Algebra Of Revolution The Dialectic And The Classical Marxist Tradition:

The Algebra of Revolution John Rees, 2005-06-23 The Algebra of Revolution is the first book to study Marxist method as it has been developed by the main representatives of the classical Marxist tradition namely Marx and Engels Luxemburg Lenin Lukacs Gramsci and Trotsky This book provides the only single volume study of major Marxist thinkers views on the crucial question of the dialectic connecting them with pressing contemporary political and theoretical questions John Rees s The Algebra of Revolution is vital reading for anyone interested in gaining a new and fresh perspective on Marxist thought and on the notion of the dialectic

A Defence of History and Class Consciousness Georg Lukacs, György Lukács, Slavoj Žižek, John Rees, 2002-08-17 This work is commonly held to be the foundational text for Western Marxism As Stalinism took over in Russia Lukacs was subjected to attacks for deviation In the 1920s he wrote this response *Roland Barthes Writing the Political* Andrew Stafford, 2022-11-08 With typical rhetorical flourish and beholden to paradox Roland Barthes defines his work on myth as an attempt to define things and yet he is known foremost for his work on language The aim of this book is to take things here as social relations objects and other human beings with which the self interacts It does so via language And language in Barthes s conception is double alienating alienated on the one side liberating inspiring on the other It is this double that we investigate in this book A spectre is haunting Barthes studies the spectre of dialectics and the spectral presence of dialectics is what we will define in this book as the Barthesian spirit in both senses of the word that is haunting his analyses and at once providing us with a double approach I have tried to define things not words Barthes 2009 131n1

The Dialectic of Position and Maneuver Daniel Egan, 2016-09-27 In The Dialectic of Position and Maneuver Daniel Egan examines the role that the military metaphors of war of position and war of maneuver play in Antonio Gramsci s social theory The foundation for this analysis is the different ways in which Marxists have understood war and military strategy since the mid nineteenth century In doing so Egan argues that the distinction between war of position and war of maneuver which is so central to Gramsci s work as well as contemporary interpretations of his work must be understood in a more dialectical manner This conclusion is important not only in terms of Gramsci s social theory but also for understanding the limits and possibilities of contemporary political strategies for the left worldwide Between Equal Rights China Miéville, 2006 China Miéville s brilliantly original book is an indispensable guide for anyone concerned with international law It is the most comprehensive scholarly account available of the central theoretical debates about the foundations of international law It offers a guide for the lay reader into the central texts in the field Peter Gowan Professor International Relations London Metropolitan University Miéville critically examines existing theories of international law and offers a compelling alternative Marxist view China Miéville PhD International Relations London School of Economics is an independent researcher and an award winning novelist His novel Perdido Street Station won the Arthur C Clarke Award

Taking Sides Heidi Armbruster, Anna Lærke, 2010 Concerns with research ethics have intensified over recent years in

large part as a symptom of audit cultures M Strathern but also as a serious matter of engagement with the ethical complexities in contemporary research fields This volume written by a new generation of scholars engaged with contemporary global movements for social justice and peace reflects their efforts in trying to integrate their scholarly pursuits with their understanding of social science politics and ethics and what political commitment means in practice and in fieldwork This is a book of argument and analysis written with passion clarity and intellectual sophistication which touches on issues of vital significance to social scientists and activists in general

Violence in Capitalism James A. Tyner, 2016 What James Tyner asks separates the murder of a runaway youth from the death of a father denied a bone marrow transplant because of budget cuts Moving beyond our culture's reductive emphasis on whether a given act of violence is intentional and may therefore count as deliberate murder Tyner interrogates the broader forces that produce violence His uniquely geographic perspective considers where violence takes place the workplace the home the prison etc and how violence moves across space Approaching violence as one of several methods of constituting space Tyner examines everything from the way police departments map crime to the emergence of environmental criminology Throughout he casts violence in broad terms as a realm that is not limited to criminal acts and one that can be divided into the categories of killing and letting die His framework extends the study of biopolitics by examining the state's role in producing or failing to produce a healthy citizenry It also adds to the new literature on capitalism by articulating the interconnections between violence and political economy Simply put capitalism especially its neoliberal and neoconservative variants is structured around a valuation of life that fosters a particular abstraction of violence and crime

Dance of the Dialectic Bertell Ollman, 2003 Bertell Ollman has been hailed as this country's leading authority on dialectics and Marx's method by Paul Sweezy the editor of Monthly Review and dean of America's Marx scholars In this book Ollman offers a thorough analysis of Marx's use of dialectical method Marx made extremely creative use of dialectical method to analyze the origins operation and direction of capitalism Unfortunately his promised book on method was never written so that readers wishing to understand and evaluate Marx's theories or to revise or use them have had to proceed without a clear grasp of the dialectic in which the theories are framed The result has been more disagreement over what Marx really meant than over the writings of any other major thinker In putting Marx's philosophy of internal relations and his use of the process of abstraction two little studied aspects of dialectics at the center of this account Ollman provides a version of Marx's method that is at once systematic scholarly clear and eminently useful Ollman not only sheds important new light on what Marx really meant in his varied theoretical pronouncements but in carefully laying out the steps in Marx's method makes it possible for a reader to put the dialectic to work in his or her own research He also convincingly argues the case for why social scientists and humanists as well as philosophers should want to do so

