## **Alfred Vincent Kidder And The Development Of Americanist Archaeology:**

**Alfred Vincent Kidder and the Development of Americanist Archaeology** Douglas R. Givens, 1992 Drawing from unpublished writing much of it autobiographical recounts how Kidder between 1913 and 1963 introduced the notion that archaeologists should be more than collectors for museums furthered the use of ethnography and shaped the methodology now used in Southwest and Maya investigations Annotation copyright by Book News Inc Portland OR **Alfred Vincent Kidder and the Development of Americanist Archaeology** Douglas R. Givens, 1992-01-01 *Robert Redfield and the Development of American Anthropology* Clifford Wilcox, 2006-01-01 Relying upon close readings of virtually all of his published and unpublished writings as well as extensive interviews with former colleagues and students Robert Redfield and the Development of American Anthropology traces the development of Robert Redfield's ideas regarding social change and the role of social science in American society Clifford Wilcox's exploration of Redfield's pioneering efforts to develop an empirically based model of the transformation of village societies into towns and cities is intended to recapture the questions that drove early development of modernization theory Reconsideration of these debates will enrich contemporary thinking regarding the history of American anthropology and international development *James A. Ford and the Growth of Americanist Archaeology* Michael John O'Brien, R. Lee Lyman, 1998 Tells the story of Ford's role in the development of culture history the dominant paradigm in archaeology from 1914 through 1960 Provides a glimpse of how archaeologists began using a variety of methods to attain spatial and temporal control over an exceedingly diverse and complex archaeological record Annotation copyrighted by Book News Inc Portland OR *Theodore E. White and the Development of Zooarchaeology in North America* R. Lee Lyman, 2016-07-01 Theodore E White and the Development of Zooarchaeology in North America illuminates the researcher and his lasting contribution to a field that has largely ignored him in its history The few brief histories of North American zooarchaeology suggest that Paul W Parmalee John E Guilday Elizabeth S Wing and Stanley J Olsen laid the foundation of the field Only occasionally is Theodore White 1905-77 included yet his research is instrumental for understanding the development of zooarchaeology in North America R Lee Lyman works to fill these gaps in the historical record and revisits some of White's analytical innovations from a modern perspective A comparison of publications shows that not only were White's zooarchaeological articles first in print in archaeological venues but that he was also at least initially more prolific than his contemporaries While the other founders of the field were anthropologists White was a paleontologist by training who studied long extinct animals and their evolutionary histories In working with remains of modern mammals the typical paleontological research questions were off the table simply because the animals under study were too recent And yet White demonstrated clearly that scholars could infer significant information about human behaviors and cultures Lyman presents a biography of Theodore White as a scientist and a pioneer in the emerging field of modern anthropological zooarchaeology **Graphing Culture Change in North American Archaeology** R. Lee

Lyman, 2021 North American archaeologists have grappled with finding a graph that effectively and efficiently displays culture change over time This volume explores the history of graphing culture change and brings graph theory construction and decipherment to the forefront of archaeological discussion **A History of Anthropological Theory, Fifth Edition**

the past ten decades For each president the book provides a photograph and a biography replete with personal anecdotes career highlights and information about his or her contributions to the development of the discipline of anthropology Important works by each president are listed separately in the back of the volume An introduction by Regna Darnell and Frederic W Gleach summarizes the first century of the AAA and contextualizes the individual stories The Ethnographer's Magic and Other Essays in the History of Anthropology George W. Stocking,1992 George Stocking has been widely recognized as the premier historian of anthropology ever since the publication of his first volume of essays Race Culture and Evolution in 1968 As editor of several publications including the highly acclaimed History of Anthropology series he has led the movement to establish the history of anthropology as a recognized research specialization In addition to the study Victorian Anthropology his work includes numerous essays covering a wide range of anthropological topics The eight essays collected in The Ethnographer s Magic consider the emergence of anthropology since the late nineteenth century as an academic discipline grounded in systematic fieldwork Drawing extensively on unpublished manuscript materials the essays focus primarily on Franz Boas and Bronislaw Malinowski the leading figures in the American and the British academic fieldwork traditions According to George Marcus of Rice University the essays represent the most informative and insightful writings on Malinowski and Boas and their legacies that are yet available Beyond their biographical material the essays here touch upon major themes in the history of anthropology its powerfully mythic aspect and persistent strain of romantic primitivism the contradictions of its relationship to the larger sociopolitical sphere its problematic integration of a variety of natural scientific and humanistic inquiries and the tension between its scientific aspirations and its subjectively acquired data To provide an overview against which to read the other essays Stocking has also included a sketch of the history of anthropology from the ancient Greeks to the present For this collection Stocking has written prefatory commentaries for each of the essays as well as two more extended contextualizing pieces An introductory essay Retrospective Prescriptive Reflections places the volume in autobiographical and historiographical context the Afterword Postscriptive Prospective Reflections reconsiders major themes of the essays in relation to the recent past and present situation of academic anthropology Southwest Archaeology in the Twentieth Century Linda S Cordell,Don D Fowler,2005-11-10 Mesa Verde Chaco Canyon Canyon de Chelly and Paquim are well known to tourists and scholars alike as emblems of the American Southwest This region has been the scene of intense archaeological investigations for more than a hundred years with more research done here than in any other part of the United States With contributions from well known archaeologists Southwest Archaeology in the Twentieth Century reviews the histories of major archaeological topics of the region during the twentieth century giving particular attention to the vast changes in southwestern archaeology during the later decades of the century Included are the huge influence of field schools the rise of cultural resource management CRM the uses and abuses of ethnographic analogy the intellectual contexts of archaeology in Mexico and current debates on agriculture sedentism and

