bang Galaxies were materialized by burning time with shooting star like fireworks of matter with such events randomly scattered in space and in time check chapter 51 on how Matter antimatter imbalance is local to a galaxy but balanced in the Universe

**Beyond Cutting Edge with Bob Lazar, 3rd edition** Alexandre Kassiantchouk, After Big Bang Dark Matter Dark Energy and Universe expansion debunking in my book Time Matters from 2021 I asked myself How hard could it be to validate Bob Lazar's story So I started with the frozen candle episode because it was about time dilation and because this episode on the surface contradicted my own experience described in chapter 12 But all new physics has checked out The same result was with another episode and another Now I agree with Dr Edgar Mitchell Apollo 14 Astronaut who said about Bob Lazar His basic story is true that he was too exposed to what he thought were alien craft and attempts to engineer and back engineer it I think that his explanation of what's going on and his theory that he's utilizing is probably not on target In plain English Bob described real events but he used wrong theory when trying to explain the observations But now we have the right theory this book starts with it though you can skip it except for chapter 1 which is must read and it checks out with Bob Lazar's anecdotes

**Time Matters: 10th edition** Alexandre Kassiantchouk, 2024-06-08  
Einstein s mistakes in mass and energy corrected There is no curved spacetime only time dilation Major problems in cosmology and UFO physics solved

*Time Matters* Alexandre Kassiantchouk, Two and a half years ago I started this book with an explanation of why the ancient Universe is red or infrared and how spiral galaxies counter centrifugal force from breaking them Now I finish it with an explanation of how galaxies appeared from nothing but space and time where antimatter is and what Black Holes really are In the preface you will find a list of long standing problems solved in this book Chapter 1 introduces you to time dilation and its optical effects redshift and refraction which mislead scientists for about 100 years to wrong mechanical conclusions After reading it feel free to jump to almost any chapter for example Physicists please chapters 77 80 83 first to get the taste of good physics Engineers please check chapters 67 and 81 first UFO doubters please start with chapters 78 79 85 I hope you enjoy reading my book as I enjoyed writing it

*Beyond Cutting Edge with Bob Lazar* Alexandre Kassiantchouk, 2022-01-27 After Big Bang Dark Matter Dark Energy and Universe expansion debunking in my book *Time Matters* from 2021 I asked myself How hard could it be to validate Bob Lazar s story So I started with the frozen candle episode because it was about time dilation and I am good at it And besides this episode on the surface

contradicted with my own experience described in chapter 12 But all new physics has checked out The same result was with another episode and another Now I agree with Dr Edgar Mitchell Apollo 14 Astronaut who said about Bob Lazar His basic story is true that he was too exposed to what he thought were alien craft and attempts to engineer and back engineer it I think that his explanation of what's going on and his theory that he's utilizing is probably not on target In plain English Bob described real events but he used wrong theory when trying to explain the observations But now we have the right theory this book starts with it though you can skip it except for chapter 1 which is must read and it checks out with Bob Lazar's anecdotes Reading this book does not require advanced knowledge of physics A teenager with the help of a science teacher or with the help of the Internet can understand it Understanding reflection and refraction would be enough to start with

Approaching the World's Religions, Volume 1 Robert Boyd, 2017-05-04 Philosophically Thinking about World Religions is different from other works in the discipline today It deviates from the typical approaches used for the study of world religions Its goal is to engage readers in thinking hard about world religions not about the data surrounding those traditions By focusing on philosophical questions each reader should be challenged to do their own investigations that may reveal the heart of these traditions Another stance that this project takes that distinguishes it from other texts in the discipline is that it advocates an inclusivist perspective regarding the world religions Pluralism which is the predominate assumption today ends either in contradiction or in the development of a metatheory that dismisses crucial distinctions between the various traditions or eliminates some ancient religions because they do not fit the metatheory By taking an open inclusivist approach all religious traditions may engage at the table of dialogue The final essay is about justice and social affairs While that discussion is couched within the context of a particular tradition each religious tradition must have the discussion But it must be more than an intrareligious dialogue it must become an interreligious dialogue **Alice's Adventures in Wonderland**

**Philosophical Instruments** Daniel Rothbart, 2024-03-18 The surprising roles of instruments and experimentation in acquiring knowledge In Philosophical Instruments Daniel Rothbart argues that our tools are not just neutral intermediaries between humans and the natural world but are devices that demand new ideas about reality Just as a hunter's new spear can change their knowledge of the environment so can the development of modern scientific equipment alter our view of the world Working at the intersections of science technology and philosophy Rothbart examines the revolution in knowledge brought on by recent advances in scientific instruments Full of examples from historical and contemporary science including electron scanning microscopes sixteenth century philosophical instruments and diffraction devices used by biochemical researchers Rothbart explores the ways in which instrumentation advances a philosophical stance about an instrument's power an experimenter's skills and a specimen's properties Through a close reading of engineering of instruments he introduces a philosophy from rather than of design contending that philosophical ideas are channeled from design plans to

models and from model into the use of the devices      **Cancelled** Umut Ozkirimli, 2023-03-09 Right now someone somewhere is being cancelled Off the cuff tweets or harmless office banter have the potential to wreck lives The Left condemns the Right and the bigotry of the old elites The Right complains about brain dead political correctness In reality both sides are colluding in a reactionary politics that is as self defeating as it is divisive Can the Left escape this extremism and stay true to the progressive ideals it once professed In this provocative book Umut Ozkirimli reveals how the Left has been sucked into a spiral of toxic hatred and outrage mongering retreating from the democratic ideals of freedom and pluralism that it purports to represent Exploring the similarities between right wing populism and radical identity politics he sets out an alternative vision It is only by focusing on our common humanity and working across differences that the Left will find a constructive and consensual way back from woke
