Handbook of Energy Engineering, Sixth Edition Albert Thumann,D. Paul Mehta,2001-01-31 This fully updated comprehensive reference will guide you step by step in applying the principles of energy engineering and management to the design of electrical HVAC utility process and building systems for both new and retrofit projects You will learn how to do an energy analysis of any system Detailed presentations cover electrical system optimization state of the art lighting and lighting controls thermal storage cogeneration HVAC system optimization HVAC and building controls and computer technologies The fifth edition includes a new chapter covering codes standards and legislation as well as a new chapter on compressed air systems You ll also find coverage on use of innovative third party financing mechanisms such as performance contracting to implement energy cost reduction measures The text is thoroughly illustrated with tables graphs diagrams and sample problems with worked out solutions

Power Electronics Design Handbook Nihal Kularatna,1998-09-09 Power Electronics Design Handbook covers the basics of power electronics theory and components while emphasizing modern low power components and applications Coverage includes power semiconductors converters power supplies batteries protection systems and power ICs One of the unique features of the Power Electronics Design Handbook is the integration of component and system theory with practical applications particularly energy saving low power applications Many chapters also include a section that looks forward to future developments in that area References for further information or more in depth technical reading are also included Nihal Kularatna is a principal research engineer with the Arthur C Clarke Foundation in Sri Lanka He is also the author of Modern Electronic Test and Measuring Instruments published by the Institute of Electrical Engineers Emphasizes low and medium power components Offers a unique mix of theory and practical application Provides a useful guide to further reading

Guide to industrial assessments for pollution prevention and energy efficiency, *Handbook of Energy Audits* Albert Thumann,William J. Younger,2003 Now there is a comprehensive reference to provide tools on implementing an energy audit for any type of facility Containing forms checklists and handy working aids this book is for anyone implementing an energy audit Accounting procedures rate of return analysis and software programs are included to provide evaluation tools for audit recommendations Technologies for electrical mechanical and building systems are covered in detail

Energy Saving in Electric Lighting for the United States Army Alan J. Van den Berg,1979 The Facilities Engineer has been required to lower the electric usage on his Post With the advent of the conservation program came more and more products with potentially high energy savings usually accompanied by pressures to buy the devices Some of the devices have a definite use and place in the lighting world but none of them is without tradeoffs of some sort or other This report is designed to augment OCE Technical Note 77 2 It is

hoped that it will help the Facilities Engineer recognize and appreciate the tradeoffs of some useful devices and to make simpler the task of devising a good lighting plan
