Randhawa, 1995-01-01 World Bank Discussion Paper No 291 Discusses the major issues associated with transforming and
improving payment systems in emerging market economies Economic activity requires a system of payments to facilitate
trade and exchange between consumers and suppliers of products and services This paper looks at the differences between
payment systems in centrally planned and market economies The authors examine both short and long term methods of
improving payment systems Distinctions between the various payment instruments are made and the roles of country size
banking structure and institutional framework are discussed An appendix provides a summary checklist of information
needed to plan adequately for changes in payment systems *Global Perspectives on Migration and Development* Irena
Omelandiuk, 2012-05-23 This volume is the first in a new Springer series to examine one of humanity's most pressing concerns
global migration and its implications for development As population mobility grows in an ever more crowded world the
Global Forum on Migration and Development GFMD has emerged as the most important global mechanism to deal with the
urgent challenges it presents This book explores fresh strategies proposed by the GFMD in its fourth year of operation in
Mexico and beyond Interrogating the relationship between migration and development the papers advance the Global Forum
's aims of reducing poverty and empowering low income families everywhere In 2010 there were 214 million international
migrants worldwide nearly two and a half times the number in 1965 By 2050 international migration is likely to expand
sharply in scale reach and complexity due to growing demographic disparities environmental change shifting global political
and economic dynamics technological innovations and social networks Migration can bring substantial gains to families in
less developed countries and mobile labor is an axiomatic feature of the global economy Yet outward migration of skilled
workers can seriously retard development at home and exert pressure on wages in host nations Balancing these and other
conflicting concerns requires the substantive and expert discourse offered in this book Contributors discuss and propose
concrete solutions to vital issues such as the debilitating costs of cross border labor recruitment and the provision of social
and income protection for foreign contract workers With suggestions on how to facilitate connections between transnational
families and gender and family sensitive immigration regimes this book aims to foster collaborative intergovernmental links
as well as partnerships between governments civil society and international organizations It shows how the GFMD can

positively influence policy and institutional behavior while addressing wider systemic factors in protecting mobile workers