Leadership and Social Movements Colin Barker, Alan Johnson, Michael Lavalette, 2001 Despite the explosion of social movement research in Europe and the US in the last 20 years the question of leadership has been relatively neglected

This probing examination of the theory and practice of social movement leadership critically re examines a series of classic cases The essays illuminate the complex dynamics and competing forms taken by social movement leadership as well as its impact on movement successes and failures *Fascism* David Renton,1999-04-20 In the 1930s fascist parties came to power across Europe Millions were killed in the war and the Holocaust Yet sixty years on fascism is on the rise once more in all major European states and far right parties are again winning converts To explain this disturbing trend Dave Renton surveys the history of modern fascism in Europe from its pre war origins up to the present day Renton examines the Marxist response to fascism in the age of Hitler and Mussolini and the writings of political thinkers such as Trotsky and Gramsci as well as more recent European theorists such as Miliband Mason and Poulantzas Renton argues that fascism should be understood not through the theory of liberal fascism studies but rather in terms of the brutal practice that fascism brought in its wake

Collapse and Transformation Guy D. Middleton,2020-04-09 The years c 1250 to 1150 BC in Greece and the Aegean are often characterised as a time of crisis and collapse A critical period in the long history of the region and its people and culture they witnessed the end of the Mycenaean kingdoms with their palaces and Linear B records and through the Postpalatial period the transition into the Early Iron Age But on closer examination it has become increasingly clear that the period as a whole across the region defies simple characterisation there was success and splendour resilience and continuity and novelty and innovation actively driven by the people of these lands through this transformative century The story of the Aegean at this time has frequently been incorporated into narratives focused on the wider eastern Mediterranean and most infamously the Sea Peoples of the Egyptian texts In twenty five chapters written by 25 specialists Collapse and Transformation instead offers a tight focus on the Aegean itself providing an up to date picture of the archaeology before and after the collapse of c 1200 BC It will be essential reading for students and scholars of the Aegean and eastern Mediterranean regions as well as providing data and a range of interpretations to those studying collapse and resilience more widely and engaging in comparative studies Introductory chapters discuss notions of collapse and provide overviews of the Minoan and Mycenaean collapses These are followed by twelve chapters which review the evidence from the major regions of the Aegean including the Argolid Messenia and Boeotia Crete and the Aegean islands Six chapters then address key themes the economy funerary practices the Mycenaean pottery of the mainland and the wider Aegean and eastern Mediterranean region religion and the extent to which later Greek myth can be drawn upon as evidence or taken to reflect any historical reality The final four chapters provide a wider context for the Aegean story surveying the eastern Mediterranean including Cyprus and the Levant and the themes of subsistence and warfare Pathways to Empathy Gertraud Koch,Stefanie Everke Buchanan,2013-05 Covers the processes of commodification of emotion about now reach into all areas of labor processes extending even to private life and intimate relationships This title takes concepts to study the diversity of this economic intrusion into family education and nursing in the service sector as well as into corporate

management **Edward Said and the Literary, Social, and Political World** Ranjan Ghosh, 2009-05-07 The contributors to this volume many among the foremost Edward Said scholars in the world examine Said as the literary critic his relationship to other major contemporary thinkers and his involvement with major movements of his time such as music feminism new humanism and Marxism **A Box of Sand** Charles Stephenson, 2014-12-19 This is the first book in the English language to offer an analysis of a conflict that in so many ways raised the curtain on the Great War In September 1911 Italy declared war on the once mighty transcontinental Ottoman Empire but it was an Empire in decline The ambitious Italy decided to add to her growing African empire by attacking Ottoman ruled Tripolitania Libya The Italian action began the rapid fall of the Ottoman Empire which would end with its disintegration at the end of the First World War The day after Ottoman Turkey made peace with Italy in October 1912 the Balkan League attacked in the First Balkan War The Italo Ottoman War as a prelude to the unprecedented hostilities that would follow has so many firsts and pointers to the awful future the first three dimensional war with aerial reconnaissance and bombing and the first use of armored vehicles operating in concert with conventional ground and naval forces war fever whipped up by the Italian press military incompetence and stalemate lessons in how not to fight a guerrilla war mass death from disease and 10 000 more from reprisals and executions Thirty thousand men would die in a struggle for what may described as little more than a scatolone di sabbia a box of sand As acclaimed historian Charles Stephenson portrays in this ground breaking study if there is an exemplar of the futility of war this is it Apart from the loss of life and the huge cost to Italy much higher than was originally envisaged the main outcome was to halve the Libyan population through emigration famine and casualties The Italo Ottoman War was a conflict overshadowed by the Great War but one which in many ways presaged the horrors to come A Box of Sand will be of great interest to students of military history and those with an interest in the history of North Africa and the development of technology in war *Making of the Modern Mind* Philip Hodgkiss, 2001-08-01 The Making of the Modern Mind traces the emergence of consciousness in social thought from the 17th Century to the 21st Against the classical notions of consciousness and self alternative agendas began to be developed in the 19th Century by figures as diverse as Marx and Nietzsche The struggles between classical conceptions of consciousness and these alternatives which promised more radical and emancipatory interpretations continued into the 20th Century From the start the concept of consciousness connected with a range of other notions Questions of the self and of identity were widely disputed in the Enlightenment whilst the 20th Century contributed new concerns chiefly the philosophical issues of being and acting and the problematic status of reality for a theory of mind Today consciousness is viewed much more as a public and linguistic world rather than a private and mentalistic one The Making of the Modern Mind explores the contemporary debates around consciousness and identity crucially setting the analysis within its social and historical context Written in a clear and engaging style the book will be of interest to students in Philosophy Psychology Sociology and Anthropology **The Routledge Companion to Critical and**

