most important point on which metaphysical systems converge and they all agree about the competent people What are
competent people They somehow form the pillars of existence sustain it are the structures that sustain the system What idea
does this stem from As a metaphysical principle it is necessary to find a reason for creation if there is a god why did he create
creation what is the reason for this So there must be there must be a reason it is based here the knowledge of reason He says
I was a gem I wanted to be known so the reason is to want to be known what is it Your ore What is ore The first substance
that is the potential of something like the ore jewel relationship the thing that shows the ore is its processing that is the god
wanted to be processed this is the reason CREATING INDUCTION THROUGH THE OBSERVANT S MIRROR What technique
did God use when he was creating Creation continues in continuity at the moment Religious books give different answers to
these situations everyone tells what they have in their bags For example the angel Gabriel has a duty to create storms every
angel has a job and the chosen spirits which they call holy spirits also perform some duties God has an innumerable number
of angels made up of angels each doing a job What kind of technique is this does god use a technique Reply Yeah So can you
people use this technique in your own life Reply yes we can call it the induction technique How is it First of all we will go
over metaphysical values again of course creation means reaching a destiny in this way there are various destinies on a line

or on a cycle In other words there is such a thing as faith in destiny it has been written before but this destiny is the destiny of possibilities Think of it this way you only have three numbers 1 2 3 no other numbers these three numbers are your potential destiny so you are confined here What can you do with these three numbers Here knowledge wisdom and effort come into play you can do subtraction addition permutation they are all your destiny but the number 4 is outside of your destiny there is nothing written for you there you can create change here Simply God has a science there are many options you can make with the numbers 1 2 3 in this science all of them are written for you the rest is to learn the science and technique of it In time you will understand what potential you have by using the science of nature So each result creates a pattern a kind of pattern Creation also means that a person moves from one mold to another and is reshaped there that is models and patterns are also present there For example 1 2 1 this pattern already exists you pour yourself into it there creation takes place This is how God does these things by his people there is nothing unknown let me give you another example For example you in position A are having a problem let s call it position A in distress Then you asked for the help of the angel with the permission of Allah and for some reason the angel decided to help you for example you wish for healing you are sick you have a wish for healing That is the disease is a model your healed state is another model the angel has healed you from the position of illness puts it in position For example it does not make a giraffe out of you it does not create such a possibility for you or it does not give you immortality We have the mirror of the observer the observer and the creation process for an observer again based on faith in destiny let s assume that the potential number 1 2 is the variation of these two numbers that an observer can see in his mirror no matter what he does nothing else It can increase the possibilities with knowledge but there is a but there In fact God takes care of his work namely his creation with these aims While the observer sees his own possibilities in his mirror he reaches the paradox of infinite mirrors since he is also an observed to those possibilities Just like the servant whom God loves and the servant who loves God very much these are the reflections of man as a servant in God the observing god determines the area he observes with the fate and potential of the observer It sounds complicated but it s not it all falls into place towards the end So how does this happen We are talking about a single human being the observer and the agent interfering person where is the field he she observes He cannot observe anything but manifestation that is he observes creation Observing it creates its own combination For example when looking at a work of art one person looks with admiration respects the effort for the art there and another looks with envy both of which are potentials within those numerical possibilities For example one commits a sin one observer looks forgiving the other looks vindictive and vengeful which is choosing a destiny within possibilities Now let s look at the rest of the sentence the concept of induction what is that concept This is a very interesting concept it is a technology that is already used today but even those who use or create this technology do not know the essence of the business and here is the secret of creation God s creation technique is induction it is to change the structure of a substance without touching it we can also call it the power of thought

that is if you hit the iron with a hammer the iron will be crushed What is creation It means breaking the will of something What is will Any substance has a self preservation that is a resistance structure to maintain its current shape which is also a necessary thing So if an outside force wants to create on something external it has to break its will For example the cracking of the seed means the breaking of the will of the seed Why does he have willpower Because God protects it that is he does it so that it does not break in an incorrect and unsuitable environment that is in areas where creation will not take place The seed cracks in the soil in various special circumstances like this because only there it can enter into creation In other words God creates his creations by breaking the shell of things breaking his will to resist and in this way he creates constantly According to what and for what purpose does God constantly create Here again induction comes into play God chooses creation but you choose how to create that s the interesting part For example electrolysis technique is an induction technique what is it You put a metal in acidic or silver or chrome water you give electricity to the metal the electrified metal attracts the liquid metal in the water and becomes a coating The other technique that does this is psychic therapy by suggestion that is no surgical procedure all by using a technique from afar and suitable for the next possibility of the thing For example you cannot apply this technique to plastic it is not among its fate options there is no electrolysis what does that mean As a potentially destiny item your creation pattern determines the possibilities In other words while creating God he connected the system to a kind of automatic order your destiny as a subject and a creation on you with the knowledge that comes over your attempt as a subject That is a kind of breaking of will followed by remodeling for change that is creation is in the form of both the observed and the observing you having reached any of your destiny possibilities at that moment getting sick is a possibility getting healed is a possibility it s all there Let s look at the creation process of god based on scriptures seven layers of heaven and above it the chair of God that is the universe created by God Think of it this way nine balls are intertwined The first ball is our universe the next seven floors are seven heavens the last one is the lectern which we also call the god floor we have such a model four archangels hold this lectern these are of course a symbolic expression but we will look at what it tells Where could God have started creation After God created all these and his angels he creates Adam determines the Doomsday time and the beginning and the end are created together I wonder why he created such a model Why is something done even if it is God Even God cannot escape his own rule

