Summerell, 1998 This volume offers essays on the nature of God and the fundamental tasks of philosophy and theology written by internationally recognized thinkers in the distinct fields of philosophy religious studies and theology *The Otherness of God* traces the lineage of its theme from Plato and Aristotle through Neoplatonic medieval and Renaissance expression and on through Reformation thought and German idealism to dialectical theology and deconstruction This provocative collection drawn primarily from an interdisciplinary conference at the University of Virginia should attract those interested in the philosophy of religion the history of philosophy and theology and the theological interpretation of secular culture

**Meditation as Spiritual Therapy** Matthew McWhorter, Matthew R. McWhorter, 2024 Christian persons today might seek spiritual development and ponder the benefit of mindfulness exercises but also maintain concerns if they perceive such exercises to originate from other religious traditions Such persons may not be aware of a long tradition of meditation practice in Christianity that promotes personal growth This spiritual tradition receives a careful formulation by Christian monastic authors in the twelfth century One such teaching on meditation is found in the treatise *De consideratione* written by St Bernard of Clairvaux d 1153 to Pope Eugene III d 1153 In textual passages where St Bernard exhibits a clear concern for the mental health of the Pope due to numerous ongoing ecclesial political and military problems St Bernard reminds Eugene III of his original monastic vocation and the meditation exercises associated with that vocation The advice that St Bernard gives to Eugene III can be received today in a way that provides a structure for Christian meditation practice which is relevant for personal development spiritual direction and civil psychotherapy that integrates a client's spirituality into the course of treatment St Bernard thus might be interpreted as a teacher of a kind of Christian mindfulness that can benefit both a person's mental health as well as a person's relationship with God *Meditation as Spiritual Therapy* examines the historical context of Bernard's work his purpose for writing it as well as the numerous Christian sources he drew upon to formulate his teaching Bernard's teaching on the course of meditation itself is explored in depth and in dialogue with his other treatises letters and sermons Lastly a contemporary summary of Bernard's teaching is provided with reflections concerning the relationship of this teaching to contemporary spiritual direction and spiritually integrated civil psychotherapy

**Emotions in Ancient and Medieval Philosophy** Simo Knuuttila, 2004 The first part of the book covers the theories of the emotions of Plato and Aristotle and later ancient views from Stoicism to Neoplatonism Ch 1 and their reception and transformation by early Christian thinkers from Clement and Origen to Gregory of Nyssa Cassian and Augustine Ch 2 The basic ancient alternatives were the compositional theories of Plato and Aristotle and their followers and the Stoic judgement theory These were associated with different conceptions of philosophical therapy Ancient theories were employed in early Christian discussions of sin Christian love mystical union and other forms of spiritual experience The most influential theological themes were the monastic idea of supernaturally caused feelings and Augustine's analysis of the relations between the emotions and the will The first part of Ch 3 deals with the twelfth century reception of ancient themes through monastic theological medical and philosophical literature The subject of the second part is the theory of emotions in Avicenna's faculty psychology which to a great extent dominated the philosophical discussion of emotions in early thirteenth century This approach was combined with Aristotelian ideas in later thirteenth century particularly in Thomas Aquinas extensive taxonomical theory The increasing interest in psychological voluntarism led many Franciscan authors to abandon the traditional view that emotions belong only to the lower psychosomatic level John Duns Scotus William Ockham and their followers argued that there are also emotions of the will Chapter 4 is about these new issues introduced in early fourteenth century discussions with some remarks on their influence

on early modern thought      **Religions, Reasons and Gods** John Clayton, 2006-11-25 Traditional theistic proofs are often understood as evidence intended to compel belief in a divinity John Clayton explores the surprisingly varied applications of such proofs in the work of philosophers and theologians from several periods and traditions thinkers as varied as Ramanuja al Ghazali Anselm and Jefferson He shows how the gradual disembedding of theistic proofs from their diverse and local religious contexts is concurrent with the development of natural theologies and atheism as social and intellectual options in early modern Europe and America Clayton offers a fresh reading of the early modern history of philosophy and theology arguing that awareness of such history and the local uses of theistic argument offer important ways of managing religious and cultural difference in the public sphere He argues for the importance of historically grounded philosophy of religion to the field of religious studies and public debate on religious pluralism and cultural diversity      **Measure of a Different Greatness** Anne Davenport, 2021-10-11 This volume examines a selection of late medieval works devoted to the intensive infinite in order to draw a comprehensive picture of the context character and importance of scholastic efforts to reason philosophically about divine infinity As Dominican masters face Franciscan spirituals and as university trained theologians face evangelical laymen the purpose and meaning of divine infinity shift reflecting a basic tension between the Church's Petrine vocation for geopolitical orthodoxy and its more Pauline mission to promote Christian orthopraxis The first part of the book traces the scholastic defense of divine infinity from the holocaust of Montségur up to John Duns Scotus The second part examines the semiotic breakthrough initiated by William of Ockham and the subsequent penetration of infinitist theory into a wide variety of disciplines      **Human Nature in Early Franciscan Thought** Lydia Schumacher, 2023-01-19 In this book Lydia Schumacher challenges the common assumption that early Franciscan thought simply reiterates the longstanding tradition of Augustine She demonstrates how scholars from this tradition incorporated the work of Islamic and Jewish philosophers whose works had recently been translated from Arabic with a view to developing a unique approach to questions of human nature These questions pertain to perennial philosophical concerns about the relationship between the body and the soul the work of human cognition and sensation and the power of free will By highlighting the Arabic sources of early Franciscan views on these matters Schumacher illustrates how scholars working in the early thirteenth century anticipated later developments in Franciscan thought which have often been described as novel or unprecedented Above all her study demonstrates that the early Franciscan philosophy of human nature was formulated with a view to bolstering the order's specific theological and religious ideals      *Routledge Revivals: Medieval Science, Technology and Medicine (2006)* Thomas Glick, Steven J. Livesey, Faith Wallis, 2017-07-05 First published in 2005 this encyclopedia demonstrates that the millennium from the fall of the Roman Empire to the Renaissance was a period of great intellectual and practical achievement and innovation In Europe the Islamic world South and East Asia and the Americas individuals built on earlier achievements introduced sometimes radical refinements and laid the foundations for modern development Medieval Science
