to contemporary times It begins by showing how trust is essential to the creation of value in human exchange and how money can depending on conditions both enable and disable such trustfully collaborative generations of value Drawing upon a vast range of poetry for its exemplifications the book includes studies of poetic hardship religious verse and debt redeeming the South Sea Bubble and the economic revolution debates over metallic and paper currency in the eighteenth and nineteenth centuries as well as modernist struggles with the gold standard depression inflation and the realised groundlessness of exchange value With its practitioner s attention to the minutiae of poetic technique it considers analogies between words and coins and between poetic rhythm and the circulation of currencies in an economy Through its close readings of poems over many centuries directly or indirectly engaged with money it proposes ways in which while we cannot escape monetary economies we can resist to some extent being ensnared and diminished by them through a fresh understanding of values money may serve to enable but ones which are nevertheless beyond price