Krishna, 2003-11-20 This book offers key insights into how to manage software development across international boundaries It is based on a series of case studies looking at the relationships between firms from North America the UK Japan and Korea with Indian software houses In these case studies which have typically been compiled over a 3 4 year timespan the authors analyse the multi faceted challenges encountered in managing these Global Software Alliances GSAs These challenges range from the conflicts that managers face when dealing with distance to the tensions of transferring knowledge across time and space to issues in trying to establish universal standards in a context of constant change and the problems of identity that developers and clients experience in having to deal with different organizations and countries Throughout the book the authors draw on their extensive research and experience to offer constructive advice on how to manage GSAs more effectively

Class, States and International Relations Adrian Budd, 2013-06-19 This book provides an outline and a critique of neo Gramscian international relations theory from a Marxist perspective Focusing on the pioneering work of Robert Cox but also drawing on the wider neo Gramscian literature this book presents a comprehensive account of neo Gramscian international relations theory It highlights the neo Gramscian critique of mainstream Realist theory and the theoretical innovations that resulted from the mobilisation of Gramsci's ideas and Cox's emphasis on the social forces underpinning forms of state and world orders The author explains how this is especially relevant in the current period of war and crisis when the international dimensions of social existence continue to exercise a major influence over domestic politics and economics and when the interest in Marxism can be expected to grow The book continues to provide a critique of the neo Gramscians and of what the author argues is their one sided reading of Gramsci Placing coercion at the centre of a mode of production analysis of world order the author elaborates a Marxist alternative to neo Gramscianism that provides more robust explanations of world order dynamics and change Using a combination of IR theory and historical explanation including of contemporary world order dynamics and US power this book will appeal to both students and scholars of International Relations international studies and international history

The Caucasus Under Soviet Rule Alex Marshall, 2010-09-13 The Caucasus is a strategically and economically important region in contemporary global affairs Western interest in the Caucasus has grown rapidly since 1991

fuelled by the admixture of oil politics great power rivalry ethnic separatism and terrorism that characterizes the region However until now there has been little understanding of how these issues came to assume the importance they have today This book argues that understanding the Soviet legacy in the region is critical to analysing both the new states of the Transcaucasus and the autonomous territories of the North Caucasus It examines the impact of Soviet rule on the Caucasus focusing in particular on the period from 1917 to 1955 Important questions covered include how the Soviet Union created nations out of the diverse peoples of the North Caucasus the true nature of the 1917 revolution the role and effects of forced migration in the region how over time the constituent nationalities of the region came to re define themselves and how Islamic radicalism came to assume the importance it continues to hold today A cauldron of war revolution and foreign interventions from the British and Ottoman Turks to the oil hungry armies of Hitler s Third Reich the Caucasus and the policies and actors it produced not least Stalin Sergo Ordzhonikidze and Anastas Mikoyan both shaped the Soviet experiment in the twentieth century and appear set to continue to shape the geopolitics of the twenty first Making unprecedented use of memoirs archives and published sources this book is an invaluable aid for scholars political analysts and journalists alike to understanding one of the most important borderlands of the modern world The Shi'ites of Lebanon Rula Jurdi

Abisaab, Malek Abisaab, 2014-12-09 The complex history of Lebanese Shi'ites has traditionally been portrayed as rooted in religious and sectarian forces The Abisaabs uncover a more nuanced account in which colonialism the modern state social class and provincial politics profoundly shaped Shi'i society The authors trace the sociopolitical economic and intellectual transformation of the Shi'ites of Lebanon from 1920 during the French colonial period until the late twentieth century They shed light on the relationship of contemporary Islamic militancy with traditions of religious modernism and leftism in both Lebanon and Iraq Analyzing the interaction between sacred and secular features of modern Shi'ite society the authors clearly follow the group's turn toward religious revolution and away from secular activism This book transforms our understanding of twentieth century Lebanese history and demonstrates how the rise of Hizbullah was conditioned by Shi'ites consistent marginalization and neglect by the Lebanese state
