Balanced Healing Combining Modern Medicine With Safe And Effective Alternative Therapies:

The Preparation and Trial of Medical Malpractice Cases Richard E. Shandell, Fredrick A. Schulman, Patricia Smith, 2018-09-28 The Preparation and Trial of Medical Malpractice Cases treats a case as a continuous process from interviewing the client to closing argument. It offers comprehensive coverage of the questions surrounding health maintenance organizations including case law on the right to sue an HMO as well as its participating physicians. You will find discussion of how to recognize a meritorious case, the doctrine of alternative liability, the evidentiary value of FDA approval or non approval, the continuing treatment doctrine, state statutes regarding medical malpractice liability of alternative medical practitioners, the admissibility of evidence comparing physicians' risk statistics to those of other physicians, use of expert testimony to establish *res ipsa loquitur* in negligence, the modified standard of proximate cause when a physician's negligence exacerbates a patient's existing condition, violation of the duty to disclose information, contributory negligence in informed consent, distinguishing between medical malpractice and ordinary negligence, liability of nurses, and more. Appendices demonstrate how to analyze a medical brief, depose and examine the defendant physician, and elicit testimony from your own expert witness. Also included are a sample Bill of Particulars, a sample jury charge, and a list of Web sites to assist your medical research.

Shadow Medicine John S. Haller, Jr., 2014-07-08 Can Evidence Based Medicine (EBM) and Complementary and Alternative Medicine (CAM) find common ground? A distinguished historian of medicine, John S. Haller Jr., explores the epistemological foundations of EBM and the challenges these conceptual tools present for both conventional and alternative therapies. As he explores a possible reconciliation between their conflicting approaches, Haller maintains a healthy scientific skepticism yet finds promise in select complementary and alternative CAM therapies. Haller elucidates recent research on the placebo effect and shows how a new engagement between EBM and CAM might lead to a more productive medical practice that includes both the objectivity of evidence based medicine and the subjective truth of the physician/patient relationship. Haller's book tours key topics in the standoff between EBM and CAM: how and why the double blinded randomized clinical trial (RCT) came to be considered the gold standard in modern medicine; the challenge of postmodern medicine as it counters the positivism of evidence based medicine; and the politics of modern CAM and the rise of the National Center for Complementary and Alternative Medicine. He conducts an in depth case study of homeopathy explaining why it has emerged

as a poster child for CAM and assesses CAM's popularity despite its poor performance in clinical trials Haller concludes with hope showing how new experimental protocols might tease out the evidentiary basis for the placebo effect and establish a foundation for some reconciliation between EBM and CAM **Library Journal** Melvil Dewey, Richard Rogers Bowker, L.
