Congress. House. Committee on Science, 1999 This document presents the hearing before the Committee on Science in the House of Representatives on why and how math and science should be learned It includes oral opening statements by various House representatives Appendix 1 presents written opening statements from members of the subcommittee on basic research Appendix 2 features written testimony biographies financial disclosures and answers to post hearing questions Materials for the record are listed in the third appendix and include Preparing Our Children Math and Science Education in the National Interest and Winning the Skills Race A Council on Competitiveness Report on Mathematics and Science Education ASK Resources in Education, 2001-10 *Computer - Human Interaction in Symbolic Computation* Norbert Kajler, 2012-12-06 The well attended March 1994 HIse workshop in Amsterdam was a very lively conference which stimulated much discussion and human human interaction As the editor of this volume points out the Amsterdam meeting was just part of a year long project that brought many people together from many parts of the world The value of the effort was not only in generating new ideas but in making people aware of work that has gone on on many fronts in using computers to make mathematics more understandable The author was very glad he attended the workshop In thinking back over the conference and in reading the

papers in this collection the author feels there are perhaps four major conclusions to be drawn from the current state of work
1 graphics is very important but such features should be made as easy to use as possible 2 symbolic mathematical
computation is very powerful but the user must be able to see intermediate steps 3 system design has made much progress
but for semester long coursework and book length productions we need more tools to help composition and navigation 4
monolithic systems are perhaps not the best direction for the future as different users have different needs and may have to
link together many kinds of tools The editor of this volume and the authors of the papers presented here have also reached
and documented similar conclusions
