The Command and Control, Battle Management, and Communications (C2BMC) program is the key of the Ballistic Missile Defense System (BMDS). It is a vital operational system that enables the U.S. President, Secretary of Defense and Chairman of the Joint Chiefs of Staff to coordinate the U.S. missile defense, and to coordinate the U.S. missile defense with the U.S. missile defense and the U.S. missile defense.

Ballistic Missile Defense:

History of Strategic and Ballistic Missile Defense: Volume I Barry Leonard, 2010-11 As part of a larger study of the strategic arms competition which developed after World War II between the U S and the U S S R this study of the two countries strategies for air and ballistic missile defense addresses two broad subjects 1 How did each country approach the problem of defense against the threat from the air 2 Why did each country accent particular elements of an air defense strategy at various periods between 1945 and 1972 The first question concerns the means that leaders chose for defense against an increasingly sophisticated offensive threat Includes several appendices of chronologies tables charts maps and notes

Long-Range Ballistic Missile Defense in Europe Steven A. Hildreth, 2007 Successive U S administrations have urged the creation of an anti missile system to protect against threats from rogue states The Bush Administration believes that North Korea and Iran are strategic threats and questions whether they can be deterred by conventional means The Administration has built long range missile defense bases in Alaska and California to protect against North Korean missiles The system has been tested with mixed results and questions have been raised about its effectiveness The Administration has proposed deploying a ground based mid course defense GMD element of the larger Ballistic Missile Defense System BMDS in Europe to defend against the threat of long range missiles from Iran The system would include 10 interceptors in Poland a fixed radar installation in the Czech Republic and another forward deployed radar elsewhere in the region but closer to Iran Deployment of the European GMD capability is scheduled to be completed by 2013 at a cost of 4 04 billion

Ballistic Missile Defense Ayoub Vermeirsch, 2013 The ballistic missile threat is increasing both quantitatively and qualitatively and is likely to continue to do so over the next decade Current global trends indicate that ballistic missile systems are becoming more flexible mobile survivable reliable and accurate while also increasing in range A number of states are also working to increase the protection of their ballistic missiles from pre launch attack and to increase their effectiveness in penetrating missile defences Several states are also developing nuclear chemical and or biological warheads for their missiles Such capabilities could be significant sources of military advantage during a conflict But they may be equally significant in times of relative peace when they undergird efforts to coerce states near and far Regional actors such as North Korea and Iran continue to develop long range missiles that will be threatening to the United States There is some uncertainty about when and how this type of intercontinental ballistic missile ICBM threat to the U S homeland will mature but there is no uncertainty about the existence of regional threats They are clear and present The threat from short range medium range and intermediate range ballistic missiles SRBMs MRBMs and IRBMs in regions where the United States deploys forces and maintains security relationships is growing at a particularly rapid pace This book provides an overview of select issues and policies of the ballistic missile defence program

BMD have been an issue in U S Soviet and U S Russian arms control talks since the 1970s During the Cold War the nations sought to balance limits on offensive weapons and defensive weapons so that they could maintain strategic stability which refers to the ability of each side to launch a retaliatory strike after absorbing a first strike by the other side Contents of this report 1 Intro 2 Strategic Stability and the Relationship Between Offensive and Defensive Forces 3 BMD and the 1991 START Treaty The Negotiating Framework START Ratification Resolving Competing Priorities BMD Programs and Budgets BMD in the 1980s and 1990s Current BMD Plans and Programs 4 BMD Budgets Over Time **Sea-Based Ballistic Missile**

Carter, David N. Schwartz, 2010-12-01 Defense against nuclear attack so natural and seemingly so compelling a goal has provoked debate for at least twenty years Ballistic missile defense systems formerly called antiballistic missile systems offer the prospect of remedying both superpowers alarming vulnerability to nuclear weapons by technological rather than political means But whether ballistic missile defenses can be made to work and whether it is wise to build them remain controversial The U S Soviet Anti Ballistic Missile Treaty of 1972 restricts testing and deployment of ballistic missile defenses but has not prohibited more than a decade of research and development on both sides As exotic new proposals are put forward for space based directed energy systems questions about the effectiveness and wisdom of missile defense have again become central to the national debate on defense policy This study jointly sponsored by the Brookings Institution and the Massachusetts Institute of Technology examines the strategic technological and political issues raised by ballistic missile defense Eight contributors take an analytical approach to their areas of expertise which include the relationship of missile defense to nuclear strategy the nature and potential applications of current and future technologies the views on missile defense in the Soviet Union and among the smaller nuclear powers the meaning of the Anti Ballistic Missile Treaty for today s technology and the present role and historical legacy of ballistic missile defense in the context of East West relations The volume editors give a comprehensive introduction to this wide range of subjects and an assessment of future prospects In the final chapter nine knowledgeable observers offer their varied personal views on the ballistic missile defense question *Why ABM* Johan J.
