Baffin Island:

Ordovician Cephalopod Fauna of Baffin Island Arthur K. Miller, 1954 **Extreme Tourism: Lessons from the World's Cold Water Islands** Godfrey Baldacchino, 2006-08-11 This book is a pioneering investigation of the tourism practices in the world's other cold water islands. Located in extreme latitudes and subject to extreme weather conditions, these islands have been developing their tourism appeal in manners that appear sustainable. They present themselves in images that speak to the pristine, unique, and superlative aspects of their natural environment, history, and culture. Limited seasonality, difficulty of access, restricted infrastructure, harsh climates, and water too cold to swim in are integral features of the tourism industry, often welcomed as appropriate filters to the slide to the mass market. The collection contains 13 island case studies. A set of seven hail from Northern latitudes: Baffin, Nunavut, Canada; Banks, Northwest Territories, Canada; Greenland; Kaalaalit, Nunaat; Iceland; Lule, Sweden; Nunivak, Alaska; Solovetsky, Russia; and Svalbard, Norway. A second set of four covers the Southernly islands of Chatham, New Zealand; Falklands; Macquarie, Australia; and Stewart, New Zealand. Two other chapters discuss islands from the particular vantage points of cruise ship tourism, one for the Arctic region and one for the Antarctic. Additionally, five conceptual chapters provide insights into key tourism management issues as they apply to cold water island experiences: a human resources, b environment, c promotion, d seasonality, and e access. Long-term Environmental Change in Arctic and Antarctic Lakes Reinhard Pienitz, Marianne S.V. Douglas, John P. Smol, 2007-11-08 Concerns about the effects of global climate change have focused attention on the vulnerability of circumpolar regions. Long-term historical data are needed to better understand the magnitude and direction of environmental change related to both natural and anthropogenic causes, as well as to assess patterns of natural variability. The paucity of instrumental data requires that proxy methods be used. The abundance of lakes throughout the Arctic and Antarctic makes paleolimnological approaches especially powerful tools to assist interpretations of environmental change. This book provides a synthesis of the broad spectrum of techniques available for generating long-term environmental records from circumpolar lakes. It also provides overviews of the geographic extent of paleolimnological work completed thus far in these regions. It explores the diverse ways in which paleolimnology is used to address the pressing and emerging environmental issues of high-latitude regions. By providing both an introduction and in-depth reviews, this volume is of interest to students and advanced researchers alike who are studying earth, atmospheric, and environmental sciences. *Baffin Island* Mark Synnott, 2011-02-01 Complete with maps and an invaluable trip planning section detailing the information needed to make your trip an unforgettable success, Baffin Island is the first comprehensive adventure guide to the fifth largest island in the world, which is quickly becoming known as a premiere destination for climbers, skiers, trekkers, and adventure travellers alike. **Arctic Bibliography** Arctic Institute of North America, 1953 **U.S. Geological Survey Professional Paper**, 1998 *Glaciers of North America* Richard S. Boschi, 2012-12-06 by K Lambeck R Sabadini and E B08Chi Viscosity is one of the important material properties of the Earth controlling tectonic and dynamic processes such as mantle convection isostasy and glacial rebound Yet it remains a poorly resolved parameter and basic questions such as whether the planet's response to loading is linear or non linear or what are its depth and lateral variations remain uncertain Part of the answer to such questions lies in laboratory observations of the rheology of terrestrial materials But the extrapolation of such measurements from the laboratory environment to the geological environment is a hazardous and vexing undertaking for neither the time scales nor the strain rates characterizing the geological processes can be reproduced in the laboratory General rules for this extrapolation are that if deformation is observed in the laboratory at a particular temperature deformation in geological environments will occur at a much reduced temperature and that if at laboratory strain rates a particular deformation mechanism dominates over all others the relative importance of possible mechanisms may be quite different at the geologically encountered strain rates Hence experimental results are little more than guidelines as to how the Earth may respond to forces on long time scales *Arctic Shorebirds in North America* Jonathan Robert Bart, Victoria Helen Johnston, 2012-08-02 i *Arctic Shorebirds in North America* i represents a study that is one of the remarkable achievements of wildlife fieldcraft like those done by Aldo Leopold in the 1930s and by the Craighead Brothers in the 1960s To conduct a study of this scientific caliber in the great expanse and harsh climate of the Arctic makes it one of the great wildlife investigations whose value will only grow with time Larry Niles Conserve Wildlife Foundation of New Jersey It is most timely that Jonathan Bart and Victoria Johnston have gathered information on shorebirds that breed in the Arctic regions of North America Data on these birds is generated at a wide range of locations by many different individuals and teams and this book puts it into perspective It is particularly valuable to have this treatise when so many shorebird species worldwide are in marked decline Clive Minton Australasian Wader Studies Group When the PRISM program for pan Arctic shorebird monitoring was introduced everyone agreed with its laudable aims but it seemed impractical How could shorebird biologists with limited time and resources acquire robust data on the size and trend of shorebird populations across the American Arctic Now the credibility gap has been bridged i *Arctic Shorebirds in North America* i presents the rigorous practical methods that will be the foundation of Arctic shorebird monitoring for years to come I look forward to Arctic PRISM becoming the keystone of shorebird conservation in the Western Hemisphere Humphrey Sitters editor of i *Wader Study Group Bulletin* i **Late Quaternary Palaeoceanography of the North Atlantic Margins** John T. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him.