Empowerment : the Competitive Edge in Sports, Business & Life Gene N. Landrum,2006 In Empowerment The Competitive Edge in Sports Business Life high profile personality Dr Gene Landrum presents in a self help format the 13 winning behaviors modeled by the 13 greatest athletes of the modern era Landrum s research into the lives of the great entrepreneurs and athletes supported by a growing body of evidence suggests that eminence whether in business or sports derives not from genetic superiority but from winning behaviors and learned emotional dispositions With a delightful blend of gifted story telling and intellectual scholarship Dr Landrum has created a book that melds the recent discoveries in psychology and brain research with the dramatic

performances of the world's greatest athletes. Charismatic athletes such as Michael Jordan, Lance Armstrong, Martina Navratilova, and Tiger Woods are analyzed in psycho-biographical profiles that focus on the underlying motivations and behaviors of these preeminent personalities rather than on what they achieved. In this respect and in its connection to the recent research in brain function and psychology, Dr. Landrum's work is unprecedented in the extant literature on athletes and athletic technique. Muhammad Ali Mike Gent, 2020-08-19 When Muhammad Ali first donned boxing gloves in the late Fifties as Cassius Clay, he could not have imagined the impact he would make, not merely as a sportsman but as a global figure. Anyone alive in the Sixties and Seventies couldn't help but notice this sportsman who, like a select few, broke through into celebrity status. More than that, his pronouncements were given more weight than many politicians of the time. His ring record speaks for itself: 61 fights, 56 wins, plus Olympic Gold and the WBA, WBC, and NABF World Heavyweight titles. But it was the swaggering, self-confident way he conducted himself in the ring that turned boxing into entertainment. The fact he took on the establishment with his anti-Vietnam views and newly adopted religious beliefs only added spice to the spectacle. Even after his death in 2016, this previous hard-hitting social activist remains an icon and a role model to millions today, all of whom cannot conceive of a world where Muhammad Ali didn't exist. Even with his well-publicized health problems causing a lessening effect on his heavyweight character leading up to his passing, he kept himself in the public eye through his promotion of world peace and through his non-profit Muhammad Ali Center in his hometown of Louisville. Ali, a champion in and out of the ring, is still the greatest. This is a tribute to a unique character, the like of which the sporting world will most likely never see again.

Islam in the African-American Experience Richard Brent Turner, 2003 The involvement of African Americans with Islam reaches back to the earliest days of the African presence in North America. This book explores these roots in the Middle East, West Africa, and antebellum America.

Bio-pics Ellen Cheshire, 2014-12-16 Bio-pics: A Life in Pictures offers a series of case studies which throw light on this most unique of genres. Is the bio-pic a genre in its own right? Or are such films merely footnotes in other, more traditional genres such as the western or costume drama, depending on the historical figure under scrutiny? Unlike other genre forms, bio-pics seemingly share no familiar iconography codes or conventions. They can be set anywhere and at any time. What links them is quite simply that the films depict the life of an important person. Through a carefully selected range of thematically linked English language bio-pics released since 1990, this book explores key issues surrounding their resurgence: narrative structure, production, subject representation, or misrepresentation, and critical response. The films under discussion are grouped around a profession: writers, singers, politicians, sportsmen, criminals, artists, allowing for comparisons to be drawn in approaches to similar subject matter.

In the Dark Room Rosanna Maule, Julie Beaulieu, 2009 This book examines Duras's contribution to contemporary cinema. The dark room in the collection's title refers to one of Duras's metaphors for the writing process: *la chambre noire*, as the solitary space of literary creation, the place where she struggles to project her internal shadow onto the blank page. The dark room is

also a metaphor for the film theater and by extension for the filmic experience Duras rejected conventional forms of cinematic address that encourage the spectator to develop a positive identification with the film's diegesis and narrative Her films create unusual rapports between image and sound diegetic and extra diegetic elements and textual and intertextual dimensions of cinematic representation In doing so they allow the film spectator to establish new connections with the screen This collection focuses on the aesthetic conceptual and political challenges involved in Duras's innovative approach to cinematic representation from an interdisciplinary perspective including film and literary theory psychoanalytic analysis music theory gender studies and post colonial criticism The book opens with a theoretical introduction to Duras's cinematic practice and its peculiar position in contemporary cinema and contemporary film theory and is divided into five parts each one devoted to a specific aspect of Duras's films the interaction between literature and cinema Part One the reconfiguration of the cinematic gaze Part Two and of the image sound relation Part Three the representation of history and memory Part Four and of cultural identity Part Five
