 Reinhard H Schmidt The impressive development of the finance literature with its emphasis on asset pricing and the formal modeling of incentive systems during the past three decades has largely relegated the business and operational aspects of banking as an industry from the agenda of academic research Though this is understandable it is especially regrettable in view of the dynamic developments in the banking industry which have started about a decade ago and are currently in full swing Fortunately there are now signs of a change to the effect that banking is back on the research agenda The present book by Professor De Laurentis and his co authors is a highly innovative and interesting manifestation of this reorientation Banking is an important part of any financial system and it is especially important in the financial systems of the countries of Continental Europe such as Italy France and Germany which have been bank based for decades and which are in my view likely to remain bank based for the foreseeable future There are many reasons based on empirical and theoretical considerations to believe that strong banks are not only important for the banking industry itself but also for the respective national economies **Resources in Education** ,1988
