Hans, 2002-01-26 Challenging prevailing trends toward aesthetic neutrality James S Hans argues that there is such a thing as good and bad taste that taste is something one is born with and that it is firmly rooted in the mechanics of biology Taste is everything Hans says for it produces the primary values that guide our lives Taste is the fundamental organizing mechanism of human bodies a lifelong effort to fit one s own rhythms to the rhythms and patterns of the natural world and the larger human community It is an aesthetic sorting process by which one determines what belongs in a conversation a curriculum a committee a piece of art a meal a logical argument and what should be left out On the one hand taste is the source of beauty justice and a sense of the good On the other hand as an arbiter of the laws of fair and free play taste enters into more ominous and destructive patterns but patterns nonetheless of resentment and violence Hans develops his conception of taste through astute readings of five literary landmarks Milan Kundera s *The Unbearable Lightness of Being* Sophocles *Oedipus the King* William Faulkner s *Light in August* and the poetry of Emily Dickinson and the Polish Nobel Laureate Czeslaw Milosz These texts explore the art of soulmaking and the quest for personal expression the costs as well as the fruits that come from acceding to the imperatives of one s being They also reveal

how the collision of personal and collective rhythms whether in the Greek citadel or the Mississippi countryside leads to violence and ritualized sacrifice Elegant principled and provocative *The Sovereignty of Taste* is an essential book that restores taste to its rightful place of influence shoring up the ground beneath civilization's feet and offering hope for the future of integrity value and aesthetic truth **TASTE** Andrea Pavoni, Danilo Mandic, Caterina Nirta, Andreas Philippopoulos-Mihalopoulos, 2018-07-25 Taste usually occupies the bottom of the sensorial hierarchy as the quintessentially hedonistic sense too close to the animal the elemental and the corporeal and for this reason disciplined and moralised At the same time taste is indissolubly tied to knowledge To taste is to discriminate emit judgement enter an unstable domain of synaesthetic normativity where the certainty of metaphysical categories begins to crumble This second title in the Law and the Senses series explores law using taste as a conceptual and ontological category able to unsettle legal certainties and a promising tool whereby to investigate the materiality of law's relation to the world For what else is law's reduction of the world into legal categories if not law's ingesting the world by tasting it and emitting moral and legal judgements accordingly Through various topics including coffee wine craft cider and Japanese knotweed this volume explores the normativities that shape the way taste is felt and categorised within and beyond subjective phenomenological and human dimensions The result is an original interdisciplinary volume complete with seven speculative recipes dedicated to a rarely explored intersection with contributions from artists legal academics philosophers anthropologists and sociologists [How Alien Would Aliens Be?](#) John A. Cramer, 2001-07-20 How alien would aliens be Would they look like us or perhaps more like an octopus How would they communicate Could we even hear their voices assuming they have them Like us aliens would be constrained by the physical world Understanding how those physical constraints apply both to us and to aliens is the theme of this book The constraints imply that they will not be all that different from us perhaps half to twice as big as we are They will depend on vision and hearing as we do and they will live on a planet much like ours But where will they be Do they even exist The odds are not good We may be the only intelligent life in the universe **Cosmic Dishes and Tales from the Universe and Beyond** Brenda Dunams, 2023-10-10 Discover the secrets of alien spices cosmic marinades and meteoric desserts Whether you're a seasoned chef or a budding cook Galactic Delights offers something for everyone Unleash your creativity and experiment with dishes that are truly out of this world Dive deep into the captivating world of peaceful and warring gods as we unravel the mysteries of their celestial realms In this enlightening journey we'll delve into the duality of ancient deities exploring their benevolent nature and their fierce battles for power *From Angels to Aliens* Lynn Schofield Clark, 2005-10-27 Harry Potter Buffy the Vampire Slayer and the Left Behind series are but the latest manifestations of American teenagers' longstanding fascination with the supernatural and the paranormal In this groundbreaking book Lynn Schofield Clark explores the implications of this fascination for contemporary religious and spiritual practices Relying on stories gleaned from more than 250 in-depth interviews with teens and their families Clark seeks to discover what today's

teens really believe and why She finds that as adherence to formal religious bodies declines interest in alternative spiritualities as well as belief in superstition grow accordingly Ironically she argues fundamentalist Christian alarmism about the forces of evil has also fed belief in a wider array of supernatural entities Resisting the claim that the media brainwash teens Clark argues that today s popular stories of demons hell and the afterlife actually have their roots in the U S s religious heritage She considers why some young people are nervous about supernatural stories in the media while others comfortably and often unselfconsciously blur the boundaries between those stories of the realm beyond that belong to traditional religion and those offered by the entertainment media At a time of increased religious pluralism and declining participation in formal religious institutions Clark says we must completely reexamine what young people mean and what they may believe when they identify themselves as spiritual or religious Offering provocative insights into how the entertainment media shape contemporary religious ideas and practices From Angels to Aliens paints a surprising and perhaps alarming portrait of the spiritual state of America s youth

Semi-Detached Empire Todd Kuchta, 2010-03-24 In the first book to consider British suburban literature from the vantage point of imperial and postcolonial studies Todd Kuchta argues that suburban identity is tied to the empire's rise and fall Like the semi detached house which joins separate dwellings under one roof suburbia and empire were geographically distinct but imaginatively linked Yet just as the semi conceals two homes behind a single facade suburbia's apparent uniformity masks its defining oppositions between country and city civilization and savagery master and slave

A Taste of Progress Nelleke Teughels, Peter Scholliers, 2016-03-09 World exhibitions have been widely acknowledged as important sources for understanding the development of the modern consumer and urbanized society yet whilst the function and purpose of architecture at these major events has been well studied the place of food has received very little attention Food played a crucial part in the lived experience of the exhibitions for visitors who could acquaint themselves with the latest food innovations exotic cuisines and traditional dishes for officials attending lavish banquets for the manufacturers who displayed their new culinary products and for scientists who met to discuss the latest technologies in food hygiene Food stood as a powerful semiotic device for communicating and maintaining conceptions of identity history traditions and progress of inclusion and exclusion making it a valuable tool for researching the construction of national or corporate sentiments Combining recent developments in food studies and the history of major international exhibitions this volume provides a refreshing alternative view of these international and intercultural spectacles

will destroy her foes with their pathetic hardened glass weapons and leather armour Unfortunately Drome isn't the most gifted of people when it comes to discretion Or thinking things through The consequences hurl him down a path riddled with folk keen to boil him alive stick pointy objects in his tender flesh or blow him into tiny pieces With the real queen gunning for him too Drome reluctantly embarks on a secret mission to fix the mess he started The civilised world depends on him All he has to do is end a savage war With a princess and a sorcerer on his side what could possibly go wrong If you like Terry Pratchett Douglas Adams and Joe Abercrombie you won't be able to put down the addictive Hollow series
