Alien Wisdom The Limits Of Hellenization:

Alien Wisdom Arnaldo Momigliano,1975 In this classic study of cultural confrontation Professor Arnaldo Momigliano looks at the attitude of the Greeks to four different civilizations the Roman Celtic Jewish and Persian and analyses their cultural and intellectual interactions from the fourth to the first centuries BC He argues that in the Hellenistic period the Greeks Romans and Jews formed a special exclusive relationship and effectively established what until recent times was the normal horizon of Western civilization *Abraham as a Spiritual Ancestor* Israel Kamudzandu,2010 Drawing on the ideology of the Augustan era of constructing ancestors this book is about Paul s creative construction of Abraham as a spiritual ancestor of all people who have the faith of Abraham and Sarah The book breaks new accademic grounds on the value of ancestors in a 21st century global Christian world *A History of the Jews and Judaism in the Second Temple Period, Volume 2* Lester L. Grabbe,2011-10-27 This is the second volume of the projected four volume history of the Second Temple period It is axiomatic that there are large gaps in the history of the Persian period but the early Greek period is possibly even less known This volume brings together all we know about the Jews during the period from Alexander s conquest to the eve of the Maccabaeen revolt including the Jews in Egypt as well as the situation in Judah Based directly on the primary sources which are surveyed the study addresses questions such as administration society religion economy jurisprudence Hellenism and Jewish identity These are discussed in the context of the wider Hellenistic world and its history A strength of the study is its extensive up to date secondary bibliography approximately one thousand items Hellenistic Studies at a Crossroads Richard Hunter,Antonios Rengakos,Evina Sistakou,2014-07-08 This volume is a collection of fifteen papers written by a team of international experts in the field of Hellenistic literature In an attempt to reassess methods such as the detection of intertextual allusions or the general notion of neoteric poetics the authors combine current critical trends narratology genre theory aesthetics cultural studies with a close reading of Hellenistic texts Contributions address a wealth of topics in a variety of texts which include not only poems by the major Alexandrians but also prose works epigrams epigraphic material and scholia Perspectives range from linguistic analysis to interdisciplinary studies whereas post classical literature is also seen against the background of the cultural and ideological contexts of the era Besides reviewing preconceptions of Hellenistic scholarship this volume aims at providing fresh insights into Hellenistic literature and aesthetics Visual Style and Constructing Identity in the Hellenistic World M. J. Versluys,2017-06-29 A new interpretation of Nemrud Da a key Hellenistic monument which encompasses both Greek and Persian elements **Identities in Antiquity** Joseph Skinner,Vicky Manolopoulou,Christina Tsouparopoulou,2025-06-30 Identities in Antiquity is a multi disciplinary platform for the synthetic study of ancient identities set in a more rounded and inclusive notion of antiquity The volume showcases methodological and theoretical approaches to the study of ancient identities by scholars from different disciplinary backgrounds and career stages In doing so it promotes a more holistic approach to the study of ancient identities facilitating

The Emergence of a Scientific Culture Stephen Gaukroger,2008-10-23 Why did science emerge in the West and how did scientific values come to be regarded as the yardstick for all other forms of knowledge Stephen Gaukroger shows just how bitterly the cognitive and cultural standing of science was contested in its early development Rejecting the traditional picture of secularization he argues that science in the seventeenth century emerged not in opposition to religion but rather was in many respects driven by it Moreover science did not present a unified picture of nature but was an unstable field of different often locally successful but just as often incompatible programmes To complicate matters much depended on attempts to reshape the persona of the natural philosopher and distinctive new notions of objectivity and impartiality were imported into natural philosophy changing its character radically by redefining the qualities of its practitioners The West s sense of itself its relation to its past and its sense of its future have been profoundly altered since the seventeenth century as cognitive values generally have gradually come to be shaped around scientific ones Science has not merely brought a new set of such values to the task of understanding the world and our place in it but rather has completely transformed the task redefining the goals of enquiry This distinctive feature of the

development of a scientific culture in the West marks it out from other scientifically productive cultures In *The Emergence of a Scientific Culture* Stephen Gaukroger offers a detailed and comprehensive account of the formative stages of this development and one which challenges the received wisdom that science was seen to be self evidently the correct path to knowledge and that the benefits of science were immediately obvious to the disinterested observer **Heavenly Tablets** Lynn R. LiDonnici,Andrea Lieber,2007 This volume brings together a wide range of international scholars of Ancient Judaism whose essays explore various issues surrounding Jewish communities and Jewish identity in late antiquity The essays are organized into three sections Interpreting Ritual Texts Mapping Diaspora Identities and Rewriting Tradition 2007 *Lectures* Ron Johnston,2008-12-25 Volume 154 of the Proceedings of the British Academy contains 17 Lectures delivered at the British Academy in 2007 From commemoration of the American Civil War to an examination of our capacity as human beings to live in the world of imagination and the opportunities and challenges which face cultural institutions in Britain today **Empires** Susan E. Alcock,2001-08-09 Empires the largest political systems of the ancient and early modern world powerfully transformed the lives of people within and even beyond their frontiers in ways quite different from other non imperial societies Appearing in all parts of the globe and in many different epochs empires invite comparative analysis yet few attempts have been made to place imperial systems within such a framework This book brings together studies by distinguished scholars from diverse academic traditions including anthropology archaeology history and classics The empires discussed include case studies from Central and South America the Mediterranean Europe the Near East South East Asia and China and range in time from the first millennium BC to the early modern era The book organises these detailed studies into five thematic sections sources approaches and definitions empires in a wider world imperial integration and imperial subjects imperial ideologies and the afterlife of empires **The Cambridge History of Judaism: Volume 2, The Hellenistic Age** W.
