Gould,1977 Discusses the position of women throughout history and the events that have brought about a change in their status and experiences **Peace Or War** Marion Bressler,Leo Bressler,1977 Critical Strategies for Social Research William K. Carroll,2004 Edited by Canadian sociologist William K Carroll this thought provoking volume is designed for research methods courses in sociology and social sciences Critical Strategies for Social Research explores ways in which several key research strategies bring an emancipatory dimension to social analysis The new approaches recognize that social analysis is a form of knowledge production that takes place in a human constructed world marked by injustice and persistent inequality Carroll considers five influential and productive strategies of inquiry Dialectical Social Analysis Institutional Ethnography Participatory Action Research Critical Discourse Analysis Social Inquiry as Communicative Reason *EPIE Report* EPIE Institute,1975 **Subject Catalog** Library of Congress, **Critical Social Issues in American Education** H. Svi Shapiro,David E. Purpel,2004-09-22 This text reader brings together powerful readings that critically situate issues of education in the context of the major cultural moral political economic ecological and spiritual crises that confront us as a nation and a global community It provides a focus and a conceptual framework for thinking about education in light of these issues Readers are exposed to the thinking of some of the best and most insightful social and educational commentators Critical Social Issues in American Education Democracy and Meaning in a Globalizing World Third Edition is intended to work on two levels First it helps readers to develop an awareness of how education is connected to the wider social structures of cultural political and economic life Second it encourages not only a critical examination of our present social reality but also a serious discussion of alternatives of what a transformed society and educational process might look like The editors goal is to deliberately engage readers in connecting the work of teachers to an ethically committed politically charged pedagogy The assumption on which they base the text is that educators must see their work as inextricably linked to the broader conflicts stresses and crises of the social world it is not otherwise possible to make sense of what is happening

educationally What happens in school or as part of the educational experience reflects expresses and mediates profound questions about the direction and nature of the society we inhabit The text is organized thematically into five sections which address respectively social justice and democracy consumerism culture and public education marginality and difference moral and spiritual perspectives on education and globalization and education Each section is preceded by a brief essay that introduces the readings This Third Edition includes many new readings and addresses issues that have more recently emerged as especially significant such as concerns about the implications of globalization and the post 9 11 world commercialism violence and the ever increasing influence of high stakes testing This compelling text is relevant for a wide range of courses in educational foundations educational policy curriculum studies and multicultural education that address the social context of education cultural and political change and public policy

Research Issues National Institute on Drug Abuse,1974 **Research Issues** ,1975 Theories of Alienation R.F. Geyer,D.R. Schweitzer,2012-12-06 The original papers which appear in this volume were initially presented in a series of sessions of the Ad Hoc Group on Alienation Theory and Research at the 1974 World Congress of Sociology in Toronto Canada This group was organized by the editors as a result of their longstanding research and teaching interest in the field The purpose of the Toronto sessions was to provide an international forum where scholars and researchers could come to gether for a personal exchange of ideas and research findings To our know ledge this was the first forum of its kind concerned specifically with aliena tion theory and research More than fifty theoretical and empirical papers from thirteen countries and several overlapping disciplines were organized into panels and workshops during the span of four days The response to these sessions indicates that interest in the study of alienation by philosophers and social scientists continues unabated The Toronto sessions were organized largely around a fundamental concern for further theoretical development and conceptual clarification in the alienation field The papers selected for this volume reflect this thematic concern Although many excellent empirical papers were presented it was generally felt that meaningful empirical research would benefit from a continued elaboration and refinement of alienation theory The present collection is consequently geared to problems of meaning theory and method Considerable emphasis is also placed on a critical evaluation of the alienation theme as it has evolved from social philosophy to empirical social research

Critical Social Policy and the Capability Approach Hans-Uwe Otto,Holger Ziegler,2014-09-17 The European welfare state as well as the political space of the social is currently being reorganised in a fundamental way This has major implications for any attempt to contribute to a more just or even emancipatory way of shaping the social The authors discuss what the Capabilities Approach may contribute to this attempt Rather than assessing the philosophical foundation of this approach Shaping the Social critically discusses the potentials and pitfalls of analysing social and labour market policy and in particular social services from a capabilities perspective
