Berg Water Project Lawrence J.M. Haas,Leonardo Mazzei,Donal T. O'Leary,Nigel Rossouw,2010-07-08 The past decade has witnessed a major global shift in thinking about water including the role that water infrastructure plays in sustainable development This rethinking aims to balance better the social economic and environmental performance aspects in the development and management of large dams Infrastructure strategies must complement strategies for water environment and energy security and for emerging concerns to reduce vulnerability in water resource systems to climate change on the horizon Communication is central to multi stakeholder dialogue and partnerships at all levels needed to achieve sustainability and governance reform in water resource management and infrastructure provision At the same time communication drives the advocacy to mobilize political will and public support for beneficial change and continuous improvement in practices This case study emphasizes that is not only important to mobilize all opportunities to reconcile water demand and supply in river basins that are coming under increasing levels of water stress but also to integrate effectively governance and anti corruption reforms and sustainability improvements into all stages of the planning and project cycle adding value for stakeholders

Integrating Ecology and Poverty Reduction Jane Carter Ingram,Fabrice DeClerck,Cristina Rumbaitis del Rio,2012-02-15 In the past the science of ecology has frequently been excluded from the development agenda for various reasons Increasingly however there has been a renewed interest in finding more ecologically sustainable means of development that have required a strong foundation in ecological knowledge for example EcoAgriculture Partnerships EcoHealth presented at ESA and EcoNutrition proposed by Deckelbaum et al Each of these examples has already taken the critical first step at integrating ecological knowledge with agriculture health and nutrition respectively However this is only the first step more attention needs to be placed not only on the role that two fields can play towards poverty alleviation but on the role of a truly integrated interdisciplinary approach towards development goals that is firmly grounded in ecological understanding We feel that a critical look at what ecology can and cannot provide to the development agenda in light of the Millennium Development goals is timely and crucial The introduction and the final section of the book will then integrate the lessons and principles outlined in each of the chapters All chapter authors will be heavily encouraged to focus on how their sub discipline in ecology impacts overall human well being and environmental

sustainability **Managing Water Under Uncertainty and Risk: United Nations World Water Development Report #4 (3 Vols.)** UNESCO,2012-01-01 Released every three years since March 2003 the United Nations World Water Development Report WWDR a flagship UN Water report published by UNESCO has become the voice of the United Nations system in terms of the state use and management of the world s freshwater resources The report is primarily targeted at national decision makers and water resource managers but is also aimed at educating and informing a broader audience from governments to the private sector and civil society It underlines the important roles water plays in all social economic and environmental decisions highlighting policy implications across various sectors from local and municipal to regional and international levels Similarly to the first two editions this report includes a comprehensive and up to date assessment of several key challenge areas such as water for food energy and human health and governance challenges such as institutional reform knowledge and capacity building and financing each produced by individual UN agencies **Governance and Management for Sustainable Water Systems** Neil S. Grigg,2010-12-06 Increasing global pressure on water resources requires many actions from governments and individuals to achieve sustainable levels of water use These involve management tasks such as project development and utility operation but the degree of interdependence among the many participants in water management is so great that additional regulatory and coordination mechanisms are needed to control water development and uses This book is designed to be the introductory work in the new Governance and Management for Sustainable Water Systems Series It introduces the subject of governance of water systems and illuminates relatively unexplored topics of water resources management The material is practical but advanced in the sense that theories of industry organization governance and institutional analysis are applied in new ways New case study applications are provided in the book and help the reader to understand how their disciplines apply to water management The case studies are drawn from each sector and region in the world including cases from the U S A Europe the Middle East South America and a global case to cover water system privatization Visit the IWA WaterWiki to read and share material related to this title <http://www.iwawaterwiki.org/xwiki/bin/view/Articles/Governance> Author Professor Neil S Grigg Department of Civil and Environmental Engineering Colorado State University USA **Summary of Recent Legislative and Regulatory Activities Affecting the Environmental Quality of Nuclear Facilities** Robert H. Facing Global Environmental Change Hans Günter Brauch,Navnita Chadha Behera,Patricia Kameri-Mbote,John Grin,Ürsula Oswald Spring,Béchir Chourou,Czeslaw Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth

assessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world Federal Water Pollution Control Act Amendments of 1977 ...
