Sarah Marusek, 2021-02-11 This book addresses the legal geographical implications of the fact that landscapes are not static but dynamic Within the field of legal geography the spatial relationship of law to landscape is usually considered to be static Environments are often considered fixed and consequently inert as places that literally don't go anywhere Typically then it is what happens in these places rather than the place itself that commands academic attention In contrast to this static viewpoint Law and the Kinetic Environment considers how many landscapes are in flux and as a result may be seen as dynamic Natural phenomena such as oozing lava moving glaciers or bubbling geothermal pools challenge and test the normative conceptualizations of stability of place property ownership and legal regulation Consequently such dynamic landscapes enliven and transform law offering new jurisprudential insights into what law is and how it operates in response to the kineticism that this book argues is to some degree inherent in all landscapes This original engagement with legal geography will appeal to those with general interests in this area as well as specific concerns with questions of law and place property and the environment *Evolution "On Purpose"* Peter A. Shapiro, Richard I. Vane-Wright, 2023-08-22 A unique exploration of teleonomy also known as evolved purposiveness as a major influence in evolution by a broad range of specialists in biology and the philosophy of science The evolved purposiveness of living systems termed teleonomy by chronobiologist Colin Pittendrigh has been both a major outcome and causal factor in the history of life on Earth Many theorists have appreciated this over the years going back to Lamarck and even Darwin in the nineteenth century In the mid twentieth century however the complex dynamic process of evolution was simplified into the one way bottom up single gene centered paradigm widely known as the modern synthesis In *Evolution On Purpose* edited by Peter A Corning Stuart A Kauffman Denis Noble James A Shapiro Richard I Vane Wright and Addy Pross some twenty theorists attempt to modify this reductive approach by exploring in depth the different ways in which living systems have themselves shaped the course of evolution *Evolution On Purpose* puts forward a more inclusive theoretical synthesis that goes far beyond the underlying principles and assumptions of the modern synthesis to accommodate work since the 1950s in molecular genetics developmental biology epigenetic inheritance genomics multilevel selection niche construction physiology behavior biosemiotics chemical reaction theory and other fields In the view of the authors active biological processes are responsible for the direction and the rate of evolution Essays in this collection grapple with topics from the two way read write genome to cognition and decision making in plants to the niche construction activities of many organisms to the self making evolution of humankind As this collection compellingly shows and as bacterial geneticist James

Shapiro emphasizes The capacity of living organisms to alter their own heredity is undeniable **Environmental Justice and the Rights of Ecological Refugees** Laura Westra,2009-09-02 Climate change and other environmental problems are increasingly leading to the displacement of populations from their homelands whether this be through drought flooding famine or other causes Worse there is currently no protection in international law for people made refugees by such means A 2020 vision for food, agriculture, and the environment International Food Policy Research Institute and the National Geographic Society, Washington D.C.,1995-06-15 Speeches from the 2020 conference The Vision Challenge and Recommended Action June 13 15 1995 Washington DC **International Environmental Affairs** ,1991 **Sustainable Landscape Construction, Third Edition** Kim Sorvig,J.