political complexity This book provides an authoritative retrospective of intellectual trends as well as a synthesis of current themes in the arena of the American Southwest From publisher s description      **The Rise and Fall of Culture History** R. Lee Lyman, Michael J. O'Brien, Robert C. Dunnell, 2007-07-27 This volume presents an insightful critical analysis of the culture history approach to Americanist anthropology Reasons for the acceptance and incorporation of important concepts as well as the paradigm s strengths and weaknesses are discussed in detail The framework for this analysis is founded on the contrast between two metaphysics used by evolutionary biologists in discussing their own discipline materialistic populational thinking and essentialistic typological thinking Employing this framework the authors show not only why the culture history paradigm lost favor in the 1960s but also which of its aspects need to be retained if archaeology is ever to produce a viable theory of culture change      **The Oxford Handbook of Southwest Archaeology** Barbara J. Mills, Severin M. Fowles, 2017 This volume takes stock of the empirical evidence theoretical orientations and historical reconstructions of archaeology of the American Southwest Themed chapters on method and theory are accompanied by comprehensive overviews of all major cultural traditions in the region from the Paleoindians to Chaco Canyon to the onset of Euro American imperialism

Meltzer, 2015-11-03 Following the discovery in Europe in the late 1850s that humanity had roots predating known history and reaching deep into the Pleistocene era scientists wondered whether North American prehistory might be just as ancient And why not The geological strata seemed exactly analogous between America and Europe which would lead one to believe that North American humanity ought to be as old as the European variety This idea set off an eager race for evidence of the people who might have occupied North America during the Ice Age a long and as it turned out bitter and controversial search In The Great Paleolithic War David J Meltzer tells the story of a scientific quest that set off one of the longest running feuds in the history of American anthropology one so vicious at times that anthropologists were deliberately frightened away from investigating potential sites Through his book we come to understand how and why this controversy developed and stubbornly persisted for as long as it did and how in the process it revolutionized American archaeology      Glory, Trouble, and Renaissance at

**Seriation, Stratigraphy, and Index Fossils** Michael J. O'Brien, R. Lee Lyman, 2007-05-08 It is difficult for today s students of archaeology to imagine an era when chronometric dating methods were unavailable However even a casual perusal of the large body of literature that arose during the first half of the twentieth century reveals a battery of clever methods used to determine the relative ages of archaeological phenomena often with considerable precision Stratigraphic excavation is perhaps the best known of the various relative dating methods used by prehistorians Although there are several techniques of using artifacts from superposed strata to measure time these are rarely if ever differentiated Rather common practice is to categorize them under the heading stratigraphic excavation This text distinguishes among the several techniques and argues that stratigraphic excavation tends to result in discontinuous measures of time a point little appreciated by modern archaeologists Although not as well known as stratigraphic excavation two other methods of relative dating have figured

important in Americanist archaeology seriation and the use of index fossils The latter like stratigraphic excavation measures time discontinuously while the former in various guises measures time continuously Perhaps no other method used in archaeology is as misunderstood as seriation and the authors provide detailed descriptions and examples of each of its three different techniques Each method and technique of relative dating is placed in historical perspective with particular focus on developments in North America an approach that allows a more complete understanding of the methods described both in terms of analytical technique and disciplinary history This text will appeal to all archaeologists from graduate students to seasoned professionals who want to learn more about the backbone of archaeological dating
